The Postal Reorganization Act of 1970, Public Law 91-375, converted the Post Office Department into the U.S. Postal Service, an independent establishment within the executive branch. The Postal Service commenced operations July 1,

Public enterprise funds—Continued

POSTAL SERVICE FUND—Continued

1971. This agency is charged with providing patrons with reliable mail service at reasonable rates and fees.

The U.S. Postal Service is governed by an 11-member Board of Governors, including 9 Governors appointed by the President, a Postmaster General who is selected by the Governors, and a Deputy Postmaster General who is selected by the Governors and the Postmaster General.

Decisions on changes in domestic rates of postage and fees for postal services are recommended to the Governors of the Postal Service by the independent Postal Rate Commission after a hearing on the record under the Administrative Procedure Act. The Commission also recommends decisions on changes in the domestic mail classification schedule to the Governors. Decisions of the Governors on rates of postage, fees for postal services, and mail classification are final, subject to judicial review.

Effective in FY 1986, the Postal Service Fund (Fund) was included in the congressional and executive budget process and taken into account in making calculations under the Balanced Budget and Emergency Deficit Control Act of 1985 (Gramm-Rudman-Hollings). The Omnibus Budget Reconciliation Act of 1989 amended title 39 of the U.S. Code by adding a new section, 2009a, which provides that, beginning in FY 1990, the receipts and disbursements of the Fund shall not be considered as part of the congressional and executive budget process and shall not be taken into account in making calculations under Gramm-Rudman-Hollings.

Programs.—Included are all postal activities providing window services; processing, delivery, and transportation of mail; research and development; administration of postal field activities; and associated expenses of providing facilities and financing.

Financing.—The activities of the U.S. Postal Service are financed from the following sources: (1) mail and services revenue; (2) reimbursements from Federal and non-Federal sources; (3) proceeds from borrowing; (4) interest from U.S. securities and other investments; and (5) appropriations by the Congress. All receipts and deposits are made to the Postal Service Fund and are available without fiscal year limitation for payment of all expenses incurred, retirement of obligations, investment in capital assets, and investment in obligations and securities.

Separate legislation also increased the Postal Service's statutory borrowing authority beginning in FY 1991. Section 2005 of title 39, as amended, increases the Postal Service's borrowing authority by $2.5 billion in FY 1991 for a revised ceiling of $12.5 billion and an additional $2.5 billion in FY 1992 for a revised total ceiling of $15 billion. The total net increase in amounts outstanding in any one fiscal year were also increased and now may not exceed $2.0 billion in obligations issued for the purpose of capital improvements and $1.0 billion for the purpose of paying operating expenses. As of September 30, 1992, it is expected that the total debt instruments issued and outstanding pursuant to this authority will amount to $9.7864 billion.

Operating.—Estimated revenue will total $48.146 billion in 1992. This includes $46.891 billion from mail and services revenue, $694 million from investment income, and a net revenue forgone appropriation of $561 million. Total expenses are estimated at $46.440 billion in 1992.

The Postal Reorganization Act of 1970 established the Postal Service as a fully self-sufficient, independent entity. Postal revenues were to cover the full costs of postal operations. When the Act was passed, the Postal Service received substantial taxpayer subsidies, both appropriated and unappropriated. Consistent with the intent of the 1970 Act, Congress has taken steps over time to reduce these subsidies. Under the 1974 Civil Service Retirement Fund—Postal Employee Benefits Act, the Postal Service assumed responsibility for paying unfunded retirement costs from wage schedule increases under postal labor contracts. These costs are not covered by normal employee/employer contributions to the retirement fund. The 1985 Reconciliation Act shifted responsibility for paying health benefit costs of Postal annuitants retiring after 1986 from OPM to the Postal Service. The 1987 Reconciliation Act had the Postal Service make one-time payments to defray annuitant health benefit costs in 1988 and 1989 and retirement COLA costs in 1988. (Retirement COLAs, like wage schedule increases, result in retirement liabilities not covered by normal retirement fund contributions.) Under the 1989 Reconciliation Act, the Postal Service assumed responsibility for paying health benefits of survivors of post-86 annuitants and unfunded retirement COLA liabilities for post-86 annuitants.

The Omnibus Budget Reconciliation Act of 1990 superseded certain existing legislation and expanded the Postal Service's responsibility for benefit costs of postal annuitants. Effective October 1, 1990, the Postal Service is required to fund Civil Service Retirement System (CSRS) COLAs and the employer's share of Federal Employee Health Benefit Program (FEHBP) premiums for postal annuitants who retired after June 30, 1971, and their survivors. In addition, the Postal Service is required to fund the retroactive CSRS COLA and FEHBP premium costs for which the Postal Service would have been liable if the provisions of this new legislation had been in effect as of July 1, 1971.

The 1992 Budget proposals would add interest to the payments required by the 1990 Reconciliation Act. The interest would accrue from the calculated date of the original liability until the date of payment during FY 1992-FY 1996. Without these additional payments, the amounts received from the Postal Service would not be adequate to pay the health and retirement benefits received by postal annuitants (and their survivors).

This appropriation is a Federal subsidy to the rail industry pension for costs not financed by the railroad sector. The American taxpayer subsidy annually exceeds $1,000 per rail employee.

Subsidy for windfall payments.—When first authorized in 1974, the windfall subsidy appropriation was estimated at $250 million annually for 25 years, or a total subsidy of $6.25 billion. In two years, the annual windfall subsidy estimate increased by 45 percent and, within five years, the Railroad Retirement Board reported that the original 1974 estimate had doubled to $500 million and would continue to increase if there were any inflation after 1980.

The Carter administration, faced with increasingly large projected subsidy costs, sought to limit to $350 million annually the general taxpayers' liability to subsidize this rail industry pension, a position also reflected in the March revisions to the 1982 budget. Based on their collectively-bargained agreement and assuming a $350 million subsidy appropriation, rail labor and management successfully sought congressional restructuring of the rail industry windfall in Public Law 97-35. The rail sector sought to limit windfall payments to the appropriated subsidy amounts rather than rely on the rail industry funded retirement account. This extended the subsidy well beyond the year 2000.

FEDERAL WINDFALL SUBSIDY

(Proposed for later transmittal, proposed legislation)

The rail sector has used the windfall subsidy to shift some of the financing of non-windfall rail pensions onto American taxpayers. Under current law, the industry-financed component is reduced by 25 percent of the windfall benefit payable to a retiree. If the rail sector financed windfall benefits, the cost would therefore be only 75% of the calculated windfall benefit. American taxpayers, however, have paid for 100% of calculated windfall costs. The budget proposes (in appropriations language and authorizing legislation) to limit the general fund subsidy to the windfall costs that the rail sector would otherwise incur (i.e., 75% of the calculated windfall benefit). Rail retirees will continue to get the same windfall benefits, with a portion financed from rail sector contributions.

FEDERAL PAYMENTS TO THE RAILROAD RETIREMENT ACCOUNTS

For payment to the accounts established in the Treasury for the payment of benefits under the Railroad Retirement Act for interest earned on unnegotiated checks, $400,000, to remain available through September 30, 1992, which shall be the maximum amount available for payment pursuant to section 417 of Public Law 98-76. *(Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 1991.)*

This account funds temporary direct Federal subsidies to the rail pension fund, and other payments to the railroad social security equivalent benefit fund. Between 1991 and 1992, the rail industry pension fund will receive about $300 million in direct Federal payments from the American taxpayer.

Outlays from limitation	14,147	15,287	17,263

The Board administers a separate fund for unemployment and sickness insurance payments. Administrative expenses are financed from employer unemployment taxes.

Maintenance of rail earnings accounts.—Unemployment and sickness payments are based on individual records of rail earnings and daily wage rates.

Processing of rail unemployment insurance claims.—Claims for unemployment compensation are filed with the Railroad Retirement Board by mail and certified for payment through the headquarters office. Unemployment claims are projected to decline by 8 percent from 1991 to 1994, resulting in a proportionate reduction in workloads and staffing requirements. The budget proposes to increase unemployment and sickness insurance administrative resources above the levels justified by declining workloads to enhance the prevention and detection of waste, fraud, and abuse.

WORKLOAD

	1989 actual	*1990 actual*	*1991 est.*	*1992 est.*	*1993 est.*	*1994 est.*
Unemployment claims	298,025	300,251	305,000	295,000	287,400	297,700
Cumulative workload decline (%)		+1%	+2%	−1%	−4%	−6%
Sickness claims	281,203	269,926	291,000	283,000	273,500	264,200
Cumulative workload decline (%)		−4%	+3%	+1%	−3%	−6%
Unemployment claims processed per staff year by RRB	955	988	984	955		

Processing of rail sickness claims.—These claims are filed by mail and certified for payment through the headquarters office. Sickness claims are also projected to decline by 9 percent between 1991 and 1994.

Rail claimant placement services.—The Board conducts an employment service for unemployment benefit claimants.

Administration.—The costs of administration are shared between this and the rail pension program on an allocated basis, which is periodically revised for actual experience.

Railroad retirees generally receive the equivalent to a social security benefit and a rail industry pension collectively bargained like other private pension plans but embedded in Federal law. About 229,000 individuals also receive a "windfall" benefit.

Income.—Railroad industry pension fund revenues are derived from pension contributions by railroad employers and employees; interest on investments; various temporary subsidies; and payments from the Federal old-age, survivors and disability insurance trust funds. The railroad retirement system has an annual financial interchange with social security. Under this arrangement, social security paid railroad retirement some $36 billion, with annual payments of $3 billion. It was designed by the rail sector to help finance the rail industry pension, placing social security in the same position in which it would have been if railroad employment had been directly covered by social security.

Retirement, disability, and survivor benefit payments.—Estimates reflect the increases in benefit rates provided by law.

Administrative expenses.—These expenses are subject to annual limitations in appropriation acts (see Limitation on Administration and Limitation on Review Activity).

One proposal would fully conform the definition of employee compensation under the Railroad Retirement Tax Act with the definition of employee compensation under FICA. Discrepant tax treatment of employee remuneration under the two systems results in unnecessary revenue losses to the ailing rail pension trust funds. Another proposal would fund 25 percent of federal windfall payments from the rail industry pension, and reduce federal subsidies by this amount.

LIMITATION ON ADMINISTRATION

For necessary expenses for the Railroad Retirement Board, [$71,663,000] *$74,037,000* to be derived from the railroad retirement accounts[, of which [$2,457,000] *$2,201,500* shall be available for the lease-to-purchase costs and contract services related to the installation of a mainframe computer only upon the delegation of procurement authority from the General Services Administration to the Railroad Retirement Board]: *Provided*, That $200,000 of the foregoing amount shall be available only to the extent necessary to process workloads not anticipated in the budget estimates and after maximum absorption of the costs of such workloads within the remainder of the existing limitation has been achieved: *Provided further*, That notwithstanding any other provision of law, no portion of this limitation shall be available for payments of standard level user charges pursuant to section 210(j) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 490(j); 45 U.S.C. [228a–r] *231–231u*). *(Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 1991.)*

Limitation	**63,035**	**69,936**	**74,037**
Relation of obligations to outlays:			
Obligations incurred, net	62,820	69,736	73,837
Obligated balance, start of year	7,433	5,478	5,478
Obligated balance, end of year	(5,478)	(5,478)	(5,478)
Outlays from limitation	64,775	69,736	73,837

Note.—The FY 1990 limitation reflects a 1.4 percent reduction pursuant to P.L. 99–177.

Maintenance of rail earnings accounts.—Eligibility for retirement and the amount of rail benefits paid are based on individual rail earnings records.

Processing rail applications.—This activity includes processing annuity claims under the Railroad Retirement Act of 1974. Based on amendments enacted in Public Law 97-35, benefit computations were simplified. Coupled with the continued decline in railroad retirement applications and automation of previously manual procedures, the Board's workload devoted to this activity is expected to decrease each year. The table below shows the continued decline anticipated in major workloads.

	1990 actual	*1991 est.*	*1992 est.*
Pending, start of year	23,103	23,103	23,103
New Railroad Retirement applications	73,012	72,000	66,000
New Social Security certifications	9,061	9,000	9,000
Total dispositions (excluding partial awards)	82,073	81,000	75,000
Pending, end of year	23,103	23,103	23,103

Maintenance of rail beneficiary rolls.—The Board will explore and adopt new approaches to improve service to beneficiaries.

As shown below, the Board projects this workload will continue to decline, as the number of beneficiaries on the rolls continues to decline.

	1990 actual	*1991 est.*	*1992 est.*
Total beneficiaries	889,000	875,000	859,000

Medicare.—This activity includes on a reimbursable basis processing applications for the Social Security and Health Care Financing Administrations of the Department of Health and Human Services to establish eligibility for health and medical insurance benefits under title XVIII of the Social Security Act for rail beneficiaries.

Administration.—The cost of administration is shared between the rail pension, social security, and the railroad unemployment insurance programs.

In recognition of the continuing decline in virtually all its major workloads, the Board will explore and adopt new approaches to improve service to beneficiaries.

In addition to rail social security, rail industry pensions and special windfalls, the Railroad Retirement Board pays supplemental annuities to rail workers retiring at age 60 with 30 years of creditable rail service or at age 65 with 25-29 years of creditable service. Monthly benefit amounts are calculated from a base of $23, adding $4 for every year of service over 25, up to a maximum monthly benefit of $43. Employer's finance benefits on a pay-as-you-go basis by a cents-per-hour tax, currently established at 26 cents per hour.

All railroad retirees receive the equivalent of a social security benefit, and they may also receive other add-ons including rail industry pension payments, windfall payments, and supplemental annuities. Social security benefits for former railroad employees are funded by the social security trust funds, and rail industry pension payments are the responsibility of the rail sector. The combination of both these payments in a single trust fund gave rise to serious concerns that social security payments to railroad retirees might be jeopardized by the continuing financial problems of the rail industry pension fund. To ensure and protect the integrity of social security benefits to railroad retirees, the Railroad Retirement Solvency Act of 1983 mandated that beginning in 1985, the financing and payment of Federal social security benefits be separated from the rail industry pension trust fund.

This proposal would fully conform rail social security coverage with coverage under title II of the Social Security Act. Any railroad beneficiary who would be eligible under social security, but is denied coverage because similar benefits are not paid by RRB, will be paid by the Social Security Administration. Such payments will be deducted from financial interchange transfers.

The Financial Institutions Reform, Recovery, and Enforcement Act (FIRREA), enacted in August 1989, established the Resolution Trust Corporation (RTC) to dispose of currently insolvent thrift institutions and those that may become insolvent during the three-year period subsequent to FIRREA's passage. The agency is managed by the Federal Deposit Insurance Corporation (FDIC), whose Board serves as the RTC Board. In addition, FIRREA established the RTC Oversight Board to provide the RTC with general policy direction and to review its performance. The Oversight Board includes the Secretary of the Treasury (who serves as Chairperson), the Chairman of the Board of Governors of the Federal Reserve System, the Secretary of Housing and Urban Development, and two other members appointed by the President with the advice and consent of the Senate.

Sources of funds for the RTC include income and sale proceeds from assets acquired during the course of resolving thrift cases, $18.8 billion in appropriated funds, and $31.2 billion from the sale of capital certificates to the Resolution Funding Corporation (REFCORP), a privately capitalized financing entity also established by FIRREA. Of the $31.2 billion, $1.2 billion was contributed by the Federal Home Loan Banks through REFCORP to the RTC in 1989. In 1990, $18 billion in REFCORP long-term debt obligations were issued. The remaining $12 billion will be raised in 1991. The RTC may also issue notes and make guarantees up to certain statutory limits based on the value of RTC assets and the amount of funds contributed by REFCORP. Expenses of the Oversight Board will also be paid out of funds available to the RTC.

The RTC will terminate by December 31, 1996. All assets and liabilities of the RTC will be transferred to the FSLIC Resolution Fund, managed by the FDIC. The FSLIC Resolution Fund thereafter will pay any net proceeds from the sale of assets to REFCORP for meeting bond interest payments.

Outlays			−368

Total:			
Budget authority	166,633	157,485	225,392
Outlays	154,237	152,529	218,004

The primary purpose of the Commission is to protect the interests of the investing public.

Full disclosure.—To insure that investors will be provided with material facts concerning securities offered for public sale, issuers who propose to offer new securities for public sale are required to file registration statements with the Commission at its home or regional offices. Issuers conducting such offerings, as well as issuers having total assets and security-holder populations of specified sizes, are also required to furnish comparable information on a continuing basis in annual and other periodic reports and in proxy and tender offer materials. The Commission's staff reviews these documents on a selected basis for compliance with the disclosure requirements and, where appropriate, refers matters for enforcement action.

Electronic filing project (EDGAR).—In 1984, the SEC began a pilot project that has successfully tested the feasibility of receiving, analyzing and disseminating full disclosure filings electronically. Through the end of 1990, the pilot has received approximately 75,000 filings electronically.

In early 1989, the SEC selected a contractor to develop an operational system. The operational system will provide the Commission with a capability for electronic receipt, analysis, and dissemination of most of the full disclosure filings currently filed in paper. Transition from the pilot to the operational system will occur during 1991. The operational contract is for eight years with a $9.4 million requirement in fiscal 1992.

SELECTED WORKLOAD DATA

	1990 actual	*1991 est.*	*1992 est.*
Filings of initial 1933 Act registration statements—other than investment companies	935	940	940
Filings of repeat 1933 Act registration statements and post-effective amendments—other than investment companies	3,984	4,030	4,030
Filings of preliminary proxy and information statements (uncontested)—other than investment companies	2,558	2,560	2,560
Filings of annual and periodic reports—other than investment companies	58,475	58,600	58,600
Filings of Director and Officer ownership and transaction reports	142,075	143,000	145,500

Prevention and Suppression of Fraud.—This program evaluates information indicating possible violations of the federal securities laws. Possible violations may include the illegal distribution of unregistered securities, fraud in the offer, purchase and sale of securities, insider trading, market manipulation, and illegal conduct by broker-dealers, investment advisers and other regulated entities. Investigations of possible violations are conducted and if appropriate enforcement actions are initiated. Actions include civil injunctive proceedings and administrative proceedings. The Commission is now authorized to seek court orders imposing civil monetary penalties for any securities law violation as well as to seek such penalties in administrative proceedings. Under appropriate circumstances matters are referred for criminal prosecution.

SELECTED WORKLOAD DATA

	1990 actual	*1991 est.*	*1992 est.*
Investigations initiated	362	400	465
Administrative proceedings opened	111	116	124
Injunctive actions initiated	193	204	216

Supervision and regulation of securities markets.—Trading in the securities markets is regulated to prevent fraud and manipulation, and to insure the maintenance of fair, orderly, efficient, and competitive markets. The Commission oversees the work of self-regulatory organizations, monitors securities market and broker-dealer operations, and develops regulatory strategies for coping with market stress, promoting compli-

ance, and meeting changing domestic and international conditions.

SELECTED WORKLOAD DATA

	1990 actual	1991 est.	1992 est.
Review of changes in the rules and procedures of self-regulatory organizations	427	440	490
Inspections of self-regulatory organizations	24	25	30
Broker-dealers registered	10,528	10,400	10,800
Broker-dealer oversight and cause examinations	547	555	635

Investment management regulation.—This program insures that investment companies (IC) and investment advisers (IA) carry out their fiduciary obligations and fully and fairly disclose their activities to investors. The program also seeks to reduce investor loss by examining registrations, analyzing filings, maintaining regular inspections of registered entities, and referring violations for enforcement. A further function of this program is to protect the public's interest in interstate public utility holding company systems by ensuring that such companies operate with sound financial structures.

SELECTED WORKLOAD DATA

	1990 actual	1991 est.	1992 est.
IC and IA registration statements and amendments processed	15,719	18,371	19,573
Proxy statements processed	368	394	383
Investment company inspections	988	1,300	1,600
Investment advisers inspections	1,257	900	900
Exemptive orders issued	432	465	550
Public utility financial transactions reviewed	153	205	185
Examination of public utility annual and periodic reports	1,352	1,300	1,300

Legal services.—This program provides a range of general legal services to the Commission including the following: (i) representation in all appellate litigation, in private securities litigation where the Commission appears as amicus curiae, in actions brought against the Commission and its employees, and in corporate bankruptcy reorganizations; (ii) advice to the Commission, preparation of Congressional testimony, and comment on proposed legislation affecting the Commission's work; (iii) prosecution of disciplinary proceedings against professionals who practice before the Commission; and (iv) advice on and monitoring of the Commission's compliance with government-wide statutes. The Office of the General Counsel also is responsible for advising the Commission in its adjudication of administrative proceedings.

SELECTED WORKLOAD DATA

	1990 actual	1991 est.	1992 est.
Advisory comments/memoranda	223	246	268
Litigation closed	126	180	210
Administrative proceedings completed	109	135	200
Legislative comments and testimony	111	145	170
New Chapter 11 cases in which the Commission has appeared	34	45	45

Economic and statistical research.—This program provides the Commission with research studies concerning economic and regulatory issues, such as takeovers, stock price volatility, mutual fund performance, and international aspects of securities regulation. The program also provides economic analyses of proposed regulations and legislation, and litigation support in enforcement cases.

Program direction.—This program assists the Commission in fulfilling its statutory requirements and in responding to changes in the securities marketplace by carefully evaluating priorities, implementing policies and managing agency resources. This program provides management direction and analysis, internal control, financial, personnel, data processing, public affairs, records, library and general administrative services.

The Securities and Exchange Commission is authorized to make loans to the Securities Investor Protection Corporation (SIPC) in the event that the fund maintained by SIPC is insufficient to satisfy the claims of customers of failing brokerage firms. To date, SIPC has not needed these loans.

SELECTIVE SERVICE SYSTEM

Federal Funds

General and special funds:

SALARIES AND EXPENSES

For necessary expenses of the Selective Service System, including expenses of attendance at meetings and of training for uniformed personnel assigned to the Selective Service System, as authorized by law (5 U.S.C. 4101–4118) for civilian employees; and not to exceed $1,000 for official reception and representation expenses; **[**$26,635,000**]** *$27,480,000*: *Provided*, That during the current fiscal year, the President may exempt this appropriation from the provisions of 31 U.S.C. 1341, whenever he deems such action to be necessary in the interest of national defense: *Provided further*, That none of the funds appropriated by this Act may be expended for or in connection with the induction of any person into the Armed Forces of the United States: *Provided further*, That notwithstanding the provisions of 50 U.S.C. App. 460(g), none of the funds appropriated by this Act may be obligated in connection with the preparation of more than one report each year to the Congress covering the operation of the Selective Service System.

Further, for the foregoing purposes and subject to the same terms and conditions, $28,316,000, to become available for obligation on October 1, 1992. (Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act, 1991.)

In 1992 and 1993, the Selective Service System will continue to register men as they reach age 18, conduct a non-registrant identification program to insure compliance with the law, and maintain a data base of registrant records. The System will continue to enhance its capability to respond rapidly and efficiently from its standby posture.

Mobilization readiness remains one of the System's major objectives. Activities in support of this objective include all facets of National and Regional operational planning, maintenance of automated registration information, a comprehensive training program for the Selective Service Reserve Forces, a training program for the standby board members, and administrative functions. The processing procedures of the Registrant Information Management System will continue to be tested and refined to insure that it can fully satisfy the emergency manpower needs of the Armed Forces.

Reserve and National Guard officers are trained for mobilization assignments in specific positions with the Selective Service System. A special focus of the program is on the exercise of the mobilization plans to ensure a high readiness capability in the event of mobilization.

The Military Selective Service Act, section 10(h), as amended by section 715, Public Law 100–180, approved December 4, 1987, requires the Selective Service System to develop a system for the delivery of health care personnel to the armed forces in a national emergency. The first of four planned development phases of this system began in January 1988. Phase I, consisting of a needs analysis and plan of action; and Phase II, consisting of a concept of operations, a detailed study of the policies and procedures related to the induction of health care personnel, and the identification of the functional ADP requirements, have been completed. Phase III, consisting of the development of an ADP system, and Phase IV, consisting of testing, evaluation, and program refinement, should be completed during fiscal year 1991.

In 1992 and 1993, registration improvement activities will include emphasis on urban areas where registration shortfalls are the greatest. Public awareness, enhanced compliance efforts and Federal and State legislation requiring registration for employment and student financial assistance all contribute toward improved compliance with the law.

The Smithsonian Institution conducts research in the natural and physical sciences and in the history of cultures, technology, and the arts; acquires and preserves for reference and study purposes over one hundred million items of scientific, cultural, and historic importance; maintains public exhibits representative of the arts, American history, aeronautics and astronautics, technology, anthropology, geology, and biology (including living animal exhibits); presents performances of American arts and crafts; undertakes education programs at all levels; and participates in the exchange of scholarly information.

The Institution is responsible for the operation and maintenance of 14 major exhibition buildings; a zoological park and animal conservation and research center; the Museum Support Center and other collections storage and preservation facilities at Silver Hill, MD; two natural preserves, in Panama and on the Chesapeake Bay; an astrophysical observatory at Mount Hopkins, AZ; and supporting administrative, laboratory, and storage areas. Visitor attendance to buildings on and off the Mall, including the National Zoological Park, is expected to total approximately 30 million in 1991. Millions more will view traveling exhibitions.

Funding provided in 1990 and 1991 and requested in 1992 will support the establishment of a new National Museum of the American Indian. Pursuant to Public Law 101-185, the Smithsonian assumed responsibility for the care and custody of the collection of Indian artifacts of the Museum of the American Indian, Heye Foundation, in June of 1990 under the terms of the agreement between the Smithsonian and the Heye Foundation signed on May 8, 1989. This extraordinary collection, including one million Indian artifacts from all parts of the Western hemisphere, a 40,000-volume library and an 86,000-item archives, will form the basis of the new museum.

The 1992 request also will expand the Institution's research programs in the critical area of global environmental change and includes funding to cover increases in uncontrollable costs, including utilities.

This account is used to finance repairs, alterations, and improvements to existing National Zoological Park facilities, including exhibits, located in Rock Creek Park; to prepare plans and specifications for construction; to perform renovations, restorations, and new construction implementing the master plan approved by the Commission of Fine Arts and the National Capital Planning Commission in 1973; and to make repairs, modifications, and improvements to the animal conservation and research center at Front Royal, VA. Funds requested in 1992 will continue major facility renovations and improvements at the Rock Creek Park location, and support essential programs for renovation, repair and preventive maintenance of existing facilities at Rock Creek and Front Royal.

This account encompasses repairs, improvements, and restorations of a long-term nature and utility; and facilities planning and studies. In 1992, funds are sought to support the cyclical replacement of major building systems and equipment; continue comprehensive programs to keep Smithsonian facilities, including roofs, facades, and terraces, in good repair and efficient operating condition; provide for the safety and security of visitors, staff and collections by upgrading existing and installing new fire detection and suppression systems; remove hazardous materials such as asbestos; upgrade heating, ventilating and air-conditioning systems to provide the proper environmental conditions for the National Collections and to improve energy efficiency; provide for the needs of disabled visitors and staff; and advance planning for such projects.

National Air and Space.—Necessary repairs to the building's facade and terrace continue.

Museum Support Center.—The Museum Support Center provides additional space for the care, curation, conservation, deposit, preparation, and study of the National Collections, for the related documentation of the collections, and for the training of museum conservators.

Quadrangle.—The Quadrangle facility houses the National Museum of African Art, the Arthur M. Sackler Gallery, and the S. Dillon Ripley Center.

Smithsonian Tropical Research Institute.—Public Law 98-423 authorizes the planning and construction of research and support facilities for the Smithsonian Tropical Research Institute (STRI), located in Panama.

Smithsonian Astrophysical Observatory.—The construction of a new base camp at the Fred L. Whipple Observatory, Mt. Hopkins, AZ, is scheduled to be completed in 1991.

National Museum of the American Indian.—On May 8, 1989, the Smithsonian and the Museum of the American Indian, Heye Foundation, signed an agreement to transfer the Foundation's collection of Indian artifacts to the care and custody of the Smithsonian. Public Law 101-185 authorized the establishment of the National Museum of the American Indian. Facilities for the new museum will include a major museum building to be constructed on the Mall in Washington, D.C., a satellite exhibition and education center to be located in a portion of the Old United States Custom House in New York City, and a collections storage and research facility in Suitland, MD.

Natural History East Court Building.—The construction of an infill building in the East Courtyard of the National Museum of Natural History will resolve two space challenges that the Museum faces with total building renovation and overcrowding.

General Post Office Building.—Public Law 98-253 authorized the transfer of the General Post Office Building in Washington, D.C. from the General Services Administration to the Smithsonian Institution. Renovation will preserve the historic nature of the building and convert it for Smithsonian use. Additional funding will be requested in future years to support the design and renovation work.

Alterations and Modifications.—Space will be more effectively configured and improvements made in order to meet the research, exhibition, educational and conservation program objectives of Smithsonian organizations.

Facility Planning and Design.—Feasibility studies, planning and conceptual designs, establishment of operating and logistical support requirements, and required environmental impact assessments for future construction projects will be provided.

The National Gallery of Art receives, holds, and administers works of art acquired for the Nation by the Gallery's board of trustees. It also maintains and administers the Gallery buildings so as to give maximum care and protection to art treasures and to enable these works of art to be exhibited regularly to the public without charge. During 1990 there were 5,580,005 visitors to the Gallery and an estimated 6,000,000 visitors are expected in 1991 and 6,500,000 in 1992.

The objectives of the Woodrow Wilson Center are to produce scholarship of the highest quality on subjects that matter to our civilization and to communicate that scholarship to a wider audience within and beyond Washington through publication and dialog.

The Center has chosen to fulfill these objectives through its fellowship and guest scholar program. Each year the Center conducts a major open international competition for a limited number of fellowships. The scholars and the scholarly work they produce constitute the memorial to Woodrow Wilson. Virtually all of the Center's expenditures derive from the basic decision to create a resident body of fellows.

The Center is directed by its congressional statute to raise both public and private funds, and the Center's major objectives could not be attained by an exclusive reliance on either Federal appropriation or private contribution.

The Tennessee Valley Authority (TVA) was created in 1933 as a Government-owned corporation for the unified development of a river basin comprised of parts of seven States. Its program in 1992 will be financed from three sources: (1) appropriations by the Congress; (2) proceeds available from current power operations and borrowings against future power revenues; and (3) proceeds available from nonpower activities.

The following table provides detailed information on programs financed by power proceeds and borrowings and programs financed by appropriations and nonpower proceeds.

Budget program-stewardship.—TVA responsibilities in this area include maintaining a system of dams, reservoirs, and navigation facilities; refurbishing outmoded public facilities and other structures; performing adequate routine and cyclic maintenance; and maintaining and managing over 300,000 acres of public land and 11,000 miles of shoreline efficiently and in an environmentally sound manner. TVA operates and develops the navigation channel from Paducah, KY, to Knoxville, TN; operates a system of multipurpose reservoirs to retain excessive seasonal runoff and regulate discharges at flow rates that can be accommodated by downstream channels and reservoirs, resulting in the reduction of flood crests along the Tennessee River and its tributaries and also the lower Ohio and Mississippi Rivers; performs dam safety modifications and maintenance activities in a manner consistent with Federal dam safety guidelines and to ensure that the waterway system is in a safe operating condition; operates dewatering areas associated with TVA's reservoir system; protects public lands and waters under TVA trust; manages Land Between The Lakes, a 170,000 acre area in western Kentucky and Tennessee situated between TVA's Kentucky Reservoir and the Corps of Engineer's Barkley Reservoir; and performs environmental cleanup and demolition of obsolete buildings and materials on TVA's Muscle Shoal (AL) Reservation.

Water and land.—This program is designed to aid further the proper use, conservation, and development of the natural resources of region TVA serves. TVA operates air quality monitoring station; promotes the wise use of the forest resources of the region; and prepares maps in support of TVA activities as well as the regional mapping needs of the U.S. Geological Survey.

Land between the lakes.—TVA provides outdoor recreation and environmental education opportunities for the public at this facility.

National fertilizer development.—The National Fertilizer Development Center in Muscle Shoals, AL, is active in two program areas: Research and development and technology development.

Research and development consists of basic chemical and agronomic research and development of fertilizer products and processes. This is accomplished in cooperation with the Department of Agriculture, the land-grant universities, and industry.

Technology development is conducted with the land-grant universities and the fertilizer industry. It includes small-plot demonstrations, tests and demonstrations of fertilizer materials and practices on selected operating farms.

Power program: Power supply and use.—TVA is the sole supplier of electric power to an area of 80,000 square miles in the seven Tennessee Valley States. Income from power operations, net of interest charges and depreciation, and other operating expenses is estimated at $726,000 thousand in 1992.

Power generating facilities are financed from power proceeds and borrowings.

General services.—Operating costs for general service activities include reimbursable services furnished at the request and expense of other agencies.

Financing.—Amounts estimated to become available in 1992 are to be derived from (1) the requested appropriation of $91,266 thousand; (2) nonpower revenues and receipts of $39,436 thousand; and (3) power revenues and receipts of $5,559,000 thousand. A summary of the application of appropriations follows:

APPLICATION OF APPROPRIATIONS

[In thousands of dollars]

	1990 actual	*1991 est.*	*1992 est.*
Operations:			
1. Stewardship	41,534	50,591	50,647
2. Water and land	8,576	10,718	[illegible]
3. Land Between The Lakes	3,446	3,388	[illegible]
4. Rural development	22,212	24,533	
5. National fertilizer research center	28,599	33,000	[illegible]
6. General services			
Total operations	104,367	122,230	80,165

2. Water and land	1,309	2,405	[illegible]
3. Land Between The Lakes			
4. National fertilizer research center	4,901		[illegible]
Total capital investment	16,633	12,770	11,101
Total appropriations	121,000	135,000	91,266
Sequestration	−1,694		
Unobligated balance brought forward	2,361	3,355	
Unobligated balance carried forward	−3,355		
Obligations, appropriated funds	118,312	138,355	91,266

Operating results and financial conditions.—Only the power program and fertilizer introduction are intended to be self-supporting; the net expense of nonpower programs is covered largely by appropriation funding. Payments to the Treasury from power proceeds in 1992 are estimated at $82,000 thousand—$62,000 thousand as a dividend (return on the appropriation investment in the power program) and $20,000 thousand as a reduction in the appropriation investment in the power program. Outstanding borrowings for the power program are expected to decrease by $1,170,000 thousand during 1992.

Total assets are estimated to decrease by $473,304 thousand during 1992. The estimate of liabilities at September 30, 1992, is $1,128,405 thousand less than the estimate at September 30, 1991. Total Government equity at September 30, 1992, is estimated to be $655,101 thousand greater than that at September 1991. This change includes the requested appropriation for 1992 and the net income from power operations, less payments to the Treasury and the net expense of nonpower programs.

The United States Information Agency conducts the international communication, educational, cultural and exchange programs of the United States. The Agency advises the President, the National Security Council, and the Secretary of State on the above areas, and assists in the development and execution of a national policy on international communications. In 1992, the agency will place new emphasis on programs for Eastern Europe, the Soviet Union, and Islamic countries.

Agency operations are largely financed from this appropriation and consist of the following major elements:

Overseas missions.—The Agency currently operates [illegible] posts in 128 countries. These posts administer the exchange-of-persons program and conduct informational and other cultural programs using materials prepared locally and by the media services in Washington.

Bureau of Broadcasting.—Under a recent reorganization, all broadcasting services within USIA, including the Voice of America and the Television and Film Service, have been combined into one unit, the Bureau of Broadcasting. The Bureau produces radio broadcasts in English and 43 other languages. Programs are broadcast from transmitters at 3 domestic and 12 overseas locations. The Bureau also maintains WORLDNET, the Agency's global satellite distribution system transmitting to a world-wide network of television receive only antennas.

Educational and cultural affairs.—This activity covers the staff that administers educational and cultural exchanges between the United States and over 140 countries. It also provides program and support costs for the President's International Youth Exchange program, American-sponsored schools abroad, binational centers, U.S.-operated libraries and reading rooms abroad and other educational and cultural activities. Grant costs for Academic and Visitor Exchanges, and the Humphrey Fellowship, Citizen Exchanges, and Congress-Buning exchange programs are funded separately in the Educational and Cultural Exchanges account.

Program coordination, production, and support.—This activity serves primarily to support overseas missions by coordinating program planning and by producing, acquiring, and adapting various program materials for their use.

Agency direction and management.—This activity encompasses managerial staffs and centralized servicing functions for the Agency as a whole.

Administrative support from other agencies.—This activity covers payments to the Department of State for USIA's share of the costs of services provided overseas, to the General Services Administration for space and services provided under the Federal Building Rent System, and payments to other agencies for services provided.

This appropriation provides funding for the conduct of audits and investigations relating to the programs and operations of the agency. Audits and investigations are responsible for providing leadership, coordination and policy recommendations to promote economy, efficiency and effectiveness and to identify and correct management and administrative deficiencies which create conditions for existing or potential instances of fraud, waste and mismanagement. The audit function provides internal audit services, program evaluation, and contract audit services. The investigation function provides for the detection and investigation of improper and illegal activities involving agency personnel, programs, and operations. This appropriation also provides funding for inspection services for domestic and overseas operations.

74.40	Obligated balance, end of year	−478		
90.00	Outlays	3	484	

An appropriation, together with the balances available from prior years, was formerly used for payment of local program expenses in U.S.-owned foreign currencies in those countries where the Department of the Treasury had determined that the supply of such currencies was in excess to the normal requirements of the U.S. Government. Since 1986, new appropriations for these payments in excess of available balances have been budgeted for in the Salaries and expenses account.

This appropriation provides funding for programs authorized by the Mutual Educational and Cultural Exchanges Act of 1961, as amended, including academic exchanges and grants for foreign leaders and professionals to make short-term visits to the United States. USIA operates a variety of cooperative exchange programs with the private sector. It also arranges special programs for selected foreign individuals and groups visiting the United States under other than U.S. Government sponsorship.

The Agency also manages other exchange related activities funded from the Agency's S&E appropriation, e.g., international youth exchange, Board of Foreign Scholarships, student support, libraries, reading rooms, cultural centers, and related resources.

The staff costs to operate the exchange programs funded by this appropriation are included in the Salaries and Expenses account.

Academic and visitor exchanges.—This activity consists of academic exchanges of American and foreign graduate students, teachers, scholars and specialists; officially invited international visitors; and important foreign visitors who are not U.S. Government-sponsored.

Hubert H. Humphrey fellowships.—This activity provides for one year of graduate training to promising mid-career professionals from third world countries.

Citizen Exchanges.—This activity supports traditional and other exchange programs conducted by non-governmental organizations.

Congress-Bundestag Exchange Program.—This activity provides mutual full scholarships for year-long academic homestay programs between Germany and the United States. This project is co-funded with each country providing half of the necessary funds to support these exchanges.

The National Endowment for Democracy is a private, nonprofit corporation established in the District of Columbia to encourage and strengthen the development of democratic institutions and processes internationally, including activities which promote individual rights and freedom, through private sector initiatives, exchanges, training programs, and other activities.

The National Endowment for Democracy Act provides that the U.S. Information Agency will make an annual grant to the Endowment to enable the Endowment to fulfill the purposes of the Act. The Endowment does not carry out programs directly but provides funding for activities of the Free Trade Union Institute of the AFL–CIO, the National Chamber Foundation of the U.S. Chamber of Commerce, the National Republican Institute for International Affairs of the Republican Party, the National Democratic Institute for International Affairs of the Democratic Party, and other private organizations and groups.

Broadcasting to Cuba

For expenses necessary to enable the United States Information Agency to carry out the Radio Broadcasting to Cuba Act, as amended (22 U.S.C. 1465 et seq.) (providing for the Radio Marti Program or Cuba Service of the Voice of America), and the Television Broadcasting to Cuba Act (22 U.S.C. 1465aa et seq.) including the purchase, rent, construction, and improvement of facilities for radio and television transmission and reception and purchase and installation of necessary equipment for radio and television transmission and reception as authorized by 22 U.S.C. 1471, [$31,069,000] *$38,988,000,* to remain available until expended as authorized by 22 U.S.C. 1477b(a): *Provided,* That such funds for television broadcasting to Cuba may be used to purchase or lease, maintain, and operate such aircraft (including aerostats) as may be required to house and operate necessary television broadcasting equipment. *(Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act, 1991; additional authorizing legislation to be proposed.)*

Note.—A restoration of the 1991 sequester of accounts in the international discretionary category is proposed. The following schedules assume enactment of the restoration.

The Office of Cuba Broadcasting was newly established in 1990 to provide coordinated management of the Radio and Television Marti programs. Both Radio and Television Marti programming originate in Washington, D.C., and are broadcast to Cuba from facilities in Greenville, North Carolina; Marathon Key, Florida; and Cudjoe Key, Florida.

The objectives of the Radio and Television Marti Program are: (1) to support the right of the people of Cuba to seek, receive, and impart information and ideas through any media and regardless of frontiers; (2) to be effective in furthering the open communication of information and ideas through use of radio and television broadcasting to Cuba; (3) to serve as a consistently reliable and authoritative source of accurate, objective, and comprehensive news; and (4) to function in accordance with all Voice of America standards, and to broadcast programs which present a variety of views.

Program operations.—These funds are for personnel compensation, research, transmission costs, and other programming requirements for Radio and Television Marti, and for the establishment of facilities necessary to the production and broadcasting of Television Marti. Radio Marti broadcasts 24-hours per day, and includes news and information programs

General and special funds—Continued

BROADCASTING TO CUBA—Continued

throughout the day to ensure that the people of Cuba are made aware of important, fast-breaking developments. In 1992, Television Marti will broadcast up to six hours daily with two one-half hour network quality news programs and expanded information programming daily.

Acquisition and construction of facilities.—These funds will be used to construct a transmitting facility in the Florida Keys.

The Center for Cultural and Technical Interchange Between East and West is a national educational institution administered on behalf of the United States Information Agency by a public, nonprofit educational corporation under a grant from the Agency. The Center promotes better relations and understanding between the United States and the nations of Asia and the Pacific through cooperative programs of research, study, and training, which bring qualified persons from the countries of the area to work jointly on problems of mutual concern.

RADIO CONSTRUCTION

For an additional amount for the purchase, rent, construction, and improvement of facilities for radio transmission and reception and purchase and installation of necessary equipment for radio transmission and reception as authorized by 22 U.S.C. 1471, [$107,237,000] *$98,043,000*, to remain available until expended as authorized by 22 U.S.C. 1477b(a). *(Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act, 1991; additional authorizing legislation to be proposed.)*

Note.—A restoration of the 1991 sequester of accounts in the international discretionary category is proposed. The following schedules assume enactment of the restoration.

New construction.—In 1992, the agency will continue the Administration-approved streamlined modernization plan to expand the transmission capability of the Voice of America (VOA). This plan includes construction of two high priority new shortwave radio relay stations, one in Morocco and one in Thailand.

Upgrade of existing relay station capabilities.—This activity funds the upgrade of our existing relay stations to improve mission quality and avoid the need for future new construction.

Major improvements, replacements and repairs.—This activity funds the continuing repairs and improvements required to maintain the VOA's existing global radio network.

Broadcast facility leases and land rentals.—This activity primarily funds leased broadcast facilities at Wertachtal, Germany.

Other projects.—In 1990, funds were provided from this appropriation for the Seville Exposition and for Television Broadcasting to Cuba. Funds for completion of the Seville Exposition will be provided from the Salaries and Expenses Appropriation. Beginning in 1991, new appropriations for television broadcasting to Cuba will be provided in the Broadcasting to Cuba appropriation.

The United States Sentencing Commission was established pursuant to provisions of the Comprehensive Crime Control Act of 1984 (Public Law 98-473, Title II), as amended. The purposes of the Commission are to establish sentencing guidelines for the United States district courts and other sentencing policies and practices for the Federal criminal justice system. The Commission is also charged with developing means of measuring the degree to which the sentencing, penal, and correctional practices are effective in meeting the purposes of sentencing as set forth in new section 3553(a)(2) of Title 18, United States Code, by section 212(a) of the Act.

This includes a broad spectrum of research related to prison impact, recidivism, deterrence, rehabilitation, just punishment, incapacitation, and other areas. The Commission has specific responsibilities to: develop and maintain a comprehensive data base in order to analyze court application of the guidelines; evaluate the effects of guideline implementation in meeting statutory goals; develop training programs and provide assistance to probation officers and others in the criminal justice system on the application of sentencing guidelines. Various other criminal statutes, such as the Crime Control Act of 1990 (Public Law 101-647), contain provisions which the Commission must implement.

The Washington Metropolitan Area Transit Authority (WMATA) is a non-Federal agency established pursuant to an interstate compact among Maryland, Virginia, and the District of Columbia. The Authority's primary functions are to plan, develop, finance, and construct the Metrorail rapid transit system and to operate the bus/rail transit system in the National Capital area. The rail system extends from the District of Columbia into the participating jurisdictions of Maryland and Virginia.

This WMATA account provides the annual Federal share (two-thirds) of interest payments on outstanding WMATA bonds sold in support of the rail construction program. The WMATA bonds, totaling $997 million, are guaranteed by the Federal Government and become due beginning in the year 2012. In September 1979, WMATA and the Department of Transportation approved an Initial Bond Repayment Participation Agreement providing for an overall two-third Federal and one-third local sharing of the interest and principal costs of the bonds. In August 1982, this agreement was reaffirmed in a supplement to the agreement.

WATER RESOURCES COUNCIL

Federal Funds

General and special funds:

WATER RESOURCES PLANNING

Program and Financing (in thousands of dollars)

78.00 Adjustments in unexpired accounts			
90.00 Outlays			

All Water Resources Council activities were terminated March 1981.

XIII.B PROPOSED REVISIONS IN BUDGET AUTHORITY—INCLUDING SUPPLEMENTALS AND RESCISSIONS

This chapter presents additional information on proposals for the current fiscal year (1991), the budget year (1992), and beyond. Specifically, it includes:

- information on *proposed amendments to or revisions in budget authority* for 1991 that were transmitted to the Congress between the transmittal of the 1991 and 1992 Budgets, as required by the Congressional Budget Act of 1974 (31 U.S.C. 1105(d));
- detailed information on *proposed supplemental appropriations and rescission proposals* for 1991 that are transmitted for congressional consideration in this budget; and,
- information on:
  - —accounts authorized to receive, in 1992, *advance appropriations* for 1993 or beyond, as required by the Congressional Budget Act of 1974 (31 U.S.C. 1105(a)(17));
  - —accounts for which this budget requests a special type of authority in order to avoid supplemental requests late in the fiscal year to meet higher than anticipated benefit payments in excess of the specific amount appropriated for the year. This type of authority is called *advance funding authority*, i.e., authority to charge 1992 or 1993 appropriations for payments to be made late in 1991 or 1992, respectively; and,
  - —accounts for which *forward funding* exists for 1992 or is requested for 1992 in this budget. Forward funding is budget authority that is made available for obligation beginning in the last quarter of the fiscal year in which it is appropriated for the financing of ongoing grant programs during the next succeeding fiscal year.

STATEMENT OF AMENDMENTS TO AND REVISIONS IN BUDGET AUTHORITY FOR 1991

(Between the Transmittal of the 1991 and 1992 Budgets)

A statement of all amendments to or revisions in budget authority requested between transmittal of the 1991 budget and the 1992 budget is presented below. This statement is being included in the budget in accordance with the Congressional Budget Act of 1974 (31 U.S.C. 1105(d)).

The modifications to requests for 1991 budget authority that were made through the course of the past year took three forms. If the Congress had not yet acted on a pending request, the President sent amendments to the budget requests transmitted in January 1990. If appropriations had been enacted, the President proposed either supplemental budget authority or rescission of enacted appropriations.

Amendments and requests for supplemental appropriations are printed in the documents of the House of Representatives and the Senate that are identified on the following listing. The President's proposals for rescissions are included in special messages to the Congress under the Impoundment Control Act of 1974 (Public Law 93-344). Both the special messages and monthly cumulative reports on the items they cover are printed in the Federal Register. No rescission proposals were transmitted to the Congress between release of the 1991 and 1992 Budgets.

Grand total	−2,272,450,000	language

PROPOSED SUPPLEMENTAL APPROPRIATIONS

Requests for supplemental appropriations are usually made after enactment of regular appropriations. Supplemental appropriations proposed in this budget for various purposes are included below. The presentation generally includes suggested appropriation language, the related budget schedules, and narrative explanations of the requests.

DETAILS OF PROPOSED SUPPLEMENTAL APPROPRIATIONS FOR THE FISCAL YEAR ENDING SEPTEMBER 30, 1991

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated out of any money in the Treasury not otherwise appropriated to supply supplemental appropriations for the fiscal year ending September 30, 1991 and for other purposes; namely:

The Judiciary

SUPREME COURT

SALARIES AND EXPENSES

(Supplemental now requested, existing legislation)

For an additional amount for "Salaries and expenses", $54,000.

Program and Financing (in thousands of dollars)

Identification code 10-0100-1-1-752	1990 actual	1991 est.	1992 est.
Program by activities:			
10.0001 Total obligations		54	

Program and Financing (in thousands of dollars)—Continued

Identification code 10-0100-1-1-752	1990 actual	1991 est.	1992 est.
Financing:			
40.0001 **Budget authority (appropriation)**		**54**	
Relation of obligations to outlays:			
71.00 Total obligations		54	
90.00 Outlays		54	

This supplemental request would provide funds to cover the January 1991 pay increase for the justices and increased Medicare contributions.

Object Classification (in thousands of dollars)

Identification code 10-0100-1-1-752	1990 actual	1991 est.	1992 est.
Personnel compensation:			
11.1 Full-time permanent		43	
12.1 Personnel benefits		11	
99.9 Total obligations		54	

UNITED STATES COURT OF APPEALS FOR THE FEDERAL CIRCUIT

SALARIES AND EXPENSES

(Supplemental now requested, existing legislation)

For an additional amount for "Salaries and expenses", $51,000.

Program and Financing (in thousands of dollars)

Identification code 10-0510-1-1-752	1990 actual	1991 est.	1992 est.
Program by activities:			
10.00 Total obligations		51	
Financing:			
40.00 **Budget authority (appropriation)**		**51**	
Relation of obligations to outlays:			
71.00 Total obligations		51	
90.00 Outlays		51	

This supplemental request would provide funds to cover the January 1991 pay increase for the judges and increased Medicare contributions.

Object Classification (in thousands of dollars)

Identification code 10-0510-1-1-752	1990 actual	1991 est.	1992 est.
Personnel compensation:			
11.1 Full-time permanent		41	
12.1 Personnel benefits		10	
99.9 Total obligations		51	

UNITED STATES COURT OF INTERNATIONAL TRADE

SALARIES AND EXPENSES

(Supplemental now requested, existing legislation)

For an additional amount for "Salaries and expenses", $36,000.

Program and Financing (in thousands of dollars)

Identification code 10-0400-1-1-752	1990 actual	1991 est.	1992 est.
Program by activities:			
10.00 Total obligations		36	
Financing:			
40.00 **Budget authority (appropriation)**		**36**	
Relation of obligations to outlays:			
71.00 Total obligations		36	
90.00 Outlays		36	

This supplemental request would provide funds to cover the January 1991 pay increase for the judges and increased Medicare contributions.

Object Classification (in thousands of dollars)

Identification code 10-0400-1-1-752	1990 actual	1991 est.	1992 est.
Personnel compensation:			
11.1 Full-time permanent		29	
12.1 Personnel benefits		7	
99.9 Total obligations		36	

COURTS OF APPEALS, DISTRICT COURTS, AND OTHER JUDICIAL SERVICES

SALARIES AND EXPENSES

(Supplemental now requested, existing legislation)

For an additional amount for "Salaries and expenses", $69,520,000, of which $48,520,000 shall remain available until expended.

Program and Financing (in thousands of dollars)

Identification code 10-0920-1-1-752	1990 actual	1991 est.	1992 est.
Program by activities:			
00.01 Court automation support			
00.02 Salaries of judges		6,484	
00.03 Salaries of supporting personnel		11,880	
00.04 Expenses of operation and maintenance of the courts		5,157	6,605
00.05 Space and facilities		8,881	24,206
10.00 Total obligations		32,402	30,811
Financing:			
21.40 Unobligated balance available, start of year			−37,118
24.40 Unobligated balance available, end of year		37,118	6,307
40.00 **Budget Authority (appropriation)**		69,520	
Relation of obligations to outlays:			
71.00 Total obligations		32,402	30,811
72.40 Obligated balance, start of year			5,847
74.40 Obligated balance, end of year		−5,847	−13,258
90.00 Outlays		26,555	23,400

This proposal would provide the resources necessary for the January 1991 pay increase for judges, the increase in Medicare benefits, and the Judicial Improvements Act of 1990, Public Law 101-650.

Object Classification (in thousands of dollars)

Identification code 10-0920-1-1-752	1990 actual	1991 est.	1992 est.
11.1 Personnel compensation: Full-time permanent		14,549	
12.1 Personnel benefits		3,812	
21.0 Travel and transportation of persons		189	
23.1 Rental payments to GSA		525	
23.3 Communications, utilities, and other charges		113	
24.0 Printing and reproduction		21	
25.0 Other services		9,025	22,225
26.0 Supplies and materials		102	
31.0 Equipment		4,066	8,586
99.9 Total obligations		32,402	30,811

Personnel Summary

	1990 actual	1991 est.	1992 est.
Total number of full-time permanent positions		329	
Total compensable workyears: Full-time equivalent employment		99	

FEES OF JURORS AND COMMISSIONERS

(Supplemental now requested, existing legislation)

For an additional amount for "Fees of jurors and commissioners", $5,600,000, to remain available until expended.

Program and Financing (in thousands of dollars)

Identification code 10-0925-1-1-752	1990 actual	1991 est.	1992 est.
Program by activities:			
00.30 Grand jurors		1,200	
00.04 Petit jurors		4,400	
10.00 Total obligations (object class 11.8)		5,600	
Financing:			
40.00 **Budget authority (appropriation)**		**5,600**	
Relation of obligations to outlays:			
71.00 Total obligations		5,600	
72.40 Obligated balance, start of year			2,697
74.40 Obligated balance, end of year		−2,697	
90.00 Outlays		2,903	2,697

This supplemental request would provide for the increase in the daily rate paid to jurors, in accordance with Public Law 101-650.

COURT SECURITY

(Supplemental now requested, existing legislation)

For an additional amount for "Court security", $530,000.

Program and Financing (in thousands of dollars)

Identification code 10-0930-1-1-752	1990 actual	1991 est.	1992 est.
Program by activities:			
10.00 Total obligations		530	
Financing:			
40.00 **Budget authority (appropriation)**		**530**	
Relation of obligations to outlays:			
71.00 Total obligations		530	
72.40 Obligated balance, start of year			167
74.40 Obligated balance, end of year		−167	
90.00 Outlays		363	167

This supplemental request would provide necessary funding for the court security officers required as a result of the Federal Judgeship Act of 1990 (Public Law 101-650).

Object Classification (in thousands of dollars)

Identification code 10-0930-1-1-752	1990 actual	1991 est.	1992 est.
23.1 Rental payments to GSA		5	
25.0 Other services		225

Funds Appropriated to the President

TITLE I—GENERAL PROVISIONS

(General provision language now requested, existing legislation)

CANCELLATION OF SEQUESTER AND REDUCTION OF APPROPRIATION

SEC. 599L. (a) Upon the enactment of this Act, the order issued by the President on November 9, 1990, pursuant to sections 251 and 254 of the Balanced Budget and Emergency Deficit Control Act of 1985, is hereby rescinded. Any action taken to implement such order shall be reversed, and any sequestrable resource that has been reduced or sequestered by such order is hereby restored, revived, or released and shall be available to the same extent and for the same purpose as if the order had not been issued.

(b) Title III of the Foreign Operations, Export Financing, and Related Programs Appropriations Act for fiscal year 1991 (Public Law 101-513) is amended in the paragraph headed "Foreign Military Financing Program" by striking "$4,663,420,800" and inserting in its place "$4,259,920,800".

This proposal would restore amounts sequestered by the November 9, 1990 sequester order and correct a technical error in the Foreign Military Financing Program language in Public Law 101-513. The effect of this proposal is reflected in the schedules of the affected accounts in the 1992 Budget.

Department of Agriculture

AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE

Salaries and Expenses (Including transfers of funds)

(Supplemental now requested, existing legislation)

For an additional amount for "Salaries and expenses", $86,900,000, to be derived by transfer from the Commodity Credit Corporation fund: Provided, That this amount shall be offset by a $86,900,000 decrease in working capital expenditures of the Commodity Credit Corporation, as reflected in the budget estimates of the Corporation.

Program and financing (In thousands of dollars)

Identification code 12-3300-1-1-351		1990 actual	1991 est.	1992 est.
	Program activities			
00.01	Program formulation and appraisal		3,215	
00.02	Operation of supply adjustment, conservation, and price support programs		74,734	
00.03	Inventory management and merchandising		8,951	
10.00	Total obligations		86,900	
	Financing:			
68.00	**Budget authority (gross): Spending authority from offsetting collections**		86,900	
	Relation of obligation to outlays:			
71.00	Total obligations		86,900	
87.00	Outlays (gross)		86,900	
	Adjustments to budget authority and outlays:			
	Offsetting collections from:			
	Federal Funds:			
88.00	Commodity Credit Corporation Fund		−86,900	
90.00	Outlays (net)			

Object Classification (in thousands of dollars)

Identification code 12-3300-1-1-351		1990 actual	1991 est.	1992 est.
	Personnel compensation:			
11.1	Full-time permanent		15,968	
11.3	Other than full-time permanent		987	
11.5	Other personnel compensation		625	
11.9	Total personnel compensation		17,580	
12.1	Civilian personnel benefits		3,404	
41.0	Grants, subsidies, and contributions		65,916	
99.0	Total Obligations		86,900	

This supplemental request would provide additional transfer authority from the Commodity Credit Corporation to cover increased Agricultural Stabilization and Conservation Service (ASCS) administrative costs in 1991, eliminating the possibility of furloughs for both Federal and county offices. These costs increases are a result of increased workload in ASCS county offices due to implementing the Food, Agriculture, Conservation, and Trade Act of 1990. This request would also cover additional operating expenses for existing programs of the Agency in 1991.

Personnel Summary

Total compensable workyears:			
Full-time equivalent employment		498	
Full time equivalent of overtime and holiday hours		9	

Commodity Credit Corporation

(Appropriations language now requested, existing legislation)

Section 634 of the Rural Development, Agriculture, and Related Agencies Appropriations Act of 1991, Public Law 101-506, is hereby repealed.

This proposed appropriations language would eliminate appropriations act language that effectively limits to $425 million the amount of Commodity Credit Corporation commodity certificates that can be awarded as Export Enhancement Program (EEP) bonuses during fiscal 1991. The EEP enables the United States to challenge the unfair trading practices of competitor exporting countries and encourages trade negotiations to achieve fundamental reforms in world agricultural policies and trading practices.

During the first quarter of 1991, over 50 percent of the EEP bonuses permitted under the appropriations act limitation had already been awarded. Given world supply/demand conditions for a number of commodities, particularly wheat, the $425 million level for EEP bonuses will be insufficient to meet total program requirements during the remainder of the fiscal year. Current estimates of spending on EEP bonuses support the $900 million requested in the President's 1991 Budget. Enactment of the proposed appropriation language will maximize U.S. exports, support farm prices and income, and further U.S. trade policy objectives.

ANIMAL AND PLANT HEALTH INSPECTION SERVICE

Salaries and Expenses

(Supplemental now requested, existing legislation)

For an additional amount for "Salaries and expenses", (Including Transfer of funds), not to exceed $13,000,000, to be derived from the Agricultural Quarantine Inspection User Fee account, to be available to carry out inspection, quarantine, and regulatory activities.

Program and Financing

Identification code 05-79-1600-1-1-352		1990	1991	1992

	Relation of obligations to outlays:			
71.00	Total obligations		13,000	—
90.00	Outlays		13,000	—

The Animal and Plant Health Inspection Service (APHIS) plans to begin collecting user fees for the Agricultural Quarantine Inspection (AQI) Service on April 1, 1991. Prior to the authorization of the AQI fee, APHIS collected reimbursable overtime fees for AQI services. These overtime fees would now become part of the AQI fee. This proposed language would allow APHIS access to the AQI account from Treasury.

Relations of obligations to outlays:			
71.00 Total obligations	....	200,000	....
90.00 Outlays	....	200,000	....

This proposal would give the Department of Agriculture indefinite spending authority beyond the 1991 appropriation if such spending amounts were necessary to sustain benefits through the end of the fiscal year. Current estimates indicate $200 million in new spending authority may be necessary to pay full benefits. Due to the uncertainty of participation estimates, as much as $1.5 billion may be required.

Department of Education

OFFICE OF POSTSECONDARY EDUCATION

STUDENT FINANCIAL ASSISTANCE

(Appropriations language now requested, existing legislation)

Notwithstanding section 411(g) of the Higher Education Act of 1965, as amended, if the funds for awards made in accordance with subpart 1 of part A of Title IV of such Act that were appropriated for Pell Grant awards under this heading in the Department of Education Appropriations Act, 1991, after such funds are first used to meet unfinanced costs in the 1990–91 award year, are insufficient to satisfy fully all Pell Grant awards as calculated under section 411(b) of the Higher Education Act of 1965, the Secretary shall determine the amount to be paid to each eligible student based on a formula in which all awards for the 1991–92 award year are reduced by a uniform amount established by the Secretary.

This proposed language would allow the Secretary of Education to reduce all Pell Grant awards for the 1991–92 award year so that appropriated funds would be adequate to finance the program under current estimates. Estimated program costs for 1991–92 reveal an estimated shortfall ranging from $36 to $129 million. The corresponding uniform dollar reduction would range from $11 to $38 per Pell Grant recipient.

Prompt congressional action is requested. If the proposed language is not enacted, the needed funds would be made available from the appropriation for the 1992–93 award year, generating outlays in 1992 equal to the shortfall amount.

Department of Energy

ATOMIC ENERGY DEFENSE ACTIVITIES

Atomic Energy Defense Activities

(Supplemental now requested, existing legislation)

For an additional amount for "Atomic energy defense activities", $623,000,000, to remain available until expended.

Program and Financing (in thousands of dollars)

Identification code 89-0220-1-1-053	1990 actual	1991 est.	1992 est.
Program by activities:			
00.01 Defense programs		283,000	
00.02 Environmental restoration and waste management		340,000	
10.00 Total, obligations (object class 25.0)		623,000	
Financing:			
40.00 **Budget authority (appropriation)**		**623,000**	
Relations of obligations to outlays:			
71.00 Total obligations		623,000	
72.40 Obligated balance, start of year			464,942
74.40 Obligated balance, end of year		−464,942	−180,578
90.00 Outlays		158,058	284,364

Defense Programs.—The additional funding is needed to speed resumption of plutonium operations at the Rocky Flats Plant. The funding would be used to improve safety documentation, operating procedures, training, facility maintenance, safeguards and security, environmental monitoring, and management systems.

Environmental Restoration and Waste Management.—Additional funding is needed to initiate activities that are necessary to meet schedules in Environmental Compliance Agreements between the Department of Energy, various States and the Environmental Protection Agency.

Department of Health and Human Services

SOCIAL SECURITY ADMINISTRATION

Supplemental Security Income Program

(Supplemental now requested, existing legislation)

For an additional amount for the Supplemental Security Income Program, *for payment to the Social Security trust funds for administrative expenses to reconsider application from the eligible class in Zebley v. Sullivan*, $232,000,000, to remain available until September 30, 1993.

Program and Financing (in thousands of dollars)

Identification code 75-0406-1-1-609	1990 actual	1991 est.	1992 est.
Program by activities:			
10.00 Payment to trust funds (object class 25.0)		94,230	122,110
Financing:

24.40 Unobligated balance available, end of year		137,770	15,660
40.00 **Budget authority (appropriation)**		**232,000**	
Relations of obligations to outlays			
71.00 Total obligations		94,230	122,110
90.00 Outlays		94,230	122,110

This supplemental request would provide additional funds to reimburse the Social Security trust funds for the Supplemental Security Income program's share of the Social Security Administration's administrative costs as reflected in the supplemental request for the Limitation on Administrative Expenses.

Limitation on Administrative Expenses

(Supplemental now requested, existing legislation)

For an additional amount for "Salaries and expenses", *for administrative expenses to reconsider applications from the eligible class in Zebley v. Sullivan*, $232,000,000, to remain available until September 30, 1993.

Program and Financing (in thousands of dollars)

Identification code 20-8007-1-7-651	1990 actual	1991 est.	1992 est.
Program by activities:			
Direct program:			
Supplemental security income (Total obligations) (object class 25.0)		94,230	122,110
Financing:			
Unobligated balance available, start of year			−137,770
Unobligated balance available, end of year		137,770	15,660
Limitation		**232,000**	
Relations of obligations to outlays:			
Total obligations		94,230	122,110
Outlays from limitation		94,230	122,110

This request provides additional funds for costs related to the *Zebley v. Sullivan* Supreme Court decision during 1991 through 1993.

Department of Housing and Urban Development

HOUSING PROGRAMS

Annual Contributions for Assisted Housing

(TRANSFER AUTHORITY NOW REQUESTED, EXISTING LEGISLATION)

Program and Financing (in thousands of dollars)

Identification code 86-0164-1-1-604	1990 actual	1991 est.	1992 est.
Program by activities:			
10.00 Lower Income Housing (Section 8) (object class 41.00)		−77,907	−77,90
Financing:			
21.49 Unobligated balance, start of year: Administrative commitments			77,90
24.49 Unobligated balance, end of year: Administrative commitments		−77,908	
39.00 **Budget authority**		**−155,815**	
Budget authority:			
41.00 Transferred to other accounts		−155,815	
43.00 **Budget authority (Adjusted)**		**−155,815**	
Relation of obligations to outlays:			
71.00 Total obligations		−77,907	−77,90
72.40 Obligated balance, start of year			−68,64
74.40 Obligated balance, end of year		68,643	127,30
90.00 Outlays		−9,264	−19,16
Status of Administrative Commitments:			
Program by activities:			
Lower Income Housing (Section 8)		−155,815	
Administrative commitments, start of year			−77,90
Administrative commitments, end of year		77,908	
Total obligations		−77,907	−77,90

This schedule reflects the transfer of $155.8 million from the Annual Contributions for Assisted Housing account to the Assistance for the Renewal of Section 8 Subsidy Contracts account. These funds would be transferred from the unobligated balances available for Section 202 category of the Annual Contributions account.

ASSISTANCE FOR THE RENEWAL OF EXPIRING SECTION 8 SUBSIDY CONTRACTS

(Transfer authority now requested; existing legislation)

For an additional amount for "Assistance for the Renewal of Expiring Section 8 Subsidy Contracts", $155,814,600, to remain available until expended and to be derived by transfer from those unobligated balances of the "Annual Contributions for Assisted Housing" for projects to be developed for the elderly under Section 202 of the United States Housing Act of 1959. Provided, That the $7,734,985,400 provided for use in connection with section 8 expiring contracts in the Departments of Veteran Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act, 1991 (Pub. L. 101-507), is increased by the foregoing transfer to $7,890,800,000, of which $4,234,500,000 shall be for existing certificates, $671,300,000 shall be for housing vouchers, and $2,985,000,000 shall be for loan management and other project-based section 8 contracts.

Program and Financing (in thousands of dollars)

Identification code 86-0194-1-1-604	1990 actual	1991 est.	1992 est.
Program by activities:			
10.00 Total obligations (object class 41.00)	....	77,907	77,908
Financing:

Administrative commitments, start of year	....	....	77,908
Administrative commitments, end of year	....	−77,908	....
Total obligations	....	77,907	77,908

This proposal would transfer $155.8 million from the Annual Contributions account to the Assistance for the Renewal of Section 8 Subsidy Contracts account. The latest Departmental estimates indicate a need for the additional funds for contracts expected to require funding during 1991.

HOMEOWNERSHIP AND OPPORTUNITY FOR PEOPLE EVERYWHERE GRANTS (HOPE GRANTS)

(Supplemental now requested, existing legislation)

For the Homeownership and Opportunity for People Everywhere Programs, as authorized under Title III of the United States Housing Act of 1937, and subtitles B and C of Title IV of the Cranston-Gonzalez National Affordable Housing Act (Public Law 101-625), and the Hope for Elderly Independence demonstration program as authorized under section 803(k) of such Act, $165,000,000, to remain available until expended.

Program and Financing (in thousands of dollars)

Identification code 86-0196-1-1-604	1990 actual	1991 est.	1992 est.
Program by activities:			
00.01 Homeownership grants	....	155,000	....
00.02 Elderly independence grants	....	10,000	....
10.00 Total obligations (object class 41.00)	....	165,000	....
Financing:			
40.00 **Budget authority**	....	**165,000**	....
Relation of obligations to outlays:			
71.00 Obligations incurred, net	....	165,000	....
72.40 Obligated balance, start of year	....	....	165,000
74.40 Obligated balance, end of year	....	−165,000	−123,750
90.00 Outlays	....	....	41,250

This request would provide $165 million to fund the Homeownership and Opportunity for People Everywhere Grants (HOPE) Program. This is the full amount authorized for the HOPE grants program and for the services component of the HOPE for Elderly Independence demonstration program for 1991.

Legislation was enacted in 1990 for the HOPE Grants and Elderly Independence programs. The grants will be awarded through a nationwide competition and would be matched by the recipients. The homeownership grants would be used in Public Housing and distressed government-held multifamily and single family housing to provide homeownership opportunities for low-income families. The Elderly Independence grants would be coupled with vouchers funded under Annual Contributions to provide services for independent living.

CONGREGATE SERVICES PROGRAM

(Appropriations language now requested, existing legislation)

Effective October 1, 1991, the obligated but unexpended balances of the Congregate Services program (account symbol 86/0178) shall be added to and merged with the Revolving Fund (liquidating programs) established pursuant to title II of the Independent Offices Appropriation Act, 1955, as amended (12 U.S.C. 1701g–5).

This appropriations language would authorize the transfer of obligated but unexpended balances of the Congregate Services program to the Revolving Fund liquidating programs in 1991. As part of the HOPE initiative, the budget proposes a new approach to providing congregate services for the frail elderly. This supplemental coupled with a rescission of the 1991 appropriation to fund the cost of implementing the new HOPE Grants and HOME Investment Partnerships programs in 1991, would allow the changeover to the new HOPE for Elderly Independence demonstration program by terminating Congregate Services by 1992 (See Chapter XIII.A, "Detailed Budget Estimates" by Agency, for additional information.)

SECTION 8 MODERATE REHABILITATION, SINGLE ROOM OCCUPANCY

(Transfer authority now requested, existing legislation)

Program and Financing (in thousands of dollars)

Identification code 86-0195-1-1-604	1990 actual	1991 est.	1992 est.
Program by activities:			
10.00 Total obligations (object class 41.00)	....	....	−24,000

Program and Financing (in thousands of dollars)—Continued

Identification code 86-0195-1-1-604	1990 actual	1991 est.	1992 est.
Financing:			
21.49 Unobligated balance, start of year: Administrative commitments			24,000
24.49 Unobligated balance, end of year: Administrative commitments		−24,000	
39.00 **Budget authority (appropriation)**		**−24,000**	
Budget authority:			
42.00 Transferred to other accounts		−24,000	
43.00 Appropriation (Adjusted)		−24,000	
Relation of obligations to outlays:			
71.00 Total obligations			−24,000
74.40 Obligated balance, end of year			22,800
Outlays			−1,200
Statute of Administrative commitments:			
Program by activities:			
SRO Reservations		−24,000	
Administrative commitments, start of year			−24,000
Administrative reservations, end of year		24,000	
Total obligations			−24,000

This schedule reflects the transfer from the Moderate Rehabilitation (Single Room Occupancy) program account to the newly proposed Shelter Plus Single Room Occupancy program account.

* * *

Shelter Plus Care: Section 8 Moderate Rehabilitation, Single Room Occupancy

(Transfer Authority now requested, existing legislation)

For the Shelter Plus Care: Section 8 moderate rehabilitation, single room occupancy program, as authorized under subtitle F, part III, of title IV of the Stewart B. McKinney Homeless Assistance Act (Public Law 100–77), as amended, $24,000,000, to be derived by transfer from the Section 8 moderate rehabilitation single room occupancy program, to remain available until expended.

Program and Financing (in thousands of dollars)

Identification code 86-0207-1-1-604	1990 actual	1991 est.	1992 est.
Program by activities:			
10.00 Total obligations (object class 41.00)			24,000
Financing:			
21.49 Unobligated balance, start of year: Administrative commitments			−24,000
24.49 Unobligated balance, end of year: Administrative commitments		24,000	
39.00 **Budget authority**		**24,000**	
Budget authority:			
42.00 Transferred from other accounts		24,000	
43.00 **Appropriation (adjusted)**		**24,000**	
Relation of obligations to outlays:			
71.00 Total obligations incurred, net			24,000
72.40 Obligated balance, start of year			
74.40 Obligated balance, end of year			−22,800
Outlays			1,200
Status of Administrative Commitments:			
Program by activities:			
SRO Reservations		24,000	
Administrative commitments, start of year			24,000
Administrative reservations, end of year		−24,000	
Total obligations			24,000

This supplemental request would transfer $24 million from the Section 8 Moderate Rehabilitation (Single Room Occupancy) program account to the newly enacted Shelter Plus Care: Section 8 Moderate Rehabilitation Single Room Occupancy program account.

* * *

Shelter Plus Care: Section 202 Rental Assistance

(Supplemental now requested, existing legislation)

For the Shelter Plus Care: Section 202 rental assistance program, as authorized under subtitle F, part IV, of title IV of the Stewart B. McKinney Homeless Assistance Act (Public Law 100–77), as amended, $18,000,000, to remain available until expended.

Program and Financing (in thousands of dollars)

Identification code 86-0208-1-1-604	1990 actual	1991 est.	1992 est.
Program by activities:			
10.00 Total obligations (object class 41.00)		18,000	
Financing:			
40.00 **Budget authority (appropriation)**		**18,000**	
Relation of obligations to outlays:			
71.00 Total obligations		18,000	
72.40 Obligated balance, start of year			16,2
74.40 Obligated balance, end of year		−16,200	−13,1
90.00 Outlays		1,800	3,0

This supplemental appropriation would provide for leased housing for the handicapped portion of the Shelter Plus Care program as authorized by the Stewart B. McKinney Homeless Assistance Act, as amended by the Cranston-Gonzalez National Affordable Housing Act (Public Law 101–625). This funding is expected to assist approximately 500 handicapped individuals in the form of vouchers to help them find housing that meets their special needs.

* * *

COMMUNITY PLANNING AND DEVELOPMENT

HOME Investment Partnerships Program

(Supplemental now requested, existing legislation)

For the HOME investment partnerships program, as authorized under title II of the Cranston-Gonzalez National Affordable Housing Act (Public Law 101–625), $500,000,000, to remain available until expended: Provided, That for the purposes of the foregoing amount such Act shall be construed as providing the following: in section 216(3)(A), "$750,000" both places it appears shall be "$375,000"; in section 217(b)(2)(A), "$3,000,000" both places it appears shall be "$750,000"; in section 217(b)(2)(B), "$500,000" both places it appears shall be "$125,000"; and in section 217(b)(3), "$500,000" shall be "$250,000".

Program and Financing (in thousands of dollars)

Identification code 86-0205-1-1-604	1990 actual	1991 est.	1992 est.
Program by activities:			
10.00 Total obligations (object class 41.0)		500,000	
Financing:			
40.00 **Budget authority (appropriation)**		**500,000**	
Relation of obligations to outlays:			
71.00 Total obligations		500,000	
72.40 Obligated balance, start of year			462,9
74.40 Obligated balance, end of year		−490,000	−405,0
90.00 Outlays		10,000	85,0

This proposal would provide the initial funding to implement the new HOME Investment Partnerships program au-orized by title II of the Cranston-Gonzalez National Afford- ble Housing Act (Public Law 101-625).

Shelter Plus Care: Homeless Rental Housing Assistance Program

(Supplemental now requested, existing legislation)

For the Shelter Plus Care: Homeless Rental Housing Assistance program, as authorized under subtitle F, part II of title IV of the Stewart B. McKinney Homeless Assistance Act (Public Law 100-77), as amended, $80,000,000, to remain available until expended.

Program and Financing (in thousands of dollars)

code 86-0204-1-1-604	1990 actual	1991 est.	1992 est.
Program by activities:			
Total obligations (object class 41.0)		80,000	
Financing:			
Budget authority (appropriation)		**80,000**	
Relation of obligations to outlays:			
Total obligations		80,000	
Obligated balance, start of year			70,400
Obligated balance, end of year		-70,400	-50,400
Outlays		9,600	20,000

This proposal would provide the initial funding for the new Homeless Rental Housing Assistance program, which is a component of Shelter Plus Care. The program is authorized by title IV (subtitle F, part II) of the Stewart B. McKinney Homeless Assistance Act (Public Law 101-77), as amended by section 837 of the Cranston-Gonzalez National Affordable Housing Act (Public Law 101-625). In addition, $11.3 million appropriated in 1991 for the Supplemental Assistance for Facilities to Assist the Homeless program is being transferred to the Homeless Rental Housing Assistance program pursuant to section 837(c) of Public Law 101-625.

Rehabilitation Loan Fund

(Appropriation language now requested, existing legislation)

Notwithstanding section 289(c) of the Cranston-Gonzalez National Affordable Housing Act (Public Law 101-625), the assets and liabilities of the revolving fund established by section 312 of the Housing Act of 1964, as amended (42 U.S.C. 1452b), and any collections, including repayments or recaptured amounts, of such fund, shall be transferred to and merged with the Revolving Fund (liquidating programs), established pursuant to title II of the Independent Offices Appropriation Act, 1955, as amended (12 U.S.C. 1701g-5), effective October 1, 1991.

This language, which would authorize the transfer of the Rehabilitation Loan Fund to the Revolving Fund (liquidating programs), is necessary in order for the Department to pay operating costs associated with the servicing of previously approved section 312 loans. The Department is also authorized to pay dividends to the Treasury with excess amounts accumulating within the Revolving Fund (liquidating programs).

Pursuant to section 289(a) of the National Affordable Housing Act (Public Law 101-625), no new loans may be made after October 1, 1991. In addition, the Budget proposes a rescission of an estimated $135 million of unobligated balances, within the Rehabilitation Loan Fund, to offset partially the cost of implementing the new HOPE Grants and Home Investment Partnerships programs in 1991. (See "Rescission Proposals" later in this chapter for additional information.)

Rental Rehabilitation Grants

(Appropriations language now requested, existing legislation)

Notwithstanding section 289(c) of the Cranston-Gonzalez National Affordable Housing Act (Public Law 101-625), the unexpended balances of the Rental Rehabilitation Grants program (account symbols 86/0182 and 86/0164), and any amounts recaptured under account symbol 86/0182 for such program, shall be added to and merged with the Revolving Fund (liquidating programs), established pursuant to title II of the Independent Offices Appropriation Act, 1955, as amended (12 U.S.C. 1701g-5), effective October 1, 1991.

This language would authorize the transfer of unexpended balances and recaptures of the Rental Rehabilitation Grants program account symbols 86/0182 and 86/0164 to the Revolving Fund (liquidating programs). The transfer is necessary to permit the Department to continue funding the program's Cash and Management Information System and to complete the remaining financial activities of the program.

Pursuant to section 289(a) of the National Affordable Housing Act (Public Law 101-625), no new grants may be made after October 1, 1991. In addition, the Budget proposes a rescission of $70 million appropriated for fiscal year 1991, to the Rental Rehabilitation Grants account, to offset partially the cost of implementing the new HOPE Grants and Home Investment Partnerships programs in 1991. (See "Rescission Proposals" later in this chapter.)

MANAGEMENT AND ADMINISTRATION

Administrative Provisions

(Administrative Provisions language now requested, existing legislation)

Administration of the HOME Program

Section 204 of the Cranston-Gonzalez National Affordable Housing Act (Public Law 101-625) is amended by deleting "through the Office of the Assistant Secretary for Housing-FHA Commissioner of the Department of Housing and Urban Development,".

This language would leave to the Secretary's discretion the selection of the office within the Department of Housing and Urban Development that would bear primary responsibility for administration of the HOME program.

Implementation of the HOME Program in Fiscal Year 1991 *With Interim Regulations*

Section 206 of the Cranston-Gonzalez National Affordable Housing Act (Public Law 101-625) is amended to read as follows:

"Sec. 206. Regulations. Not later than 180 days after the date of enactment of this Act, the Secretary shall issue interim regulations to be effective on publication to implement the provisions of this title. The Secretary shall issue final regulations to implement the provisions of this title by October 1, 1991.".

This language would permit an earlier implementation of the HOME program, by requiring interim regulations to be issued by the end of May 1991. This would govern the program until the Department can issue final regulations.

Streamlined Certification Under the HOME Program

Section 218(d) of the Cranston-Gonzalez National Affordable Housing Act (Public Law 101-625) is amended to read as follows:

"(d) Certification.—A participating jurisdiction shall provide to the Secretary, at such times and in such form as the Secretary shall determine, certification that the jurisdiction shall use the funds made available under this title pursuant to the participating jurisdiction's approved housing strategy and in compliance with all requirements of this title.".

This language would permit the Department to streamline the grantees' certifications of compliance with the HOME program statute and their comprehensive housing affordability strategies.

Timing of Submission of Comprehensive Housing Affordability Strategy

Notwithstanding Section 216(5) of the Cranston-Gonzalez National Affordable Housing Act (Public Law 101-625), for fiscal year 1991, each jurisdiction that intends to participate under Title II of such Act shall submit to the Secretary its comprehensive housing affordability strategy in accordance with section 105 of such Act no later than 90 days after the date of publication in the Federal Register of the rule that specifies the requirements for the strategy.

This language would permit an earlier implementation of the HOME program, by requiring a prospective grantee to submit its comprehensive housing affordability strategy 90 days after the regulations governing it are promulgated, rather than a time much later in the application process.

HOME Repayments to Non-Participating Jurisdictions

Subsections (a) and (b) of section 219 of the Cranston-Gonzalez National Affordable Housing Act (Public Law 101-625) are respectively amended by deleting "reallocated in accordance with section 217(d)" and inserting in lieu thereof "retained and invested by the jurisdiction for uses eligible under section 212(a)(1)".

This language would permit jurisdictions that are no longer participating in the HOME program to retain any amounts collected over the years on HOME investments, for use in accordance with section 212(a)(1), but not subject to other HOME program requirements.

Timing Requirements on Local Match

Section 220(a) of the Cranston-Gonzalez National Affordable Housing Act (Public Law 101-625) is amended by striking out ", throughout a fiscal year,"; and by striking out "in that fiscal year" in paragraphs (1), (2), and (3), respectively.

This language would leave to the Department's discretion whether the regulations governing local match would be drafted to permit accounting by fiscal year (as is currently the case under the statute), source year (as has been the case for the Rental Rehabilitation program), or by another method.

Environmental Review Amendments

Section 288 of the Cranston-Gonzalez National Affordable Housing Act (Public Law 101-625) is amended by striking out "participating" in subsections (a), (b), and (c) thereof, and inserting in subsection (d) thereof immediately after "In the case of assistance to" the following: "units of general local government from".

Title III of the United States Housing Act of 1937 (42 U.S.C. 1437aa) is amended by adding the following new section at the end thereof:

> *"Section 310. Environmental review.—The provisions and requirements of section 288 of the Cranston-Gonzalez National Affordable Housing Act shall also apply to States and units of general local government that receive assistance under this title.".*

The Cranston-Gonzalez National Affordable Housing Act (Public Law 101-625) is amended by adding immediately after section 431 the following new section:

> *"Section 432. Environmental Review.—The provisions and requirements of section 288 of the Cranston-Gonzalez National Affordable Housing Act shall also apply to States and units of general local government that receive assistance under this subtitle.".*

The Cranston-Gonzalez National Affordable Housing Act (Public Law 101-625) is amended by adding immediately after section 448 the following new section:

> *"Section 449. Environmental review.—The provisions and requirements of section 288 of the Cranston-Gonzalez National Affordable Housing Act shall also apply to States and units of general local government that receive assistance under this subtitle.".*

This language would provide for the local assumption of the Department's environmental review responsibilities by State and local recipients of assistance under the HOPE programs, and make a technical correction in this environmental review authority for the HOME program, to make both HOME and HOPE environmental review procedures consistent with the procedures under the Community Development Block Grant and McKinney Act programs.

HOPE for Elderly Independence Demonstration Period

Section 803(a) of the Cranston-Gonzalez National Affordable Housing Act (Public Law 101-625) is amended by striking out the second sentence.

This language would delete a provision that designates a specific demonstration period of five years that starts November 29, 1990. The existing law clouds the Department's authority to fund five-year contracts for supportive services in the demonstration, to start in 1991 and 1992, in accord with section 803(h)(4).

Timing of Operating Subsidy Regulations Changes

Section 9(a)(3)(A) of the United States Housing Act of 1937 is amended in the second sentence by inserting "and" immediately after "public housing agencies and their associations," and by deleting "prior to the start of any fiscal year to which it applies, and remain in effect for the duration of any such fiscal year without change".

The proposed language permits the Department the flexibility to make changes in the performance funding system, for example, to carry out new requirements mandated by law. The Department would endeavor to make such adjustments in amounts that Public Housing Authorities (PHA) would receive to assure that the exercise of this flexibility did not result in a financial preference or prejudice for a PHA.

Department of Justice

LEGAL ACTIVITIES

Salaries and Expenses, General Legal Activities

(Transfer authority now requested, existing legislation)

For an additional amount for "Salaries and expenses, General Legal Activities", $3,180,000, *to be derived by transfer from Federal Prison System, Salaries and expenses.*

Program and Financing (in thousands of dollars)

Identification code 15-0128-1-1-752	1990 actual	1991 est.	1992 est.

99.0 Total obligations		9,203	

FEDERAL PRISON SYSTEM

SALARIES AND EXPENSES

(Transfer authority now requested, existing legislation)

Program and Financing (in thousands of dollars)

Identification code 15-1060-1-1-753	1990 actual	1991 est.	1992 est.
Program by activities:			
1. Inmate care, custody and programs		−2,982	
2. Institution administration and maintenance		−621	
3. Community Corrections		−602	
10.00 Total obligations (object class 31.0)		−4,205	
Financing:			
39.00 **Budget authority**		**−4,205**	
Budget authority:			
41.00 Transferred to other accounts		−4,205	
43.00 **Appropriation (adjusted)**		**−4,205**	
Relation of obligations to outlays:			
71.00 Total obligations incurred		−4,205	
90.00 Outlays		−4,205	

This schedule reflects the transfer of funds to offset 1991 supplemental appropriations requests for legal activities.

Department of Labor

EMPLOYMENT AND TRAINING ADMINISTRATION

STATE UNEMPLOYMENT INSURANCE AND EMPLOYMENT SERVICE OPERATIONS

(Supplemental now requested, existing legislation)

For an additional amount for "State unemployment insurance and employment service operations", $100,000,000, which shall be expended from the Employment Security Administration account in the Unemployment Trust Fund, to fund activities under Title III of the Social Security Act, as amended (42 U.S.C. 502–504).

Program and financing (in thousands of dollars)

Identification code 16-0179-1-1-999	1990 actual	1991 est.	1992 est.
Program by activities:			
10.00 Total obligations (object class 41.0)		100,000	
Financing:			
Budget authority: (gross)			
68.00 Spending authority from offseting collections		100,000	
Relation of obligations to outlays:			
71.00 Total obligations		100,000	
87.00 Outlays (gross)		100,000	
Adjustments to budget authority and outlays:			
Deductions for offsetting collections:			
88.30 Trust funds		−100,000	
88.90 Total, offsetting collections (trust funds)		−100,000	
89.00 Budget authority (net)			
90.00 Outlays (net)			

This proposal would provide an increase of $100 million in authority to spend from the Unemployment Trust Fund for Unemployment Insurance grants to the States for necessary administrative expenses. These funds would be used only to the extent necessary to administer unemployment compensation laws resulting from changes in a State law or increases in the number of unemployment insurance claims filed or increased State salary compensation. Additional funds are needed to process the increased number of claims for unemployment benefits anticipated under currently projected economic conditions.

UNEMPLOYMENT TRUST FUND

(Supplemental now requested, existing legislation)

Program and Financing (in thousands of dollars)

Identification code 20-8042-1-7-999	1990 actual	1991 est.	1992 est.
Program by activities:			
10.00 Total obligations (object class 25.0)		100,000	
Financing:			
Unobligated balance available, start of year:			
21.41 U.S. securities: par value			100,000
Unobligated balances available, end of year:			
24.41 U.S. securities (par)		−100,000	−100,000
60.05 Budget authority (appropriation) indefinite		100,000	
Relation of obligations to outlays:			
71.00 Total obligations		100,000	
90.00 Outlays		100,000	

This schedule reflects the proposed increase in the amount of trust funds to be spent for State Unemployment Insurance and Employment Service Operations that is shown above.

PENSION BENEFIT GUARANTY CORPORATION

PENSION BENEFIT GUARANTY CORPORATION FUND

(Appropriations language now requested, existing legislation)

In the appropriations language under this heading in the Department of Labor Appropriations Act, 1991, delete the word "contractual" and the words "legal and financial."

This appropriation language change would enable the Pension Benefit Guaranty Corporation to spend outside its administrative expense limitation in connection with pension plan terminations for any purpose in connection with termination of pensions. The flexibility is needed so that the Corporation may respond quickly to take pension plans over and because terminations are unpredictable.

Department of Transportation

FEDERAL HIGHWAY ADMINISTRATION

FEDERAL-AID HIGHWAYS

(Supplemental now requested, existing legislation)

Program and Financing (in thousands of dollars)

tification code 69-8083-1-7-401	1990 actual	1991 est.	1992 est.
Program by Activities:

74.49 Contract authority	....	243,000	242,514
90.00 Outlays	....	−486	−121,986

This schedule reflects the proposed changes to the General Provisions included in the Department of Transportation Appropriations Act of 1991.

U.S. COAST GUARD

RETIRED PAY

(Supplemental now requested, existing legislation)

For an additional amount for "Retired pay", $14,500,000.

Program and Financing (in thousands of dollars)

Identification code 69-0241-0-1-403	1990 actual	1991 est.	1992 est.
Program by activities:			
00.01 Regular military personnel	....	13,577	....
00.02 Former lighthouse service personnel	....	42	....
00.03 Reserve personnel	....	639	....
00.04 Survivor benefit programs	....	242	....

Program and Financing (in thousands of dollars)—Continued

Identification code 69-0241-0-1-403	1990 actual	1991 est.	1992 est.
10.00 Total obligations (object class 13.0)	....	14,500	....
Financing:			
40.00 **Budget authority (appropriation)**	....	**14,500**	....
Relation of obligations to outlays:			
71.00 Total obligations incurred, net	....	14,500	....
90.00 Outlays	....	14,500	....

This request would provide funds to cover increased costs of military retired pay. At the time of the submission of the President's 1991 Budget, Coast Guard excluded any adjustments for cost-of-living in accordance with what was then Administration policy. In accordance with the provisions of 10 U.S.C. 1401A, a proposed 5.4% cost-of-living increase for military retirees and beneficiaries that became effective January 1, 1991.

TITLE III—GENERAL PROVISIONS

(General provision language now requested, existing legislation)

In the appropriations language under this heading in the Department of Transportation and Related Agencies Appropriations Act. 1991, in sec. 310(c) delete the word "shall" after the word "Secretary"; in sec. 310(c)(1), insert the word "shall" before the word "provide"; in sec. 310(c)(2), insert the word "may" after "August 1, 1991"; and in sec. 310(c)(3), insert the word "shall" after "not distribute".

The proposed language change would give the Secretary more discretion in revising the distribution of obligation authority depending on programmatic and fiscal considerations associated with the enactment of new Federal highway legislation. Under current law, the Secretary of Transportation is required to redistribute all unused obligation authority to States that have none remaining.

SEC. 342. Section 332 of the Department of Transportation and Related Agencies Appropriations Act, 1991 is amended to add the following sentence at the end of the section: Funds appropriated by this Act may be used to initiate multiyear contracts for the Medium Range Recovery Helicopter (HH60J), and Automated Surface Observing System programs.

This language would enable the Department of Transportation to proceed with those programs where contracts were scheduled to be awarded in 1991 using 1991 funds and for which the Department did not have the opportunity to seek explicit authority in its 1991 appropriation.

Other Independent Agencies

BOARD FOR INTERNATIONAL BROADCASTING

GRANTS AND EXPENSES

(Supplemental now requested, existing legislation)

For an additional amount for "Grants and expenses", as authorized by 22 U.S.C. 2877, $8,000,000, to remain available until expended.

Program and Financing (in thousands of dollars)

Identification code 95-1145-1-1-154	1990 actual	1991 est.	1992 est.
Program by activities:			
10.00 Total obligations (object class 41.0)	....	8,000	....

Program and Financing (in thousands of dollars)—Continued

Identification code 95-1145-1-1-154	1990 actual	1991 est.	1992 est.
Financing:			
40.00 **Budget authority (appropriation)**		**8,000**	
Relation of obligations to outlays:			
71.00 Obligations incurred, net		8,000	
90.00 Outlays		8,000	

This supplemental proposal would provide funds for grants to Radio Free Europe/Radio Liberty to offset partially the recent depreciation in the value of the dollar.

RESCISSION PROPOSALS

Under the provisions of the Impoundment Control Act of 1974 (Public Law 93-344), whenever the President proposes rescission of enacted appropriations, a special message must be sent to the Congress giving details of the proposals. Included below are related budget schedules, references to the special message being sent to the Congress, and narrative explanations of the proposals.

Department of Agriculture

SOIL CONSERVATION SERVICE

WATERSHED AND FLOOD PREVENTION OPERATIONS

(Rescission proposal)

Program and Financing (in thousands of dollars)

Identification code 12-1072-5-1-301	1990 actual	1991 est.	1992 est.
Program by Activities:			
Direct program:			
10.00 Small watershed operations authorized by PL-566 (Total obligations)		−10,000	
Financing:			
40.00 **Budget authority (appropriation) (rescission proposal R91-16)**		**−10,000**	
Relation of obligations to outlays:			
71.00 Total obligations		−10,000

The Department of Defense will propose rescissions for in-estment programs that cannot be afforded within the defense iscretionary totals of the Budget Summit Agreement.

Department of Housing and Urban Development

HOUSING PROGRAMS

Annual Contribution for Assisted Housing

(Rescission Proposal)

Program and Financing (in thousands of dollars)

	code 86-0164-5-1-999	1990 actual	1991 est.	1992 est.
	Program by activities:			
10.00	Public and indian housing (object class 41.0)			−500,000
	Financing:			
21.40	Unobligated balance available, start of year			500,000
24.40	Unobligated balance available, end of year		−500,000	
40.36	**Budget authority (appropriation rescission proposal R91-20)**		**−500,000**	
	Relation of obligations to outlays:			
71.00	Total obligations			−500,000
72.40	Obligated balance, start of year			
74.40	Obligated balance, end of year			460,000
90.00	Outlays			−40,000

This proposal would rescind $500 million of the amount appropriated in fiscal year 1991 for public housing development. This rescission request is made to offset partially the cost of implementing the new HOPE Grants and HOME Investment Partnerships programs in 1991.

Congregate Services Program

(Rescission proposal)

Program and Financing (in thousands of dollars)

	Identification code 86-0178-5-1-604	1990 actual	1991 est.	1992 est.
	Program by activities:			
10.00	Total obligations (object class 41.0)		−9,500	
	Financing:			
40.30	**Budget authority (appropriation) (rescission proposal R91-21)**		**−9,500**	

Program and Financing (in thousands of dollars)—Continued

	Identification code 86-0178-5-1-604	1990 actual	1991 est.	1992 est.
	Relation of obligations to outlays:			
71.00	Total Obligations		−9,500	
72.40	Obligated balance, start of year			−9,500
74.40	Obligated balance, end of year		9,500	−2,354
90.00	Outlays			−7,146

This rescission proposal would offset the supplemental funding request for HOPE and HOME programs. For fiscal year 1992 and beyond, the budget proposes a new HOPE for Elderly Independence demonstration program to replace congregate services. The new program would provide frail elderly residents with special housing vouchers that subsidize both housing and service costs.

Nehemiah Housing Opportunity Grants

(Rescission proposal)

Program and Financing (in thousands of dollars)

	Identification code 86-4071-5-1-604	1990 actual	1991 est.	1992 est.
	Program by activities:			
10.00	Total obligations (object class 41.00)			−39,112
	Financing:			
21.40	Unobligated balance available, start of year			39,112
22.40	Unobligated balance transferred, net		−39,112	
24.40	Unobligated balance available, end of year			
39.00	**Budget authority**		**−39,112**	
	Budget authority:			
40.31	**Appropriation rescission proposal R91-22)** (unobligated balance)		**−39,112**	
	Relation of obligations to outlays:			
71.00	Obligations incurred, net			−39,112
72.40	Obligated balance, start of year			
74.40	Obligated balance, end of year			39,112
90.00	Outlays			

The Nehemiah grants program was authorized by the Housing and Community Development Act of 1987 and funded in 1989, 1990 and 1991 under the Annual Contributions for Assisted Housing account. This proposed rescission produces savings to fund HOME and HOPE in 1991. Nehemiah-type activities are eligible under HOME and HOPE.

COMMUNITY PLANNING AND DEVELOPMENT

Urban Development Action Grants

(Rescission proposal)

Program and Financing (in thousands of dollars)

	Identification code 86-0170-5-1-451	1990 actual	1991 est.	1992 est.
	Program by Activities:			
10.00	Total obligations (object class 41.0)		−13,518	
	Financing:			
40.31	**Budget authority (appropriation rescission proposal R91-23) (unobligated balance)**		**−13,518**	
	Relation of obligations to outlays:			
71.00	Total obligations		−13,518	
72.40	Obligated balance, start of year			−13,518
74.40	Obligated balance, end of year		13,518	10,818
90.00	Outlays			−2,700

This rescission proposal reflects the termination of the Urban Development Action Grants program. The rescission includes an estimated $10 million in projected recaptures of unobligated budget authority in 1992 and $3.5 million in unobligated balances available at the end of 1990.

RENTAL REHABILITATION GRANTS

(Rescission proposal)

Program and Financing (in thousands of dollars)

Identification code 86-0182-5-1-451		1990 actual	1991 est.	1992 est.
	Program by activities:			
10.00	Total obligations (object class 41.0)	....	−70,000	....
	Financing:			
40.00	**Budget authority (appropriation: rescission proposal R91-24)**	....	**−70,000**	....
	Relation of obligations to outlays:			
71.00	Total obligations	....	−70,000	....
72.40	Obligated balance, start of year	....	....	−66,500
74.40	Obligated balance, end of year	....	66,500	45,500
90.00	Outlays	....	−3,500	−21,000

This rescission proposal would partially offset the cost of implementing the new HOPE Grants and HOME Investment Partnerships programs in 1991 by providing no new funds for Rental Rehabilitation grants. Pursuant to section 289 of the National Affordable Housing Act (Public Law 101-625), no new grants may be made after October 1, 1991.

URBAN HOMESTEADING

(Rescission proposal)

Program and Financing (in thousands of dollars)

Identification code 86-0171-5-1-451		1990 actual	1991 est.	1992 est.
	Program by activities:			
10.00	Total obligations (object class 25.0)	....	−13,397	....
	Financing:			
39.00	**Budget authority**	....	**−13,397**	....
	Budget authority:			
40.30	Appropriation (rescission proposal R91-25)	....	**−13,000**	....
40.31	Appropriation rescission propusal (unobligated balance)	....	−397	....
43.00	**Appropriation (adjusted)**	....	**−13,397**	....
	Relation of obligations to outlays:			
71.00	Total obligations	....	−13,397	....
90.00	Outlays	....	−13,397	....

This rescission proposal would offset partially the cost of implementing the new HOPE Grants and HOME Investment Partnerships programs in 1991 by providing no new funds for Urban Homesteading in 1991. The Urban Homesteading program terminates pursuant to the National Affordable Housing Act (Public Law 101-625) after October 1, 1991.

REHABILITATION LOAN FUND

(Rescission proposal)

Program and Financing (in thousands of dollars)

Identification code 86-4036-5-3-451		1990 actual	1991 est.	1992 est.
	Program By Activities:			
10.00	Total obligations (object class 33.0)	....	−135,000	....
	Financing:			
43.00	**Budget authority (appropriation rescission proposal R91-26) (unobligated balance)**	....	**−135,000**	
	Relation of Obligations to Outlays:			
71.00	Total obligations	....	−135,000	
72.90	Obligated balance, start of year	....	....	−121,50
74.90	Obligated balance, end of year	....	121,500	54,00
90.00	Outlays	....	−13,500	−67,50

This rescission proposal would partially offset the cost of implementing the new HOPE Grants and HOME Investment Partnerships programs by precluding commitments for new loans in 1991. Pursuant to section 289 of the National Affordable Housing Act (Public Law 101-625), no new loans may be made after October 1, 1991.

NOTE

Under the provisions of the Budget Enforcement Act of 1990 (BEA), enactment of the supplemental appropriations proposed in this budget, offset by the proposed rescissions, would not cause the domestic discretionary spending limits for 1991 to be exceeded. In their final sequester reports for 1991, both the Congressional Budget Office (CBO) and the Office of Management and Budget (OMB) scored regular appropriations bills as falling short of the applicable limits. In the case of OMB outlay scoring, a special rule is applied to determine that limit: section 251(b)(2)(F) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended by the BEA. The rule states that if budget authority is within its limit and outlays exceed the limit, an adjustment in the limit is provided in the amount of the excess, up to a certain amount for each category of discretionary spending. This rule applied to OMB scoring of domestic discretionary spending in its 1991 sequester report, in which budget authority was scored as under the limit, and outlays were over the unadjusted limit but within the amount of the limit as adjusted under section 251(b)(2)(F). The proposed supplementals (with the proposed rescission offsets), when added to amounts scored for regular appropriations, would still be within the unadjusted limits, not counting the amount provided by the adjustment under section 251(b)(2)(F). An analogous situation exists for the scoring of appropriations against the international cap.

If it were the case that the amount provided by the outlay adjustment should be counted in this situation, then further offsets would be required to keep these supplementals within the limits. If such offsets for domestic programs were required, they would include the following:

—a proposal to charge States a ten-percent fee for the costs of administering Supplemental Security Income (SSI) State supplemental benefits, which would achieve savings of $95 million in budget authority and outlays if enacted by March 1991;

—a proposal to rescind $100 million in 1990 budget authority of the Job Training Partnership Act (JTPA) Summer Youth Employment and Training program, which would result in 1991 outlay savings of $100 million.

If such offsets for international programs were required, a reduction of $11 million in budget authority and $8 million in outlays would be proposed from the foreign food aid program under Public Law 480.

ADVANCE APPROPRIATIONS, ADVANCE FUNDING, AND FORWARD FUNDING FOR 1992

I. An *advance appropriation* is one made to become available one fiscal year or more beyond the fiscal year for which the appropriation act is passed. Advance appropriations in fiscal year 1992 appropriations acts will become available for programs in 1993 or beyond. Since these appropriations are not available until after fiscal year 1992, the amounts will not be included in fiscal year 1992 budget totals, but will be reflected in the budget totals for the fiscal year for which they are requested.

The Congressional Budget Act of 1974 (31 U.S.C. 1105(a)(17)) requires inclusion in the budget of "information on estimates of appropriations for the fiscal year following the fiscal year for which the budget is submitted for grants, contracts, and other payments under each program for which there is an authorization of appropriations for that following fiscal year when the appropriations are authorized to be included in an appropriation law for the fiscal year before the fiscal year in which the appropriation is to be available for obligation." In fulfillment of this requirement, the table below lists those accounts authorized to receive, in fiscal year 1992, advance appropriations for fiscal year 1993 and beyond and cites the authorizing statute. The listing is in two parts: Part A shows the amounts of advance appropriations included in the 1992 budget. Part B is a listing of accounts for which advance appropriations are authorized but not requested in the 1992 budget.

A. Accounts for which advance appropriations are included in the 1992 budget:
- Department of Agriculture:
  - Food stamp program (7 U.S.C. 2011-2027, 2029), $4,750,000 thousand for 1993.
- Department of Defense—Military:
  - All accounts (P.L. 99-145, sec. 1405) $278,610,700 thousand for 1993.
- Department of Energy:
  - Atomic energy defense activities (P.L. 99-145, sec. 1405) $12,231,820 thousand for 1993.
  - Strategic Petroleum Reserves Petroleum Account (P.L. 94-163), $196,188 thousand for 1992.
  - Clean coal technology (42 U.S.C. 5901 et seq.), $465,000 thousand for 1992; $475,000 thousand for 1993; and $225,000 thousand for 1994.
- Department of Health and Human Services, except Social Security:
  - Grants to States for Medicaid (42 U.S.C., sec. 1396) $17,100,000 thousand for 1993.
  - Special benefits for disabled coal miners (30 U.S.C., sec. 921) $198,000 thousand for 1993.
  - Supplemental security income program (42 U.S.C., sec. 1381) $5,240,000 thousand for 1993.
  - Family support payments to States (42 U.S.C., secs. 601 and 651) $4,000,000 thousand for 1993.
- Department of Justice: Restitution payments for individuals of Japanese ancestry who were interned during World War II (P.L. 100-383), $500,000 thousand for 1992, and $250,000 thousand for 1993.
- Central Intelligence Agency:
  - Payment to the Central Intelligence Agency retirement and disability fund (P.L. 99-145, sec. 1405) $168,900 thousand for 1993.
- Corporation for Public Broadcasting: Public broadcasting fund, $327,280 thousand for 1992, $326,505 thousand for 1993 and $260,000 thousand for 1994.
- Department of Transportation:
  - Coast Guard (P.L. 100-448):
    - Operating expenses, $2,473,546 thousand for 1993.
    - Acquisition, construction and improvement, $396,226 thousand for 1993.
    - Environmental compliance and restoration, $25,000 thousand for 1993.
    - Alteration of bridges, $10,200 thousand for 1993.
    - Retired pay, $519,000 thousand for 1993.
    - Reserve training, $77,300 thousand for 1993.
    - Research, development, test and evaluation, $28,800 thousand for 1993.
    - Boat Safety, $70,000 thousand for 1993.
  - Maritime Administration, Ready reserve force (P.L. 99-145, sec. 1405) $234,000 thousand for 1993.
- Defense Nuclear Facilities Safety Board: (P.L. 99-145, sec. 1405) $13,679 thousand for 1993.
- Federal Emergency Management Agency:
  - Salaries and expenses (P.L. 99-145, sec. 1405) $76,200 thousand for 1993.
  - Emergency management planning and assistance $223,724 thousand for 1993.
- Intelligence Community Staff: (P.L. 99-145, sec. 1405) $31,956 thousand for 1993.
- Selective Service System: Salaries and expenses (P.L. 99-145, sec. 1405) $28,316 thousand for 1993.

B. Accounts authorized to receive advance appropriations but for which none are requested in the 1992 budget:
- Department of Agriculture:
  - Food program administration (42 U.S.C., sec. 1752).
  - Food donations program (P.L. 93-29, sec. 209).
  - Child nutrition programs (42 U.S.C., sec. 1752).
- Department of Education. The following activities are authorized to receive advance appropriations (20 U.S.C. 1223 and 29 U.S.C. 703):[1]
  - Compensatory education for the disadvantaged.
  - Impact aid.
  - School improvement programs.
  - Indian education.
  - Bilingual and immigrant education.
  - Special education.
  - American Printing House for the Blind.
  - National Technical Institute for the Deaf.
  - Gallaudet University.
  - Rehabilitation services and disability research.
  - Vocational and adult education.
  - Student financial assistance.
  - Guaranteed student loans.
  - Higher education.
  - Higher education facilities loans and insurance.
  - College housing and academic facilities loans.
  - Howard University.
  - Assessment, statistics, research, and improvement.
  - Libraries.
  - Education and research overseas (special foreign currency program).
- Department of Health and Human Services:
  - Payments to States for foster care and adoption assistance (P.L. 96-272).
  - Human Development Services (P.L. 97-35, sec. 657, P.L. 89-73 as amended, sec. 209, P.L. 96-272).
- Department of the Interior:
  - Miscellaneous payments to Indians (P.L. 101-512).

---

[1] These statutes erroneously refer to "advance funding". Since these statutes describe and clearly intend to provide advance appropriations, the affected accounts are listed here.

II. *Advance funding* is budget authority that is to be charged to the appropriation in the succeeding year but which authorizes obligations to be incurred in the last quarter of the fiscal year if necessary to meet higher than anticipated benefit payments in excess of the specific amount appropriated for the year. When such budget authority is used, an adjustment is made to increase the budget authority for the fiscal year in which it is used and to reduce the budget authority of the succeeding fiscal year. Essentially, this is a device for avoiding supplemental requests late in the fiscal year for certain programs, should the appropriations for the current year prove to be too low. The table below lists those accounts for which advance funding authority is requested in the 1992 Budget.

- Department of Labor:
  - Special benefits.
  - Black lung disability trust fund.
  - Federal unemployment benefits and allowances.
- Department of Veterans Affairs:
  - Burial benefits and miscellaneous assistance.
  - Readjustment benefits.
  - Veterans insurance and indemnities.
  - Loan guaranty revolving fund.
  - Compensation.
  - Pensions.

III. Forward funding is budget authority that is made available for obligation beginning in the last quarter of the fiscal year for the financing of ongoing grant programs during the next succeeding fiscal year. The budget authority for such programs is included in the budget totals for the year in which it is appropriated. This device is often used for education programs, so that grants can be made prior to the start of the school year. The language providing forward funding for education programs will specify that amounts appropriated will not be available until some time into the year of the appropriation (e.g., July 1, 1991) and in most cases will specify that such amounts will remain available until the end of the succeeding fiscal year. The table below lists those accounts for which forward funding exists or is requested in whole or in part in the 1992 Budget.

- Department of Education:
  - Compensatory education for the disadvantaged.
  - School improvement programs.
  - Special education.
  - Vocational and adult education.
  - Indian education.
  - Student financial assistance.
  - Assessment, statistics, research, and improvement.
- Department of the Interior:
  - Indian education programs.

In the training and employment area, forward funding provides appropriations for a program year that starts on July 1st of the fiscal year of the appropriation. Financing extends through June 30th of the following fiscal year. Program years are authorized for training programs under the Job Training Partnership Act, operation of the State Employment Service under section 6 of the Wagner-Peyser Act, and senior citizen employment programs under Title V of the Older Americans Act. The table below lists accounts for which forward funding is requested in the 1992 Budget.

- Department of Labor:
  - Training and employment services.
  - Community service employment for older Americans.
  - State unemployment insurance and employment service operations.

GOVERNMENT-SPONSORED ENTERPRISES

This part contains descriptions of and data on the Government-sponsored enterprises listed below. These enterprises were established and chartered by the Federal Government. They are not included in the Federal budget because they are classified as being private. However, because of their relationship to the Government, detailed statements of financial operations and condition are presented, to the extent such information is available, on a basis that is as consistent as practicable with the basis for the budget data of Government agencies. These statements are not reviewed by the President; they are presented as submitted by the enterprises. The relationship of these enterprises to the Government is discussed further in Part Two, Chapter VIII.A "Recognizing and Reducing Federal Underwriting Risks".

- The Student Loan Marketing Association is a for-profit financial corporation chartered by Congress in 1972 under the Higher Education Act (HEA) to help increase the availability of student loans. Sallie Mae carries out secondary market and other functions under an agreement with the Department of Education, authorized by the HEA.
- The College Construction Loan Insurance Association is organized as a private, for-profit insurance corporation to guarantee and insure bonds and loans made for construction and renovation of college and university facilities.
- The Federal National Mortgage Association provides supplementary assistance to the secondary market for home mortgages. The Federal Home Loan Mortgage Corporation provides a secondary market for mortgage lenders. Both are supervised by the Department of Housing and Urban Development.
- The banks for cooperatives and Farm Credit Banks provide financial assistance to agriculture. They are supervised by the Farm Credit Administration.
- The Farm Credit System Financial Assistance Corporation was created to carry out a program to provide capital to institutions of the Farm Credit System that are experiencing financial difficulty.
- The Federal Agricultural Mortgage Corporation, a mortgage finance corporation, under the supervision of the Farm Credit Administration, was created to provide a secondary mortgage market for agricultural real estate and certain rural housing loans.
- The Federal Home Loan Banks, which assists thrift institutions, is supervised by the Federal Housing Finance Board.
- The Financing Corporation functions as a financing vehicle for the FSLIC Resolution Fund. It is owned by the Federal Home Loan Banks.
- The Resolution Funding Corporation provides financing for the Resolution Trust Corporation (RTC) and is subject to the general oversight and direction of the Oversight Board of the RTC. It is owned by the Home Loan Banks.

The Board of Governors of the Federal Reserve System is not a Government-sponsored enterprise, but its transactions also are not included in the budget because of its unique status in the conduct of monetary policy. The Board provides data on its administrative budget on a calendar year basis, which is included here for information. Its budget schedules and statements are not subject to review by the President.

[1] Amortization of discount on purchased loans.

The Student Loan Marketing Association (Sallie Mae), a shareholder-owned corporation, was created by the Education Amendments of 1972 to expand funds available for student loans by providing liquidity to lenders engaged in the guaranteed student loan program (GSLP).

Sallie Mae provides liquidity through direct purchase of insured student loans from eligible lenders and through ware-

STUDENT LOAN MARKETING ASSOCIATION—Continued

housing advances, which are loans to lenders secured by insured student loans, Government or agency securities, or other acceptable collateral. In capital shortage areas, Sallie Mae is authorized, at the request of appropriate State and Federal officials, to make insured loans directly to students. Sallie Mae is authorized to advance funds to State agencies that will provide loans to students. Sallie Mae is also authorized to provide a secondary market for noninsured loans; to serve as a guarantee agency in support of loan availability at the request of the Secretary of Education; to purchase and underwrite student loan revenue bonds; to provide certain additional services as determined by its board of directors to be supportive of the credit needs of students generally; and to provide financing for academic facilities and equipment.

Sallie Mae is authorized by the Health Professions Educational Assistance Act of 1976 to provide a secondary market for federally insured loans to graduate health professions students.

Operations.—The forecast data with respect to operations are based on certain general economic and specific GSLP loan volume assumptions and should not be relied upon as an official forecast of the corporation's future business.

ANNUAL LOAN ACTIVITY

[In thousands of dollars]

	1990 actual	*1991 est.*	*1992 est.*
Guaranteed student loans:			
Stafford (formerly "regular"):			
Purchased	3,818,029	4,200,000	4,620,000
Warehoused	4,943,174	5,438,000	5,981,000
PLUS/SLS: Purchased	730,569	804,000	884,000
Subtotal, Guaranteed student loans	9,491,772	10,442,000	11,485,000
Health professions loans: Purchased	391,946	431,000	474,000
Other	309,802	340,000	375,000
Total	10,193,520	11,213,000	12,334,000

Financing.—Between 1974 and early 1982, Sallie Mae borrowed through the Federal Financing Bank. The Secretary of Education was authorized by the Education Amendments of 1980 to guarantee principal and interest on such obligations issued prior to October 1, 1985. Under an agreement with the Department of the Treasury reached in early 1981, Sallie Mae began borrowing directly in the private capital markets. Its last borrowing through the FFB and its last issuance of federally guaranteed obligations occurred in January 1982. Its obligations today have certain characteristics, provided by charter, which give them "agency" status, but they are not federally insured or guaranteed.

Management.—At its annual meeting in May 1990, the shareholders of Sallie Mae elected 14 members to its board of directors to serve until May 1991. The shareholders of Sallie Mae are entitled to elect 14 members to the board. Pursuant to the Education Amendments of 1972, seven public directors are appointed by the President, who also names the chairman from among the 21 members.

College Construction Loan Insurance Association

The College Construction Loan Insurance Association (Connie Lee) was authorized by Public Law 99-498 on October 17, 1986. The Corporation was created to insure and reinsure bonds and loans of educational institutions which borrow funds to finance the acquisition, construction or renovation of their facilities. The Association was incorporated in February 1987, under the District of Columbia Business Corporation Act.

Connie Lee's authorizing statute states that "no obligation which is insured, guaranteed, or otherwise backed by the corporation, shall be deemed to be an obligation which is guaranteed by the full faith and credit of the United States."

Operations.—Connie Lee is structured to operate as a private corporation, subject to the same state laws and regulations as any other insurance company. Accordingly, Connie Lee secures insurance licenses in each of the various states in which it expects to conduct its insurance activities.

The Board of Directors authorized management to begin activities as a reinsuror of educational facilities bonds in 1988. Connie Lee reinsured its first bonds in December 1988. In fiscal year 1990, Connie Lee provided reinsurance on bonds representing $1.3 billion dollars of debt service for more than 550 colleges, universities and teaching hospitals.

The forecast data contained in this material are based on certain general economic assumptions available in November 1990, and should not be construed as an official forecast of the Corporation's position.

ANNUAL INSURANCE AND REINSURANCE ACTIVITIY

(In thousands of dollars)

	1990 actual	1991 est	1992 est
Debt service insured:			
Direct insurance	....	500,000	1,200,000
Reinsurance	1,281,000	1,300,000	1,100,000
Total	1,281,000	1,800,000	2,300,000

Financing.—In order to provide capitalization, the Secretary of Education, the Student Loan Marketing Association (Sallie Mae), and other investors are authorized to purchase stock in the corporation. Sallie Mae made an initial investment of $2 million in Connie Lee stock in fiscal year 1987. The Secretary of Education purchased $19.1 million in Connie Lee stock with funds appropriated for this purpose in fiscal year 1988. Subsequently, the corporation sold an additional $50.9 million of equity securities to Sallie Mae, increasing total capital of the corporation to $72.0 million. This action, coupled with the completion of a business plan and the necessary operational systems and staffing, resulted in the issuance of the triple A credit rating by Standard and Poor's needed by the corporation to engage in the financial guaranty reinsurance business.

In order to commence its activities as a direct insurer of educational facilities obligations, Connie Lee will obtain additional capital. Connie Lee projects that a total of $125 million in equity capital will be sufficient to secure the issuance of a triple A credit rating to engage in the direct insurance business.

Revenue and Expense (in thousands of dollars)

Fannie Mae is a company wholly owned by private investors and known as a Government-sponsored enterprise. It is dedicated by its Congressional charter to engage only in the business of housing finance through the secondary market for residential mortgages. The common stock of the corporation is owned by the public, is fully transferable, and is listed on major stock exchanges.

Fannie Mae was established in 1938 to assure a consistent supply of affordable mortgage funds throughout the country and in all economic circumstances. Originally limited to investments in mortgages insured or guaranteed by the Federal Government, Fannie Mae received an expanded mandate in 1970 from the Congress to increase the availability and decrease the cost of non-subsidized mortgage financing.

In the ensuing two decades, Fannie Mae funded homes for more than 9 million families, introduced mortgage underwriting guidelines and documents that serve as industry standards, and supported the development of a secondary market for innovative products such as adjustable rate mortgages. Its primary consumer beneficiaries are low-, moderate-, and middle-income households. In 1989, about 21 percent of the mortgages it purchased had balances of $40,000 or less and the average mortgage purchased was about $83,000.

Since beginning conventional multifamily lending in 1983, Fannie Mae also has directed over $15 billion to local housing markets for the financing of multifamily housing and helping to keep rents affordable for 400,000 apartment households. The company also has made commitments of some $4 billion through special initiatives to serve the housing credit needs of low- and moderate-income households.

In 1989, Congress examined and reaffirmed the continuing importance of Fannie Mae to the housing finance delivery system through charter amendments enacted as part of the Financial Institutions Reform, Recovery and Enforcement Act (FIRREA) of 1989. Its amended charter purpose requires Fannie Mae: "to provide stability in the secondary mortgage market for home mortgages; to respond appropriately to the private capital markets; and to provide ongoing assistance to the secondary market for home mortgages . . . by increasing the liquidity of mortgage investments and improving the distribution of investment capital available for home mortgage financing."

Fannie Mae's charter also includes a number of Government ties intended to compensate it for performing its public purpose and restricting its business to home finance. These ties enable the company to lower mortgage credit costs by financing its operations through debt issues characterized as "Agency" issues in the securities market (but not in the Federal government budget).

Fannie Mae is the nation's largest mortgage portfolio investor. Its portfolio and mortgage-backed securities finance about one out of every seven mortgages in the United States. Acting as a national intermediary between home buyers and world capital markets, it provides greater efficiency, liquidity, and reliability in part because of its Government ties. Deregulation of financial institutions has made Fannie Mae more important to effective home finance delivery in recent years, by assuring depositories of ready access to mortgage funds when demand outpaces their deposit base.

Fannie Mae has three separate authorities to borrow money from private sources. It may issue subordinated obligations. It may, in addition, borrow amounts not in excess of the sum of its defined capital and subordinated obligations outstanding multiplied by a factor established by the Secretary of Housing and Urban Development. This factor is currently set at 20. These borrowings usually take the form of debentures and short-term discount notes. Finally, Fannie Mae may issue bonds secured by mortgages. Such bonds may be guaranteed by the Government National Mortgage Association. There is no statutory limitation on the amount of such bonds that may be outstanding.

The forecast data contained in this material has been developed based on certain general economic assumptions prevalent in November 1990 and should not be construed as an official forecast of the position of Fannie Mae.

According to accounting practices for private corporations, the mortgages in the pools of loans supporting the mortgage-backed securities are considered to be owned by the holders of these securities. Consequently, on the books of the Federal National Mortgage Association (Fannie Mae), these mortgages are not considered assets and the securities outstanding are not considered liabilities. However, the concepts of the budget of the U.S. Government consider these mortgages and mortgage-backed securities to be assets and liabilities, respectively, of Fannie Mae. For the purposes of this document, therefore, they are presented as assets and liabilities in the accompanying schedules. On the schedule of Status of direct loans for mortgage-backed securities, the items labeled "New loans" and "Recoveries: Repayments and prepayments" are budgetary terms. However, from the Corporation's perspective, these items are "Amounts issued" and "Amounts passed through to the holders of securities", respectively.

The forecast data contained in this material has been developed based on certain general economic assumptions prevalent in November 1989 and should not be construed as an official forecast of the Corporation's position.

The Federal Home Loan Mortgage Corporation (Freddie Mac) was created under the Emergency Home Finance Act of 1970. Congress chartered Freddie Mac to provide mortgage lenders with an organized national secondary market enabling them to manage their conventional mortgage portfolio more effectively and gain indirect access to a ready source of additional funds to meet new demands for mortgages. Freddie Mac serves as a conduit facilitating the flow of investment dollars from capital market investors to mortgage lenders and, ultimately, to homebuyers increasing the amount of mortgage credit and making it more affordable.

The Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA) significantly changed the corporate governance of Freddie Mac. FIRREA, signed into law in August, 1989, replaced Freddie Mac's three member Board of Directors (who also comprised the Federal Home Loan Bank Board) with a new 18 member Board of Directors. Thirteen of these Directors are elected annually by Freddie Mac's shareholders, and the other five are appointed for one year terms by the President of the United States. In addition, FIRREA automatically converted Freddie Mac's 60 million shares of non-voting, senior participating preferred stock to voting common stock, which is listed on the New York and Pacific Stock Exchanges.

FIRREA also introduced into Freddie Mac's charter the following elaboration of the corporation's mission: "to provide stability in the secondary mortgage market for home mortgages; to respond appropriately to the private capital market; and to provide ongoing assistance to the secondary market for home mortgages (including mortgages securing homes for low- and moderate-income families involving a reasonable econom return to the corporation) by increasing the liquidity of mortgage investments and improving the distribution of investment capital available for home mortgage financing."

This legislative change enhances Freddie Mac's current ability to identify the needs of homeowners as well as the mortgage finance industry and develop appropriate mortgage purchase and securitization programs to meet those needs in a timely fashion.

These programs and security structures have helped Freddie Mac finance one in eight American homes and half a million apartment units at the lowest possible cost. Freddie Mac ensures that lenders throughout the country have equal access to the competitive benefits of the secondary market so that Freddie Mac's presence is felt in every area across the country.

Freddie Mac's role in developing a nationwide network for obtaining mortgage credit involved much more than linking capital rich areas to capital deficit areas. The corporation's mission to create more affordable mortgage credit throughout the country also required standardization and uniformity in the marketplace. Freddie Mac's underwriting guidelines, innovative mortgage programs and mortgage backed securities are the cornerstones to Freddie Mac's commitment to affordable housing.

This commitment is borne out by the corporation's current purchase statistics. Freddie Mac's average single family dwelling loan purchase in 1989 was $83,000, only 44 percent of Freddie Mac's maximum loan amount. In addition, approximately 47 percent of Freddie Mac's single-family loan purchases in 1989 were affordable to households earning the median income for their geographic area.

Freddie Mac is also committed to financially safe and sound management. It securitizes nearly all of its mortgage purchases as part of its strategy to avoid interest rate risk. As the Department of the Treasury reported in its May, 1990, study of Government-Sponsored Enterprises (GSEs), Freddie Mac's "exposure to interest rate risk is small", and even under wide swings in interest rates "Freddie Mac's net market value remains positive". In addition, Freddie Mac has limited its exposure to credit risk by establishing comprehensive underwriting standards, actively monitoring compliance to these standards, and accurately measuring and pricing risks. Thus, as the General Accounting Office noted in its August, 1990, study of GSEs, "Freddie Mac's delinquency and default rates have traditionally been lower than the housing industry average".

The forecast data contained in this material represent estimates and should not be construed as an official forecast of the corporation's future position. The data have been developed on the basis of certain economic assumptions that are reviewed and revised periodically. Consequently, the estimates are subject to forecast error and will normally differ from actual data when these become available.

According to generally accepted accounting principles utilized for private corporations, the mortgages in the pools of loans supporting PCs are considered to be owned by the holder of these securities. Therefore, Freddie Mac does not show these mortgages as assets. However, the budget philosophy of the United States Government includes these mortgages and mortgages pass-through securities as assets and liabilities, respectively, of Freddie Mac. For the purpose of this document, therefore, they are presented as assets and liabilities in the accompanying schedules. On the Status of Direct Loans schedule for mortgage pass-through securities, the items labeled "Disbursements" and "Repayments" are budgetary terms. However, for Freddie Mac's perspective, these amounts represent "Sales of PCs" and "Amounts passed through to PC holders," respectively.

tstanding, end of year	10,692,575	10,588,583	10,863,447

ed loan balances exclude nonaccrual loans and sales contracts.

Pursuant to the Agricultural Credit Act of 1987 11 of 13 nks for cooperatives voted in 1988 to merge into a single tional Bank for Cooperatives. The bank for cooperatives in e Springfield and St. Paul districts voted to remain inde- ndent, but have nation-wide lending authority.

The banks for cooperatives lend to agriculture-related and ral utility cooperatives. As part of the Farm Credit System ey are regulated by the Farm Credit Administration, an dependent federal agency. The funds to finance loans are tained primarily from sales of bonds to the public. The rm Credit System bonds issued by the banks are not guar- nteed by the U.S. Government either as to principal or inter- st.

The Farm Credit Act of 1955 provided for eventual owner- hip of the banks by farmers' cooperatives and the retirement f the U.S. Government's investment. This was accomplished n December 31, 1968, when the remainder of the U.S. Gov- rnment capital was retired.

The banks for cooperatives presently operate under authori- ies contained in title III of the Farm Credit Act of 1971, Public Law 92-180, as amended.

Note.—Loans outstanding at end of year do not include nonaccrual loans and sales contracts.

The Agricultural Credit Act of 1987 required the Federal Intermediate Credit Bank (FICB) and Federal Land Bank (FLB) in each Farm Credit District to merge into a single Farm Credit Bank by July 6, 1988. No merger occurred in the Jackson District because the FLB is in receivership. The Farm Credit Banks operate under statutory authority which combines the prior authorities of the FLB and the FICB.

The 11 Farm Credit Banks are under the general supervision of the Farm Credit Administration, an independent federal agency. They serve as banks of discount for agriculture, discounting agricultural and livestock paper for, and making loans to local financing institutions such as production credit associations, agricultural credit corporations, livestock loan companies, and commercial banks. They make long-term real estate loans to farmers and ranchers, through local federal land bank associations. They also provide the production credit and federal land bank associations with necessary supervision and services.

The bank's lending funds are obtained primarily from the sale of Farm Credit System bonds to the public and from their own capital funds. The bonds are not guaranteed by the U.S. Government either as to principal or interest. All of their expenses are paid from their own income and are not included in the budget of the United States. Included in these expenses is the credit banks' share of costs of the Farm Credit Administration and insurance premiums paid to the Farm Credit Insurance Corporation. Farm Credit System Financial Assistance Corporation purchases of selected System institution's preferred stock, and payments for Capital Preservation Agreement cash-outs, as required by the Agricultural Credit Act of 1987, are reflected for 1989.

The banks were originally wholly owned Government corporations set up exclusively as banks of discount; however, pursuant to the Farm Credit Act of 1956, the banks became mixed-ownership corporations and were made responsible for supervising the production credit and federal land bank associations and assisting them to make sound credit available to farmers.

All the capital stock of the FICB's, from organization in 1923 to December 31, 1956, was held by the U.S. Government. The 1956 Act provided a long-range plan for the eventual ownership of the credit banks by the production credit associations and the gradual retirement of the Government's investment in the banks. This retirement was accomplished in full on December 31, 1968. The last of the Government capital that had been invested in the FLB's was repaid in 194

A discussion and analysis of the financial condition and risk of the Farm Credit System is presented in Chapter VIII of the Budget.

Farmer Mac was established by the Agricultural Credit Act of 1987 (the Act) to facilitate creation of a secondary market for farm and rural housing mortgage loans that meet certain established credit standards developed and published by Farmer Mac. The Farmer Mac title of the Act was amended by the Food, Agriculture, Conservation, and Trade Act of 1990 (effective November 28, 1990) to authorize Farmer Mac to purchase, pool and securitize the guaranteed portions of Farmers Home Administration (FmHA) guaranteed farmer program loans. These two areas of secondary market authority have been organized by Farmer Mac into distinct pro-

FEDERAL AGRICULTURAL MORTGAGE CORPORATION—Continued

grams designated as "Farmer Mac I" and "Farmer Mac II," respectively.

In general, the agricultural secondary market is intended to attract new capital (from investors in guaranteed securities) for financing agricultural real estate, including rural housing (Farmer Mac I only), and to provide greater liquidity to agricultural lenders. Increased competition among agricultural lenders participating in the secondary market should result in more favorable rates and terms for agricultural loans. In addition, the existence of the secondary market should foster increased long-term fixed-rate mortgages which farm lenders have been reluctant to make in recent years due to the difficulty they have in effectively matching interest rates and maturities of assets (loans) and liabilities (deposits and borrowed funds). The programs provide participating lenders with new tools to improve asset/liability management and to limit interest rate risk on fixed rate loans. Lenders eligible to participate include large and small agricultural banks, credit unions, insurance companies, agriculture cooperatives, and institutions of the Farm Credit System (FCS).

In both programs, Farmer Mac will provide a guarantee of timely payment of principal and interest on securities backed by pools of eligible loans. These securities are not guaranteed by the United States, and are not "government securities".

Farmer Mac is governed by a 15 member Board of Directors. Ten Board members are elected by stockholders and 5 are appointed by the President subject to Senate confirmation. The Permanent Board was first seated on March 2, 1989. Elected members are required to stand for election annually.

FARMER MAC I—

Program structure.—The Farmer Mac I program is a secondary market for financially sound agricultural real estate and rural housing borrowers. Loans eligible for pooling must meet established Farmer Mac credit and appraisal standards. Loan pools formed by certified poolers must comply with Farmer Mac diversification standards and minimum performance characteristics. Senior securities issued by poolers against the pools must be backed by a subordinated class of securities or cash reserve. Farmer Mac will guarantee prompt payment of principal and interest on the senior securities. Initial pool losses, if any, will be absorbed by the subordinated securities or reserves, which must be fully exhausted before the Farmer Mac guarantee will be triggered.

Program participation.—Farmer Mac loans are to be made by loan originators. The only eligibility criteria for originators is ownership of a specified amount of Farmer Mac stock. In Farmer Mac I, the pooling of loans and issuance of securities will be done by certified pooling institutions, thus, Farmer Mac itself will not purchase the loans. Originators will sell loans to eligible poolers who will form pools and present them to Farmer Mac for evaluation and guarantee of the mortgage backed securities issued by the poolers. Capital market investors, such as insurance companies, pension funds, and financial institutions, are the likely purchasers of the guaranteed securities.

Credit Standards and loan applications.—Credit Underwriting and Loan Payment, Security Appraisal, Loan Diversification, and Certified Facility (Pooler) Eligibility Standards developed during 1989 were submitted to Congress for review and are now effective. Application forms and agreements for pooler certification were developed and distributed to potential poolers in late 1989. The Farmer Mac Securities Guide, the detailed operating manual for originators and poolers, was printed and distributed to all stockholders in January 1990, and has been twice updated since then. In addition, considerable work has been done to develop a software package referred to as "AGPAK," to facilitate preparation and printing of application forms for Farmer Mac qualified loans. At the end of calendar year 1990 more than 600 copies of AGPAK had been distributed to interested lenders.

Pooled loan characteristics.—Eligible loans under the program fall into two major categories. The first and estimated largest category is agricultural real estate loans which are secured by land and/or buildings affixed to land used for the production of one or more agricultural commodities or products.

The second category of eligible loans is rural housing mortgages for single family dwellings with market value not greater than $109,200 (adjusted for inflation annually) in incorporated communities with populations not greater than 2,500 or rural areas.

To be eligible for pooling, an agricultural real estate loan must be no larger than $2.7 million (adjusted for inflation annually), unless the real estate security for the loan is 1,000 acres or less. No loan may exceed 3.5% of the principal value of a pool. Loans must be an obligation of a person or corporation having farming experience or training sufficient to ensure repayment of loans and who are actively engaged in farming.

Among other requirements, the Underwriting Standards specify that no loan may exceed a loan to value ratio of 75% (up to 85% in the case of rural housing loans if the amount above 75% is covered by private mortgage insurance). All loans must be secured with a first mortgage lien on the collateral property.

FARMER MAC II—

Program structure.—The Farmer Mac II program is available only for the guaranteed portions of FmHA guaranteed farm ownership (FO) and farm operating (OL) loans. Under this program the loans will be sold directly to Farmer Mac for pooling and securitizing. Subordinated securities or cash reserves are not required for Farmer Mac II pools because each loan is already cushioned by an unguaranteed portion of at least 10% of the principal value of the loan.

Program participation.—All lenders eligible to participate in the FmHA guaranteed loan program may participate in the Farmer Mac II program irrespective of stock ownership in Farmer Mac. Loans will be made to eligible farm borrowers and sold to Farmer Mac in a "Simultaneous Sale" for cash or in a "Swap" transaction for guaranteed Farmer Mac securities. Farmer Mac will issue securities against the pools, guaranteed for timely payment of principal and interest.

Origination standards.—Loan origination requirements are established by FmHA regulations. Farmer Mac imposes no new or additional requirements on the loan origination process. Farmer Mac will make available to lenders a software program—AGPAK II—for completion and printing of FmHA application forms. Use of AGPAK II is completely optional to the lender and is not a condition of participation in the secondary market.

Pooled loan characteristics.—Only the guaranteed portion of FmHA guaranteed FO and OL loans will be pooled. Loan size requirements and other characteristics are provided for in FmHA regulations. Pools have no diversification requirements applicable to them.

GENERAL PROVISIONS—

Financing.—There are three sources of financing for Farmer Mac: stock issuance; initial and annual guarantee fees which are assumed in the Budget display to be 25 basis points annually; and a $1.5 billion line of credit with the U.S. Treasury.

The actuarial soundness of the fee charged to poolers will be reviewed annually by the Comptroller General in a report submitted to Congress. The soundness of Farmer Mac I pools will be determined through a multi-stage process. Loans must comply with the requirements of the Credit Underwriting and Appraisal Standards as a first screen. Eligible loan pools will then be examined for geographic and commodity diversity

best copy available

with the Farmer Mac standards and subjected to ized economic stress analysis to determine pool per- characteristics. The Farmer Mac guarantee will be on pool securities only if the pool passes the evaluation. In the case of Farmer Mac II, only the guaranteed of the FmHA guaranteed farmer program loans will pooled by Farmer Mac. FmHA regulations establish all of loan origination and application requirements applicable these loans. Farmer Mac requires verification of the exist- of a valid FmHA guarantee and evidence of a loan note sale eligibility, but imposes no new requirements on the origination process. All other Farmer Mac loan and pool are inapplicable to loan pooling under Farmer Mac I.

able funds of Farmer Mac will be invested in U.S. or securities. No stock dividends are allowed under the until the Board determines that an adequate loss reserve been funded to back Farmer Mac guarantees. This re- in addition to the subordinate securities or cash reserve each pool (Farmer Mac I only), must be exhausted before Treasury line of credit is tapped.

Guarantees.—Under the Farmer Mac I program structure, securities must be supported by a minimum 10% reserve or subordinated class of security. The Farmer guarantee cannot be triggered for payment until the mechanism has been totally exhausted. It is anticipat- that subordinated securities in a pool will be retained by originators and poolers, but they can be sold to investors a market for them develops. Pool funds will be distributed the Farmer Mac Trustee, which will allocate payments to the senior security holders first and then to the security holders to the extent that such funds not otherwise needed to develop reserves to cover loan deficiencies.

Securities registration.—Unlike the securities issued by Government Sponsored Enterprises, Farmer Mac securi- are subject to registration requirements established by Securities and Exchange Commission under the 1933 and Securities Acts.

Borrower rights (FCS).—In the Farmer Mac I program, FCS will certify in their loan applications whether they to retain rights, or have their loans be eligible for sale a pool. Sold loans will retain no borrower rights. In the Farmer Mac II program, borrowers rights, if any, are unaf- by the sale of loans into the secondary market regard- of the type of originating lender.

The Financial Assistance Corporation (FAC) was created by the Agricultural Credit Act of 1987 (the '87 Act) to provide funds to Farm Credit System (FCS) institutions experiencing financial difficulties. The board of the FCS Funding Corporation in New York City is also the board of the FAC. The FAC provides assistance mainly through the purchase of preferred stock in FCS institutions which have been certified by the FCS Assistance Board as eligible to receive assistance. Financial assistance can be provided for such purposes as facilitating a merger of System institutions, paying premiums associated with a System institution's restructuring of high-cost debt, and other purposes in cases when the book value of an institution's stock or other equities is less than par value.

The FAC also assumed approximately $415 million in payables from FCS Capital Preservation Agreements which accrued through the third quarter of 1986. Capital Preservation Agreements were an earlier form of FCS self-help, unrelated to the '87 Act. Cash-outs of these agreements occur as certain FCS institutions incur loan write-offs. To date, all $415 million in Capital Preservation payments to the FCS have been made by the FAC.

The FAC finances its stock purchases, Capital Preservation payments and the administrative expenses of the Assistance Board through the issuance of FAC debt obligations. Issuances are authorized up to $4 billion through September 1992 when the FAC's authority expires.

FAC debt obligations are backed by a full faith and credit guarantee of the United States Government. Except for debt issued for Capital Preservation cash-outs, the U.S. Treasury pays all the interest on 15-year, uncollateralized FAC obligations in the first five years after issuance, and half the inter-

pages tightly bound

Farm Credit System Financial Assistance Corporation—Continued

FINANCIAL ASSISTANCE CORPORATION TRUST FUND—continued

est expense in the second five years. The FCS is required to eventually reimburse Treasury for these payments, and will redeem FAC debt upon maturity or call. Interest and principal due on Capital Preservation debt issuances are paid by FCS Banks. Proceeds of FAC debt issuance are paid into, and amounts for assistance and other expenses are paid from, the FAC Assistance Fund.

Private ownership in FAC was achieved by a one-time mandatory purchase of FAC stock by FCS institutions in 1988. Proceeds from this purchase, totalling $177 million, were deposited in the FAC Trust Fund and are invested in Treasury securities. Amounts in the Trust Fund, and in the Farm Credit Insurance Fund (discussed elsewhere in this document) must be exhausted before a claim is made on the U.S. guarantee of FAC obligations.

Legislation amending the '87 Act was included in the 1989 Rural Development, Agriculture and Related Agencies Appropriations Act. The provision required a partial rebate of principal amounts in the Trust Fund on October 1, 1989, based on the percentage of total authorized FAC debt outstanding at that time. This provision was found to alter the private FAC ownership requirement envisioned in the '87 Act sufficient to categorize the FAC as a federal entity. Subsequently, the 1989 Reconciliation Act delayed the effective date of the Trust Fund principal rebate to 1993, and provides for interim payments of interest earnings to FCS institutions on a portion of Trust Fund balances. Therefore, the FAC will be classified as a federal entity beginning in 1993.

The 12 Federal Home Loan Banks were chartered by the Federal Home Loan Bank Board under the authority of the Federal Home Loan Bank Act of 1932. Subsequent to the passage of the Financial Institutions Reform, Recovery, and Enforcement Act (FIRREA) of 1989, the banks are under the supervision of the Federal Housing Finance Board. The banks are financial institutions whose main function is to supply their members—principally savings and loan-type institutions and savings banks—with credit to smooth their operations and enhance their service to the public as savings media and home-mortgage lenders. Each bank operates in a geographic district designated by the Board and together the banks cover all of the United States as well as Puerto Rico, the Virgin Islands, and Guam. In 1990, the banks extended credits of $141.8 billion and received repayments of $175.1 billion. Advances outstanding on September 30, 1990, totaled $119.4 billion.

The principal source of funds for the lending operations is the sale of consolidated obligations of the banks to the public. On September 30, 1990, $117.0 billion of these obligations standing. The consolidated obligations are not guar- d by the U.S. Government as to principal or interest. r sources of lendable funds include a portion of members' s as determined by Board policy. Deposits totalled $28.1 n and total capital stock amounted to $11.4 billion as of ber 30, 1990. Funds not immediately used for advances mbers are invested until such times as needed.

he capital stock of the Federal Home Loan Banks is owned ely by the members. Initially the U.S. Government pur- d stock of the banks in the amount of $125 million. The s had repurchased the Government's investment in full mid-1951.

he entire operating expenses of the banks are paid from ir own income and are not included in the budget of the ted States. Included in these expenses is the assessment the Federal Housing Finance Board to cover the Board's inistrative and other costs.

s mandated by the Affordable Housing Program (AHP) in RRGA, the banks financed $125 million in 1990 for subsi- ed loans of low and moderate income housing projects.

FINANCING CORPORATION

The Financing Corporation (FICO) is a mixed-ownership government corporation, chartered by the Federal Home Loan Bank Board pursuant to the Federal Savings and Loan Insurance Corporation Recapitalization Act of 1987, as amended (The "Act"). FICO's sole purpose is to function as a financing vehicle for the FSLIC Resolution Fund, formerly the Federal Savings and Loan Insurance Corporation (FSLIC). FICO operates under the supervision and control of the Federal Housing Finance Board (the "Board"). Pursuant to the Act, FICO is authorized to issue debentures, bonds and other obligations ("Obligations") subject to limitations contained in the Act, the net proceeds of which are to be used solely to purchase capital certificates issued by the FSLIC Resolution Fund, or to refund any previously issued obligations.

The Act provides formulas pursuant to which the Federal Home Loan Banks make capital contributions to FICO from time to time at the direction of the Board for the purchase of FICO capital stock. FICO uses the proceeds received from the sales of such capital stock to purchase noninterest bearing securities for deposit in a segregated account as required by the Act. The noninterest bearing securities held in the segregated account will be the primary source of repayment of the principal of the obligations. Securities in the segregated account are kept separate from other FICO accounts and funds but are not specifically pledged as collateral for the payment of obligations. The primary source of payment of interest on the obligations will be the receipt of assessments imposed on and collected from institutions' accounts which are insured by the Savings Association Insurance Fund (the "SAIF").

RESOLUTION FUNDING CORPORATION

The Resolution Funding Corporation (the "REFCORP") is a mixed-ownership government corporation established by Title V of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA). The sole purpose of REFCORP is to provide financing for the Resolution Trust Corporation (the "RTC"). Pursuant to FIRREA, REFCORP is authorized to issue debentures, bonds and other obligations, subject to limitations contained in the Act and regulations established by the Oversight Board of the RTC. The proceeds of the debt (less any discount, plus any premium, net of issuance cost) are to be used solely to purchase nonredeemable capital certificates of the RTC or to refund any previously issued obligations.

The Resolution Funding Corporation is subject to the general oversight and direction of the Oversight Board of the RTC. The day-to-day operations of REFCORP are under the management of a three-member Directorate comprised of the Director of the Office of Finance of the Federal Home Loan Banks and two members selected by the Oversight Board from among the presidents of the twelve Federal Home Loan Banks ("the FHLBanks"). Members of the Directorate serve without compensation, and REFCORP is not permitted to have any paid employees. The Resolution Funding Corporation and its Directorate are subject to regulations, orders and directions of the Oversight Board.

FIRREA and the regulations adopted by the Oversight Board provide formulas pursuant to which the Federal Home Loan Banks must make capital contributions to REFCORP's Principal Fund as well as interest payments on outstanding REFCORP Obligations. FIRREA also provides for other sources to fund REFCORP's Principal Fund and make the interest payments, with the U.S. Treasury responsible for any interest shortfall. Funds designated for the Principal Funds will be used to purchase Zero-coupon Bonds. The Zero-coupon Bonds will be held in the Principal Fund and are the primary source of repayment of the principal of the Obligations at maturity.

The Federal Reserve System operates under the provisions of the Federal Reserve Act of 1913, as amended, and other acts of Congress.

Program.—To carry out its responsibilities under the Act, the Board determines general monetary, credit, and operating policies for the System as a whole and formulates the rules and regulations necessary to carry out the purposes of the Federal Reserve Act. The Board's principal duties consist of exerting an influence over credit conditions and supervising the Federal Reserve banks and member banks.

Financing.—Under the provisions of section 10 of the Federal Reserve Act, the Board of Governors levies upon the Federal Reserve banks, in proportion to their capital and surplus, an assessment sufficient to pay its estimated expenses. The Board, under the Act, determines and prescribes the manner in which its obligations are incurred and its expenses paid. Funds derived from assessments are deposited in the Federal Reserve Bank of Richmond, and the Act provides that such funds "shall not be construed to be Government funds or appropriated moneys." No Government appropriation is required to support operations of the Board.

The information presented pertains to Board operations only. Expenditures made on behalf of the Federal Reserve banks for production, issuance, retirement, and shipment of Federal Reserve notes are not included, since they are reimbursed in full by the Federal Reserve banks.

PART FIVE

BUDGET ENFORCEMENT ACT PREVIEW REPORT AND CURRENT SERVICES ESTIMATES

XIV. BUDGET ENFORCEMENT ACT PREVIEW REPORT

XIV. BUDGET ENFORCEMENT ACT PREVIEW REPORT

Budget Enforcement Act of 1990 (BEA), which enacted into law as part of the Omnibus Rec- tion Act of 1990 (OBRA 1990), contained proce- designed to enforce last year's deficit reduction ment. The BEA extended and substantially re- the Balanced Budget and Emergency Deficit Con- Act of 1985 (commonly known as Gramm-Rudman- gs or G-R-H). In addition, it amended the Con- nal Budget Act of 1974, altering the congres- budget process, and established scorekeeping lines for measuring compliance with the BEA's ements.

BEA divides the budget into two mutually exclu- categories—discretionary programs, on the one and direct spending and receipts, on the other. 991 through 1995, the BEA limits discretionary ing and establishes a "pay-as-you-go" requirement legislation changing direct spending and receipts in total, be at least deficit neutral. Deficit targets, were the sole focus of the old G-R-H law, are ed under the BEA. To enforce its requirements, BEA continues to rely on sequesters—automatic, -the-board reductions of budgetary resources. But sequesters would be limited to the category where violation occurs.

under the old G-R-H law, both OMB and the ressional Budget Office (CBO) must independently re sequester reports on specified dates. CBO submits reports to OMB and Congress. Five days after CBO reports are transmitted, OMB submits its re- to the President and Congress. The OMB reports sed to determine if a sequester is required, and serve as the basis for sequestration orders issued e President. The schedule for the sequestration ts and Presidential orders are in the accompany- metable.

preview, update, and final sequestration reports themselves composed of three reports, each relating different type of sequester: discretionary, pay-as- o, and deficit. In addition, the OMB reports must include an explanation of the differences between the OMB and CBO estimates. The preview report must use the economic and technical assumptions underlying the President's budget submission. The OMB update and final reports must also use these same economic and technical assumptions. Estimates in the update and final reports can only be revised to reflect laws enacted since the preview report. Under the old G-R-H law, OMB initial and final reports used revised economic and technical assumptions, consistent with the updated assumptions in the *Mid-Session Review of the Budget*.

The BEA has made other changes in the process as well. For the current year, a "within-session" sequester report is now required if supplemental appropriations are enacted before July 1st and cause a breach of the current year discretionary limits. For the budget year, the initial Presidential sequester order is no longer required, and the final report and final Presidential order are submitted after the session of Congress has ended instead of on a fixed date.

Sequestration Report or Order	Date
Preview:	
CBO report	5 days before President's budget submission.
OMB report	President's budget submission.
Within-session:	
CBO report	Before July 10 (if required).
OMB report and Presidential order	Before July 15 (if required).
Update:	
CBO report	August 15.
OMB report	August 20.
Final:	
CBO report	10 days after end of session of Congress.
OMB report and Presidential order	15 days after end of session of Congress.

As required by the BEA, this OMB preview report includes estimates of discretionary, pay-as-you-go, and deficit sequestration based on current law. This information is presented below.

Discretionary Sequestration Report

cretionary programs are, in general, those that their program levels established annually through appropriations process. The scorekeeping guidelines mpanying the BEA identify accounts with discre- ry resources. The BEA limits budget authority and ys available for discretionary programs each year gh 1995. Appropriations that cause either the et authority or outlay limits to be exceeded will er a sequester to eliminate any such breach. There is no requirement that the full amount available under the discretionary limits be appropriated.

For 1991–1993, limits are specified for three categories of discretionary programs: defense, international, and domestic. The limits on each of these three categories are enforced independently. Thus savings in one category cannot be used to increase spending in another. Similarly, a breach of a category limit will result only in a sequester in the category where the breach occurs. For 1994 and 1995, there are no separate categories for discretionary programs, and the caps apply to total discretionary budget authority and outlays.

Adjustments to the limits: preview report.—The BEA permits certain adjustments to the enacted discretionary limits—also known as caps. For each preview report submitted through 1995, the caps must be adjusted to reflect differences between actual and projected inflation and changes in concepts and definitions. Adjustments apply to the budget year and each outyear through 1995. Table XIV–1 shows the impact on the caps of these adjustments.

The enacted discretionary caps reflect assumptions about inflation, as measured by the gross national product implicit price deflator. These assumptions are presented in the law for 1990 through 1993. The BEA requires an inflation adjustment if the actual rate of inflation for a year is different from the rate identified in the law for that year. Because the actual rate of inflation for 1990 was 4.0 percent, slightly less than the estimated 4.1 percent, a downward adjustment has been made to all three of the discretionary caps for 1992 through 1995.

Changes in concepts and definitions since the BEA was enacted affect specific accounts, and they produce adjustments only to the category limits in which these accounts are included. One of these adjustments to the caps reflects new accounting for Federal credit programs, as required by the Federal Credit Reform Act of 1990, which was enacted as part of OBRA 1990. (See Chapter VIII.A., "Recognizing and Reducing Federal Underwriting Risks," for a discussion of credit reform.) Another adjustment is required by the BEA's new definition of budget authority, which changed the treatment of budget authority for specified trust funds. (See "Glossary of Budget Terms" in Part Eight for a discussion of the new definition of budget authority.) The outlay cap was adjusted to accommodate the new scoring guidelines as they apply to leases and lease-purchases that agencies may enter into under existing authority. The discretionary limits were further adjusted to reflect changes in the methodology for estimating social insurance administrative expenses as required by the BEA and as needed to make these estimates conform with the BEA baseline definitions.

Several cap adjustments reflect legislative action that caused a reclassification of certain programs, shifting them between the mandatory (i.e., direct spending) category and the discretionary category. For instance, the underlying authorizing statute of two commodity distribution programs—food donations to soup kitchens and temporary emergency food assistance—were amended to require annual appropriations, changing their status from mandatory to discretionary. In the case of interim assistance to States for legalization, the shift between categories was made to comply with the new scorekeeping guidelines that require the Appropriations Committees to be credited (or charged) for actions affecting mandatory programs. A Nuclear Regulatory Commission fee enacted as part of OBRA 19 generates collections that finance discretionary ac ties. The enacted discretionary caps did not ass these collections, so an adjustment was made.

Adjustments to the limits: after appropr tions.—The BEA identifies other adjustments to discretionary caps that can be made only after app priations have been enacted. Unless otherwise these adjustments can be made to reflect appropriatio action taken in all years from 1991 through 199 cover the following:

- Internal Revenue Service (IRS) funding.—Fu for the IRS compliance initiative above the C baseline levels estimated in June 1990. Adj ments are limited to the budget authority a outlay amounts specified in the law.
- Debt forgiveness.—For calendar years 1990 a 1991 only, the estimated cost of forgiving Egyp foreign military sales debt to the United Sta and any part of Poland's debt to the Un States.
- International Monetary Fund (IMF) funding Funding to cover the increase in the U.S. qu as part of the IMF Ninth General Review of Qu tas.
- Emergency appropriations.—Funding for accou that the President designates as emergency quirements and that the Congress so designa in statute. The BEA further specifies that costs of Operation Desert Shield are to be trea as emergency funding requirements.

In addition, the BEA provides special allowances budget authority in 1992 and 1993, and for outla in 1991 through 1995. The outlay allowance is intend to provide a cushion for technical estimating differenc between OMB and CBO. Thus an appropriation th meets both the budget authority and outlay caps unde CBO scoring, but exceeds the outlay cap under OM scoring, would not trigger a sequester if the excess less than the available outlay allowance. The dol amounts for the outlay allowances are specified in t BEA: In 1991 through 1993, the allowances are billion for defense, $1.5 billion for international, billion for domestic; and, in 1994 and 1995, $6.5 bil for total discretionary.

The special budget authority allowances apply marily to the international and domestic discretiona categories. The budget authority allowances are base on a percentage of the total adjusted discretionary its for budget authority in 1991 through 1993. The lays associated with the budget authority allowance are calculated based on spendout rates contained the law. These outlays are subtracted from the outla allowance, reducing the amount available for techni estimating differences. In addition to the budget thority allowances for the international and domest categories, there is a small budget authority allowa for technical estimating differences between OMB a CBO that can be applied to all three discretionary egories.

[1] End-of-session estimates do not include the Operation Desert Shield placeholder.

Several of these adjustments were made to the 1991 and subsequent caps following enactment of the 1991 appropriations bills, as reported in the *Final Sequester Report to the President and the Congress*, issued November 9, 1990. As shown in Table XIV–1, adjustments were made for Operation Desert Shield, debt forgiveness, and IRS funding. In addition, a portion of the outlay allowance was used for the international and domestic categories.

The actual adjustments to the discretionary caps to be included in the final sequester report at the end of this year's session of Congress cannot be determined until appropriations have been enacted. Table XIV–1 shows the end-of-session adjustments that would result if the President's discretionary proposals were enacted. The President's request includes funding in 1992 to cover the increase in the U.S. quota to the IMF and additional funding for the IRS compliance initiative. Although the President's budget includes a placeholder for 1991 supplemental appropriations for Operation Desert Shield, no adjustment was made to the cap. As noted above, funding for Operation Desert Shield (including Desert Storm) cannot trigger a sequester.

Consistent with the BEA, the President's request assumes an increase in budget authority and outlays for the international and domestic categories based on the special allowance formulas. For international affairs programs, the adjustment in 1992 would increase budget authority by $1.0 billion and outlays by $0.4 billion. For domestic programs, the adjustment in 1992 would be $1.5 billion in budget authority and $0.8 billion in outlays. The remaining outlay allowance available for technical estimating differences in 1992 would be [illegible] billion for defense, $1.1 billion for international affairs and $1.7 billion for domestic.

The President's budget proposals for discretionary programs are below the adjusted caps, as currently estimated, in all years through 1995 and in all three discary categories in 1992 and 1993. Table XIV–2 compares the President's proposals with the adjusted discretionary caps.

Sequester determinations.—Five days after enactment of an appropriations act, OMB must submit a report to Congress estimating the budget authority and outlays provided by the legislation for the current year and the budget year. These estimates must be based on the same economic and technical assumptions used for the most recent President's budget. In addition, the report must include CBO estimates and explain the differences between the OMB and CBO estimates. The OMB estimates are used in all subsequent calculations to determine whether a breach of any of the budget authority or outlay caps has occurred, and whether a sequester is required.

Compliance with the discretionary caps is monitored throughout the fiscal year. The first determination of whether a sequester is necessary for a given fiscal year occurs when the final sequestration report is issued after Congress adjourns to end a session—near the beginning of the fiscal year. The monitoring process begins again after Congress reconvenes for a new session. Appropriations for the fiscal year in progress that cause a breach in any of the category caps would, if enacted before July 1st, trigger a sequester in that category. When such a breach is estimated, a "within-session" sequestration report and Presidential order are issued. For a breach that results from appropriations enacted on or after July 1st, reductions necessary to eliminate the breach are not applied to current year funds. However, the corresponding caps for the following fiscal year are reduced by the amount of the breach.

A within-session sequester can only be caused by newly enacted appropriations. Reestimates of budget authority and outlays for already enacted funds cannot trigger a sequester. A within-session sequester for any of the three discretionary categories for 1991 is possible only if additional appropriations for 1991 are enacted. OMB reported in the *Final Sequester Report to the President and the Congress* that enacted defense and domestic appropriations for 1991 were within the prescribed spending limits. The enacted 1991 appropriations for international affairs exceeded the category limit because of an unintended error in legislative drafting. A Presidential sequester order was issued requiring across-the-board reductions in the international category to eliminate the breach.

Composition of discretionary outlays.—Approximately 60 percent of total discretionary outlays are associated with budgetary resources subject to sequester in 1992. Those outlays exempt from sequester are primarily associated with obligations made in prior years. The law exempts relatively few discretionary programs from sequester, although it limits the sequester on certain discretionary health programs.

	OL	–21	–1,519	–169	–526

[1] The President's request does not reflect the Operation Desert Shield placeholder.

[2] The discretionary limits include adjustments to be made following enactment of appropriations proposed in the President's budget. See Table XIV–1 for details.

The President has the authority to exempt any military personnel account from sequester or provide for a lower uniform percentage reduction than would otherwise apply. Presidential notification to Congress concerning the treatment of military personnel is not required until August 10th of each year. An estimated 65 percent of 1992 outlays for defense discretionary programs are associated with budgetary resources subject to an across-the-board percentage reduction. If the military personnel accounts were exempted by the President, about 40 percent of defense discretionary outlays would be associated with sequestrable resources.

Approximately 55 percent of international discretionary outlays are associated with sequestrable budgetary resources in 1992. For domestic discretionary programs in 1992, nearly 55 percent of outlays are associated with sequestrable budgetary resources. About 5 percent of domestic discretionary outlays are associated with certain discretionary special rule programs, the largest of which is veterans medical care. The law limits spending reductions for these programs to 2 percent.

A sequester does not reduce outlays directly; rather it permanently cancels budget authority and other authority to obligate and expend funds (except that special rules apply to amounts sequestered in special and trust funds). For defense discretionary programs, sequestrable budgetary resources for 1992 are defined to be new budget authority provided in appropriations for 1992 and unobligated balances of budget authority provided in previous years. For international and domestic discretionary programs, sequestrable budgetary resources for 1992 are new budget authority and obligation limitations provided by appropriations action.

Federal administrative expenses for most programs and activities are sequestrable, including social security and otherwise exempt programs that are self-supporting. Although budgetary resources available for Federal pay are subject to sequestration, the law provides that rates of pay for civilian employees (and rates of pay, basic subsistence allowances, and basic quarters allowances for members of the uniformed services), or any scheduled pay increases, may not be reduced pursuant to a sequestration order. For discretionary credit programs, the subsidy budget authority provided in the credit program accounts is sequestrable. Direct loan obligations and guaranteed loan commitments are no longer sequestrable resources beginning in 1992. Nevertheless, they would be reduced indirectly by a sequester of budget authority in the credit program accounts which is required in order to make new loans and commitments.

Sequester calculations.—If either the budget authority or outlay caps were exceeded in a discretionary category, an across-the-board reduction of sequestrable budgetary resources in that category would be required to eliminate the breach. The percentage reduction for the special rule programs would be limited to 2 percent. Once this limit is reached, the uniform percentage reduction for all other discretionary sequestrable resources in that category would be increased to a level sufficient to achieve the required reduction.

If both the budget authority and outlay caps were exceeded, a sequester would first be calculated to eliminate the budget authority breach. If estimated outlays still remained above the cap, even after applying the available outlay allowance, further reductions in budgetary resources to eliminate the outlay breach would then be required.

Pay-As-You-Go Sequestration Report

This section discusses the enforcement procedures that apply to the remainder of the budget—direct spending and receipts. The BEA defines direct spending as budget authority provided by law other than appropriations acts, entitlement authority, and the food stamp program. Social security and the Postal Service are not subject to pay-as-you-go enforcement, nor is legislation specifically designated as an emergency requirement.

The BEA requires that all direct spending and receipts legislation enacted beginning with the 102nd Congress must, in total, be deficit neutral or reduce the deficit in every year through 1995. Although the pay-as-you-go requirements are generally enforced on a year-to-year basis, there are certain tradeoffs between the budget year and the prior year, as explained below. Savings in the outyears, however, cannot offset costs in the budget year. Deficit neutrality is enforced by sequester.

Sequester determinations.—The BEA requires that, five days after enactment of each piece of direct spending or receipts legislation, OMB submit a report to Congress estimating the change in outlays or receipts for each fiscal year through 1995 resulting from the legislation. The estimates must use the economic and technical assumptions underlying the most recent President's budget. Changes are measured relative to the baseline estimates for direct spending and receipts included in that budget. In addition, the report must include CBO estimates and an explanation of differences between the OMB and CBO estimates. Under the BEA, the OMB estimates are used to determine if the pay-as-you-go requirements have been met.

The cumulative nature of the pay-as-you-go process requires maintaining a "scorecard" that shows, beginning with the 102nd Congress, the deficit impact of enacted direct spending and receipts legislation and required pay-as-you-go sequesters. The preview reports

Table XIV–3. **DEFICIT IMPACT OF ADMINISTRATION PAY-AS-YOU-GO PROPOSALS**

(In billions of dollars)

	1991	1992	1993	1994	1995	1991–95
Deficit impact of Administration pay-as-you-go proposals:						
Direct spending (see Table II–8)	–0.1	–6.3	–9.3	–9.0	–11.0	–35.8
Receipts:						
Extenders (selected)	*	1.1	1.8	1.7	2.0	6.6
Long-term investment incentive[1]	–0.4	–3.0	–1.7	–0.9	–1.8	–7.8
All other	*	–0.8	–0.6	0.2	0.9	–0.3
Total, receipts	–0.4	–2.7	–0.4	0.9	1.0	–1.5
Total, receipts with long-term investment incentive at zero	*	0.3	1.3	1.8	2.8	6.3
Total, net deficit impact	–0.5	–9.0	–9.8	–8.1	–9.9	–37.3
Total, net deficit impact with long-term investment incentive at zero	–0.1	–6.0	–8.1	–7.2	–8.1	–29.5

[1] The proposal to enhance long-term investment is shown as estimated by the Treasury Department's Office of Tax Analysis (OTA). Because the methodological differences among OTA, Congressional estimators, and outside experts have not yet been resolved, totals are presented with the Administration's estimates and with a zero (neutral) entry for this proposal.

are intended to show how these past actions affect the upcoming fiscal year. Because the process begins with this session of Congress, there are no pay-as-you-go estimates of legislation or sequesters from previous years to include in this preview report.

The pay-as-you-go requirements are enforced only once a year—at the time the final sequestration report is issued. (There are no within-session sequestration reports for pay-as-you-go enforcement.) The final report presents the "scorecard" of all direct spending and receipts legislation enacted and sequesters implemented beginning with the 102nd Congress. The report estimates the cumulative net impact on the deficit of those actions for the fiscal year that just ended and the fiscal year just beginning. If any deficit increase is estimated for these fiscal years, a reduction of sequestrable mandatory resources in the budget year would be required to offset the amount of the combined increase.

A pay-as-you-go sequester is not currently estimated for this year. Such a sequester would be required at the end of the session only if enacted direct spending and receipts legislation increase the combined 1991 and 1992 deficits. Only the action taken during this session will have an impact on this year's final sequester estimates. In future years, however, estimates of action taken in prior years and the impact of prior-year sequesters will be combined with the estimates of newly enacted legislation to determine whether the pay-as-you-go requirements have been met.

The President's budget includes a variety of proposals affecting direct spending and receipts. As shown in Table XIV–3, enactment of these proposals would yield net deficit reduction in each fiscal year, 1991 through 1995. If the President's proposals were enacted, significant pay-as-you-go savings would be created through 1995, and no sequester would be required. For additional details on the Administration's direct spending and receipt proposals, see Chapter II, "Director's Introduction and Overview Tables," and Chapter X, "Receipts, User Fees, and Other Collections."

If the net of all legislation enacted during this year's session of Congress increased the deficit in each fiscal year, 1992 through 1995, a sequester would be required at the end of the session to eliminate the increase in the 1992 deficit. But a sequester of direct spending resources primarily yields one-year savings. Thus the 1992 sequester would not eliminate the deficit increase for 1993–1995 caused by the enacted legislation. The preview report accompanying the 1993 budget would, therefore, show that a sequester would be required in 1993. To avoid another sequester, Congress would have to enact new legislation to offset the estimated increase in the 1993 deficit caused by the legislation enacted during the previous session.

Composition of direct spending outlays.—For all direct spending, including social security benefits, more than 80 percent of outlays are associated with budgetary resources exempt from sequestration in 1992. The burden of sequester falls on programs that comprise the remaining 20 percent of direct spending outlays. Of the total estimated 1992 direct spending outlays, about 15 percent are associated with programs subject to certain special rules, and less than 5 percent are associated with budgetary resources subject to an across-the-board percentage reduction.

Most direct spending programs are exempt from sequestration. Social security benefits, net interest, certain low-income programs, most Federal retirement and disability benefits, regular State unemployment insurance benefits, veterans compensation and pensions, and the Postal Service are all exempt from sequestration. The Federal Deposit Insurance Corporation, Resolution Trust Corporation, and other deposit insurance programs are exempt from sequester.

Certain programs and activities, while not exempt, are subject to special rules that limit the amount of the spending reduction. For medicare, a pay-as-you-go sequester reduction is limited to 4 percent annually. For three programs specified in the law, the total amount of tne automatic spending increase is sequestrable, but the program base is exempt. The Federal share of extended unemployment benefits is sequestrable, but if States act to increase their share by the amount of the reduction in the Federal share, total budget outlays, which include both the Federal and State shares, will not be changed by the sequester.

Sequester calculations.—If a pay-as-you-go sequester were required, sequester reductions would be calculated as follows: First, savings from eliminating automatic spending increases in three specific programs—the National Wool Act, the special milk program, and vocational rehabilitation basic State grants—would be applied to the required reduction in direct spending outlays.

Second, if further reductions were required, the maximum permissible reductions to the guaranteed student loan and foster care and adoption assistance programs would be made.

Third, any reductions in direct spending programs still required would be applied to sequestrable budgetary resources on a uniform percentage basis. O the 4 percent limit on medicare reductions is reac the uniform percentage reduction of all o sequestrable direct spending resources would be creased to a level sufficient to achieve the requ reduction in direct spending.

The law requires special calculations to achieve uniform percentage reduction for child support enfor ment and for the JOBS portion of aid to families w dependent children. Sequester savings from the Co modity Credit Corporation (CCC) would include savi from both the budget year and the following year. a pay-as-you-go sequester were required in 1992, instance, CCC outlay reductions in 1993 resulting fr contract adjustments made in 1992 because of the quester would be credited to the overall direct spendi outlay reduction required for 1992.

Deficit Sequestration Report

The BEA specifies maximum deficit amounts for 1991 through 1995. These deficit amounts reflect economic and technical assumptions current at the time the BEA was enacted. For the 1992 and 1993 budgets, the BEA requires adjusting the maximum deficit amounts for all years through 1995 to reflect up-to-date economic and technical assumptions. For the 1994 and 1995 budgets, the President has the option of whether to continue making these economic and technical adjustments to the maximum deficit amounts.

As specified in the BEA, the current maximum deficit amount reflects the on-budget current law levels for direct spending and receipts, and the cap levels f discretionary programs. Table XIV–4 shows the curre maximum deficit amounts and the current estima deficits calculated under BEA rules. It also shows t maximum deficit amounts as specified in OBRA 199 A deficit sequester would be required if the estima deficit were to exceed the maximum deficit amount b more than the allowed margin—zero in 1992 and 199 and $15 billion in 1994 and 1995. The current maxi mum deficit amounts and estimated deficits are iden tical. There is no excess deficit, and thus no sequester estimated for 1992.

Table XIV–4. **MAXIMUM DEFICIT AMOUNTS, 1992–1995**

(In billions of dollars)

	1992	1993	1994	1995

OBRA 1990 maximum deficit amounts	317.0	236.0	102.0	83.0

Comparison of OMB and CBO Estimates

In its preview report, CBO estimates a maximum deficit amount for 1992 of $352.6 billion, $2.8 billion above the OMB estimate. As presented in Table XIV–5, these differences are the result of the different economic and technical assumptions used by OMB and CBO. The Administration and CBO have similar forecasts of GNP, but CBO's is somewhat lower than the Administration's in 1994 and 1995, contributing to CBO's lower receipts estimates. In addition, CBO has slightly lower corporate profits and taxable personal income as a percentage of GNP. CBO's interest rate assumptions are somewhat higher than the Administration's, resulting in higher interest costs, which are the primary econom reason for the different outlay estimates.

For discretionary programs, OMB and CBO estimates of the discretionary spending caps differ primarily due to the different treatment of social security administrative expenses. OMB interprets the BEA's definition of the discretionary category as requiring social security administrative expenses to be included in the discretionary category. CBO interprets the law as requiring that all of social security, including the administrative expenses, be excluded from all BEA calculations. The remaining outlay differences and the budget authority differences are due in part to differences in the credi

Table XIV–5. **DIFFERENCES BETWEEN OMB AND CBO MAXIMUM DEFICIT AMOUNTS**

CBO discretionary budget authority	508.6	517.1	516.7	524.1

form adjustments OMB and CBO made to the discretionary caps.

The OMB and CBO estimates for deposit insurance differ primarily due to assumptions about the Resolution Trust Corporation's (RTC) working capital needs. Although OMB and CBO have nearly identical estimates of thrift losses in 1992 and 1993, CBO generally estimates higher RTC outlays for resolving these cases. The large difference in 1994 reflects the CBO assumption that RTC will continue covering the losses of failed thrifts in that year. OMB assumes that by 1994 RTC will no longer be resolving cases. CBO's higher estimates for RTC are slightly offset by lower estimates than OMB for the Bank Insurance Fund (BIF). Compared to OMB, CBO assumes that BIF will collect more bank premiums and that, consistent with its economic assumptions, there will be fewer bank failures.

OMB estimates for medicaid are higher than CBO's due largely to different assumptions about program growth. Recently, States have misestimated budget year medicaid expenditures, resulting in low Federal estimates. OMB estimates rely on statistical models to adjust for these estimating problems. However, as discussed in Chapter IX.A., "Strengthening Management and Accountability," there remains a significant gap in medicaid program information, which leads to a great uncertainty about the magnitude of expenditure growth. In the coming year, OMB will work closely with the Department of Health and Human Services and CBO to develop better systems for estimating medicaid expenditures. For medicare, the differences between OMB and CBO are primarily due to different assumptions about growth utilization and health care services. Here again, gaps in medicare financial reporting compromise the reliability of both OMB and CBO data.

XV. CURRENT SERVICES ESTIMATES

XV. CURRENT SERVICES ESTIMATES

The Congressional Budget Act of 1974, as amended, es that the President submit current services esti- to Congress. These estimates provide a base t which the Administration's budget proposals, er proposals, may be compared. In general, cur- ervices estimates are designed to show what out- receipts, and budget authority would be if no pol- anges were made. Enacted last year as part of Omnibus Reconciliation Act of 1990 (OBRA 1990), udget Enforcement Act (BEA) set limits on discre- y spending and requires that direct spending and ts legislation must, in total, be at least deficit al (see Chapter XIV, "Budget Enforcement Act ew Report"). The BEA covers 1991 through 1995. current services estimates presented in this chap- e consistent with the discretionary totals that will forced by the BEA and current law estimates for t spending and receipts.

e current services estimates are shown on a con- ted basis. The off-budget outlays and receipts of ocial security trust funds and the Postal Service are combined with on-budget amounts to calculate budget totals. The concepts used in developing the nt services estimates are described below.

ble XV–1 compares the current services and Ad- stration outlay, receipt, and deficit estimates for through 1996. The Administration's proposals d reduce the current services deficit by $4.0 billion 992. Between 1992 and 1996, the cumulative deficit ction proposed by the Administration totals $35.5 n. Pay-as-you-go proposals for direct spending and receipts would reduce the deficit by $0.5 billion and $9.0 billion in 1991 and 1992, respectively. The Administration's request for discretionary programs, in total, is slightly under the 1992 discretionary cap. The Administration's budget also includes a placeholder for 1991 supplemental appropriations to fund Operation Desert Shield (including Desert Storm) that, combined with anticipated contributions from other countries, increases the deficit by $8.2 billion and $4.6 billion in 1991 and 1992, respectively. Finally, other primarily technical changes, such as accrual adjustments for Defense Department and Public Health Service retirement, and debt service would increase the deficit by $0.4 billion in 1992.

Direct spending and receipts.—The current services estimates for direct spending programs and receipts reflect the future implications of current law, including the impact of final and proposed regulations. The current services estimates assume that expiring provisions providing revenues and spending authority will terminate as scheduled. Expiring provisions affecting excise taxes dedicated to trust funds, however, are assumed to be extended at current rates.

The current services estimates are based on the same technical assumptions, such as beneficiary levels and crop forecasts, and economic projections used in developing the President's policy estimates. In addition, the policy and current services estimates for deposit insurance are identical, reflecting amounts sufficient to address insolvencies in the thrift and banking industries.

Table XV–1. **CURRENT SERVICES AND ADMINISTRATION BUDGET TOTALS, 1990–1996**

* $50 million or less.

Note: Estimates for 1990 and 1991 are presented on a pre-credit reform basis. The estimates for 1992 through 1996 use credit reform accounting.

Discretionary programs.—The current services estimates for both defense and nondefense discretionary programs are, in general, based on the enacted 1991 appropriations level. Resources are inflated to reflect year-to-year changes in the discretionary caps.

The 1991 estimates are the current estimates of enacted 1991 appropriations. For 1992 through 1995, the current services estimates match the adjusted discretionary caps. As discussed in the BEA preview report, the discretionary caps are to be adjusted following the enactment of appropriations. For purposes of estimating these adjusted caps, enactment of the President's proposals are assumed. Estimates of the end-of-session adjusted caps are shown in Table XIV–1 in the previous chapter. There are no discretionary caps for 1996, so the current services estimates for that year reflect the President's request for discretionary programs. Because the Administration's proposals for 1992 through 1995 are consistent with the discretionary caps, the 1996 proposals provide a reasonable approximation of an "extension" of the caps.

Credit programs.—The Federal Credit Reform Act of 1990 requires, beginning in 1992, new accounting for credit programs. Under credit reform, credit transactions are recorded in three types of accounts: program, financing, and liquidating accounts. Program accounts include the subsidy and administrative costs. The subsidy reflects the net present value of the cost to the Government over the life of the loan measured in the year the action is taken. Most program accounts are classified as discretionary. Financing accounts receive the subsidy from the program accounts and reflect all cash flows of the credit transactions, including the disbursement of direct loans and guarantee claims and the collection of loan repayments and fees. Financing accounts are scored as a means of financing and therefore excluded from the budget totals. Finally, the costs associated with pre-1992 loan obligations and commitments are displayed in liquidating accounts. All liquidating accounts are classified as mandatory.

The current services concepts for mandatory and discretionary programs discussed above apply to credit programs. Estimates for mandatory credit programs reflect subsidies for new credit activity permitted under current law. For discretionary credit programs, subsidy amounts and administrative costs are inflated to reflect year-to-year changes in the discretionary caps. Because no subsidy amounts were appropriated in 1991, an estimate of the subsidy implied by the enacted program level was used as the base to estimate the current services levels for 1992 through 1996.

The shift in accounting techniques creates a mismatch when current services estimates from 1990 and 1991, presented on a pre-credit reform basis, are compared with those from 1992 through 1996, which follow the new credit accounting rules. In total, the mismatch is rather small; however, large discrepancies can appear for particular programs.

For a more detailed discussion of credit reform, see Chapter VIII.A., "Recognizing and Reducing Federal Underwriting Risks."

Economic assumptions.—The current services estimates are based on the same economic assumptions as the President's budget proposals. The economic assumptions assume that the President's budget proposals will be adopted. Continuation of all programs and tax laws unchanged would result in different economic conditions than would occur under the budget proposals.

Changes in economic conditions significantly affect budget estimates because of their effects on tax receipts, unemployment benefits, interest on the federal debt, and other programs where spending is sensitive to economic factors. As a result, if different economic assumptions were used in developing the current services and policy estimates, it would be very difficult to separate the effects of policy differences from the effects of differences in the economic assumptions.

The economic assumptions common to the budget and the current services estimates are summarized in Table XV–2. They are discussed in more detail in Chapter III, "Economic Assumptions and Sensitivities."

Current Services Receipts

Table XV–3 shows current services receipts by major source. Current services receipts are projected to increase by $71.2 billion from 1991 to 1992 and by $402.5 billion from 1992 to 1996, largely due to assumed increases in incomes resulting from both real economic growth and inflation.

Table XV–2. **SUMMARY OF ECONOMIC ASSUMPTIONS, 1990–1996**

(Fiscal years)

	1990	1991	1992	1993	1994	1995	1996
Gross national product (in billions of current dollars)	5,406	5,616	5,986	6,424	6,876	7,334	7,809
Constant dollar GNP (percent change)	1.3	–0.5	2.4	3.5	3.3	3.1	3.0

Other	55.5	56.2	56.5	56.5	0.3
Total	**1,031.3**	**1,091.1**	**1,162.3**	**1,165.0**	**73.9**
On-budget	(749.7)	(792.8)	(847.1)	(849.8)	(57.0)
Off-budget	(281.7)	(298.3)	(315.3)	(315.3)	(17.0)

Individual income taxes are estimated to increase by $35.0 billion from 1991 to 1992 under current law. This growth of 7.1 percent is the effect of increased collections resulting from rising personal incomes, the changes in individual income tax rates and the limitations on personal exemptions and itemized deductions provided in OBRA 1990, and the expiration of several credits and exclusions from tax on December 31, 1991. These expiring provisions include the exclusion for employer-provided educational assistance and the low income housing tax credit. Individual income taxes are projected to grow at an average annual rate of 9.0 percent between 1992 and 1996. The estimates for 1996 reflect expiration of the limitations on personal exemptions and itemized deductions on December 31, 1995.

Corporation income taxes under current law are estimated to grow by $6.9 billion or 7.2 percent from 1991 to 1992, in large part due to higher corporate profits. These estimates also reflect the expiration of the research and experimentation (R&E) credit, the R&E allocation rules, the targeted jobs credit, and several other credits and exclusions from tax that expire on December 31, 1991. Corporation income taxes are projected to increase at an average annual rate of 8.1 percent from 1992 to 1996.

Social insurance taxes and contributions are estimated to increase by $26.2 billion between 1991 and 1992, and by an additional $138.7 billion between 1992 and 1996. The estimates reflect assumed increases in total wages and salaries paid, and scheduled increases in the social security taxable earnings base from $53,400 in 1991 to $69,000 in 1996, and increases in the medicare taxable earnings base from $125,000 in 1991 to $162,600 in 1996.

Current services excise taxes are estimated to increase by $2.9 billion from 1991 to 1992, in large part due to legislated increases in excise taxes provided in OBRA 1990. Excise taxes are estimated to increase by $3.6 billion from 1992 to 1996. The estimates for 1992 through 1996 assume extension of the following taxes, which are scheduled to expire in 1995: the highway fuels taxes and other highway user taxes deposited in the Highway Trust Fund, the motor boat fuels taxes and certain other taxes deposited in the Aquatic Resources Trust Fund, the Hazardous Substance Superfund Trust Fund taxes, and the Airport and Airway Trust Fund taxes. The estimates also reflect extension of the Oil Spill Liability Trust Fund taxes and the Vaccine Injury Compensation Trust Fund taxes that are scheduled to expire December 31, 1994, and December 31, 1992, respectively.

Other current services receipts (estate and gift taxes, customs duties, and miscellaneous receipts) are projected to increase by $7.6 billion from 1991 to 1996.

Current Services Outlays

Current services outlays are estimated to total $1,447.2 billion in 1992. The increase in current services outlays from 1991 to 1992 is $45.8 billion, or 3.3 percent. Between 1992 and 1996 current services outlays are projected to increase at an average annual rate of 1.7 percent.

Changes in current services outlays from 1991 to 1992 for entitlements and other mandatory programs are largely due to changes in the number of beneficiaries, to cost-of-living adjustments, and to revised estimates of commercial bank and savings and loan association insolvency costs. In the case of annually appropriated programs, the change reflects year-to-year growth permitted under the discretionary caps.

Table XV–4 shows outlay estimates for current services and Administration budget proposals by function. These same estimates, arrayed by agency, are presented in Table XV–5. A more detailed comparison (by function, subfunction, and program) of current services and Administration policy outlay estimates appears in Table XV–11 at the end of the chapter.

Off-budget	(225.1)	(237.9)	(251.3)	(251.7)

Note: Estimates for 1990 and 1991 are presented on a pre-credit reform basis. The estimates for 1992 use credit reform accounting.

Current services outlays for social security are estimated to increase by $19.4 billion between 1991 and 1992, from $269.0 billion in 1991 to $288.4 billion in 1992. Medicare outlays are estimated to increase by $12.5 billion, from $104.4 billion in 1991 to $116.9 billion in 1992. Outlays for medicaid grants are estimated to increase by $8.3 billion, from $51.6 billion in 1991 to $59.9 billion in 1992. These increases in medicare and medicaid outlays are largely the result of increases in medical care prices and utilization. Table XV–6 shows caseload projections for these and other major benefit programs and other selected programmatic assumptions.

Defense (050) outlays are estimated to decrease by $4.3 billion between 1991 and 1992, from $299.5 billion to $295.2 billion, consistent with the defense discretionary spending limits. These defense estimates do not reflect the placeholder for Operation Desert Shield, which includes Desert Storm.

Outlays for deposit insurance decrease by $23.4 billion, from $111.5 billion in 1991 to $88.1 billion in 1992. Spending by the Resolution Trust Corporation (RTC) to resolve savings and loan insolvencies, and outlays by the Bank Insurance Fund (BIF) of the Federal Deposit Insurance Corporation (FDIC) to resolve bank insolvencies, decline between 1991 and 1992 by $8.5 billion and $6.2 billion, respectively. This estimated decline primarily reflects increased receipts in 1992 from the sale of assets of past failed thrifts and banks. These estimates assume present RTC funding and BIF obligation constraints are raised. A decrease of $7.8 billion in outlays between 1991 and 1992 for the Federal Savings and Loan Insurance Corporation (FSLIC) Resolution Fund is due to the completed restructuring of expensive pre-1989 contracts of the former FSLIC in 1991.

Current Services Budget Authority

Current services budget authority is estimated to total $1,585.6 billion in 1992. Table XV–7 shows budget authority estimates for current services and Administration policy by function. These estimates, arrayed by agency, are presented in Table XV–8. A more detailed comparison (by function, subfunction, and program) of current services and Administration policy budget au-

[1] Average monthly participation.

[2] This measures unemployment under State regular unemployment insurance as a percentage of covered employment under that program. It does not include recipients of extended benefits under that program.

thority estimates appears in Table XV–11 at the end of the chapter.

Increases in current services budget authority between 1991 and 1992 generally reflect year-to-year increases permitted under the discretionary caps for discretionary programs and the higher funding levels that would be necessary to maintain current law program levels for mandatory programs. In the case of most trust funds, the funds' receipts automatically become budget authority; thus increases in budget authority for these funds simply reflect year-to-year growth in expected receipts. As defined in the BEA, however, budget authority for the medicare, unemployment, and railroad retirement trust funds is equal to estimated obligations to be incurred during the fiscal year for benefit, administrative, and other expenses.

Current Services Outlays and Budget Author by Function and Program

Table XV–9 presents the current services estima and the Administration's proposed budget by categ Table XV–10 presents outlay estimates of manda and related programs for 1990 through 1996. Ta XV–11 presents current services and Administra budget authority and outlay estimates in funct order, with subfunction and program level detail.

PART SIX

ALTERNATIVE BUDGET PRESENTATIONS

INTRODUCTION

The budget presentation and concepts used in most of this document are the traditional ones used in presenting a President's budget. In many respects the concepts and presentation are legally required and are effective tools for Federal budgeting.

There is, however, no single "right" way of looking at Federal receipts and outlays and therefore no single "right" structure for the Federal budget.

- The dividing line between the Federal Government and the private sector cannot be delineated unequivocally.
- Some Federal activities may not be quantifiable or at least not quantifiable in a way that is commensurate with budget receipts and expenditures.
- Federal finances may be presented according to alternative conceptual structures for specialized purposes other than budgeting.
- Budget data may be organized in alternative ways to view spending or receipts from complementary perspectives.
- As the Government, the economy, the political process, and the technical capability of budgeting change over time, the appropriate scope and organization of the budget may also change.

The form of the budget is therefore continually being adjusted to the needs of the President and the Congress for establishing priorities and controlling Federal receipts, expenditures, and borrowing; the needs of the Federal agencies for a workable system of effective program management based on legal requirements and policy guidelines; and the needs of the public, including the press and independent researchers, for information with which to judge Federal operations. The change in budgeting for credit in the present budget is a major example of such a development.

The current budget concept, known as the "unified budget," was developed in conformance with the recommendations of the President's Commission on Budget Concepts (1967). While various adaptations have occurred over the years, the Commission's report continues to provide the basic framework for Federal budget concepts and presentations. The unified budget is intended to be comprehensive, including the full scope of Federal programs. It encompasses a diverse array of activities—most unique to government and others similar to business operations—and must accommodate extensive and sometimes inconsistent legal requirements. It is based primarily on the Government's cash receipts and outlays.

The Comptroller General and some Members of Congress, accountants, corporate leaders, and others have criticized the current budget presentation. Some, notably the General Accounting Office, believe the budget's primary focus on obligation controls and cash flows distorts decisionmaking, prejudicing investment and understating liabilities. Others decry the artificiality, even gimmickry, of certain distinctions between on-budget and off-budget, and the practice of classifying certain Federal entities (such as REFCORP) as non-budgetary Government-sponsored enterprises. On the other hand, some argue that the budget should be more like State budgets that separate activities financed by general funds from those financed by earmarked funds; some argue that the current practice of including business-type income as an offset to outlays should be replaced by including such income in receipts and showing outlays on a gross basis; and others argue that the retirement trust funds and the debt and interest portions of the budget should be separately displayed.

There is no dispute that receipts and spending should be viewed in more than one way. Some standard alternatives have been used longer than the unified budget and were taken for granted or strongly endorsed by the President's Commission on Budget Concepts. And there is a degree of merit in many of the criticisms of the unified budget. Accordingly, this part of the budget document provides a selection of alternative budget presentations—in order to view Federal finances in different ways, to display alternatives to those who have not previously considered them, and to allow those who criticize the conventional approach to examine the effects of alternatives.

The alternative budget presentations are considered in the next six chapters. The first of these chapters describes the Federal sector as measured in the national income and product accounts, which are an integrated set of measures of aggregate economic activity, including the gross national product, prepared for many years by the Department of Commerce. The following two chapters present longstanding alternative ways of dividing up the budget totals that complement the normal presentation. One divides the budget between trust funds and Federal funds; the other focuses on physical capital.

The final three chapters in this part of the budget document show alternative presentations that could replace the unified budget, rather than complement it. These presentations and the unified budget all contain similar information but are arranged differently. The principal difference is in the focus, that which is highlighted for decision makers and the public. The focus, in turn, may affect the incentive to make one budgetary decision rather than another. The alternative presentations are not exact but rather are approximations that illustrate the general concepts and some of the key considerations. These three presentations are:

- The proposal made by the General Accounting Office, which focuses separately on operating and capital uses, on Federal, trust, and enterprise funds, and on aggregate totals.

- A budget cast in the form of the State of California's budget, which, like most State budgets, focuses on individual funds rather than consolidated totals.
- A budget divided threefold among an operating fund, a retirement fund, and a debt and interest fund.

The three presentations are compared with each other and the unified budget at the end of the chapter discussing the last of these presentations, Chapter XXI

XVI. NATIONAL INCOME AND PRODUCT ACCOUNT PRESENTATION

XVI. NATIONAL INCOME AND PRODUCT ACCOUNT PRESENTATION

National Income and Product Accounts (NIPAs) integrated set of measures of aggregate economic that are prepared by the Department of Com- One of the many purposes of the NIPAs is to e the Nation's total current production of goods vices, known as gross national product (GNP), incomes generated in its production. Because PAs are widely used in economic analysis, it rtant to show the NIPA presentation of Federal tions.

is the sum of the net products of the household, s, government, and foreign sectors. Federal tions are included in the NIPAs as part of the ment sector. The concepts for the Federal sector een designed to measure certain important eco- effects of Federal transactions in a way that stent with the conceptual structure of the entire integrated accounts. The NIPA Federal sector itself a budget, for it is not a financial plan posing, determining, and controlling the fiscal es of the Government. Rather, it is an accounting tion of the budget to meet specialized and impor- eds, chiefly the measurement of the impact of l receipts, outlays, and the deficit on the national y. NIPA concepts differ in many ways from concepts, and therefore the NIPA presentation eral finances is significantly different from that budget.

is a measure of final output which excludes ediate product to avoid double counting. Govern- purchases of goods and services are included in s part of final output, together with personal nption expenditures, gross private domestic in- nt, and net exports of goods and services. Other l expenditures—transfer payments, grants to nd local governments, subsidies, and net interest nts—are not part of final output. Rather, they nsfers of income to others, whose consumption, ment, purchases, or transactions with foreigners rt of final output. An entire set of receipt and liture transactions of the Federal Government is ed as one sector of the NIPAs; however, when ccounts for all the sectors are consolidated into mary account for the Nation as a whole, transfer nts, grants, subsidies, and net interest expendi- are canceled out by receipt of those payments ome in other sectors. This leaves only purchases included in final output.

rences Between the NIPAs and the Budget

eral transactions in the NIPAs are measured ac- g to NIPA accounting rules in order to be compat- with the purposes of the NIPAs and other trans- s recorded in the NIPAs. As a result they differ the budget in netting, timing, and coverage. These differences cause total receipts and expenditures in the NIPAs to differ from total receipts and outlays in the budget. Differences in timing and coverage also cause the deficit to differ. Netting differences have the same effect on both receipts and expenditures and thus have no effect on the deficit. Besides these differences, the NIPAs combine transactions into different categories from those used in the budget.

Netting differences arise when the budget records certain transactions as offsets to outlays while they are recorded as receipts in the NIPAs (or vice versa). The budget treats all income that comes to the Government due to its sovereign powers—mainly, but not exclusively, taxes—as Governmental receipts. However, any intragovernmental income from one account to another is offset against outlays rather than being recorded as a receipt. Government contributions for employee retirement is one example. The budget offsets these payments against outlays while the NIPAs treat the Federal Government as any other employer and show contributions for employee social insurance as expenditures by the employing agencies and receipts to the appropriate social insurance funds. The NIPAs also include certain imputations which the budget does not. For example, unemployment benefits for Federal employees are financed by direct appropriations rather than social insurance contributions. The NIPAs impute social insurance contributions by employing agencies to finance these benefits.

The budget also offsets against outlays any income that arises from voluntary business-type transactions with the public. The budget classifies Medicare Part B premiums as business-type transactions, whereas the NIPAs record them as receipts.

Timing differences occur for receipts because the NIPAs generally record personal taxes and social insurance contributions when they are paid and business taxes when they are accrued, while the budget records all receipts when they are received. The principal timing difference between NIPA expenditures and budget outlays occurs because purchases are recorded on a delivery basis in the NIPAs, but when cash is disbursed in the budget. This difference can be large for major defense purchases because progress payments are recorded as outlays in the budget, while the NIPAs do not record expenditures until delivery is made. The NIPAs count work in progress as part of business inventories until delivery is made to the Government.

The budget and the NIPAs also have coverage differences. The NIPAs include off-budget Federal entities and exclude transactions with U.S. territories. The NIPAs also exclude the proceeds from the sales of assets such as land. Bonuses paid on Outer Continental Shelf oil leases are shown as offsetting receipts in the budget and are deducted from budget outlays. In the

NIPAs these transactions are excluded as an exchange of assets.

Financial transactions such as loans, loan repayments, loan asset sales, and loan guarantees are excluded from the NIPAs on the grounds that such transactions involve an exchange of assets with no production involved. Through 1991, in contrast, the budget recorded loans as outlays when disbursed and as offsets to outlays when repaid or sold. With the enactment of the Federal Credit Reform Act of 1990, the budget will make a fundamental change in the way that it records lending transactions. For direct loan obligations and loan guarantee commitments made after 1991, the budget will record the estimated subsidy cost of the direct loan or loan guarantee when the direct load or guaranteed loan is disbursed. The nonsubsidized cash flows will be recorded in nonbudgetary accounts as a means of financing the budget deficit rather than as budgetary transactions themselves. The new treatment recognizes that part of a Federal direct loan is an exchange of assets with equal value but that part is normally a subsidy to the borrower. The new treatment also recognizes the subsidy normally granted by loan guarantees. (For further discussion, see Chapter VIII.A, "Recognizing and Reducing Federal Underwriting Risks"). In the NIPAs, neither the subsidies nor the loan transactions are included; however, the NIPAs will continue to include all interest transactions with the public, including interest paid to the new financing accounts.

Deposit insurance outlays for resolving failed banks and thrift institutions are similarly excluded from the NIPAs on the grounds that there are no offsetting current income flows from these transactions. For the 1992 budget, this exclusion is the largest difference between the NIPAs and the budget.

Federal Sector Receipts

Tables XVI–1 and XVI–3 show Federal receipts in the four major categories used in the NIPAs, which are similar to the budget categories but with significant differences.

Personal tax and non-tax receipts is the largest category. It is composed primarily of personal income taxes, but also includes estate and gift taxes, fees, fines, and other receipts.

Corporate profits tax accruals differ in classification from the corresponding budget category primarily because the NIPAs include the deposit of earnings of the Federal Reserve System as corporate profits taxes, while the budget treats these collections as miscellaneous receipts. The timing difference between the NIPAs and the budget, as discussed above, is especially large for this category of receipts.

Indirect business tax and nontax accruals are composed of excise taxes, customs duties, royalties, fines, and other receipts.

Contributions for social insurance differ from the corresponding budget category primarily because: (1) the NIPAs include Federal employer contributions for employee retirement in this category as a Government receipt, while the budget offsets the contributions against outlays as undistributed offsetting receipts; (2) the NIPAs include premiums for social insurance programs including Part B of medicare as Government receipts, which the budget also nets against outlays; and (3) the NIPAs include imputations for Federal employees' unemployment insurance and workers' compensation.

Federal Sector Expenditures

Tables XVI–1 and XVI–3 show expenditures in the six major NIPA categories, which are very different from the budget categories.

Purchases of goods and services include the goods and services purchased by the Federal Government, including employee compensation. This category is divided into defense and non-defense components.

Transfer payments is the largest expenditure category. Domestic transfer payments are mainly for income security programs, such as social security and medicare. Foreign transfer payments include grants to foreign governments and payments under social security and other similar programs to individuals living abroad.

Grants-in-aid to State and local governments are designed to help finance a range of programs. Grants are for income security, capital expenditures for infrastructure, and other purposes.

Net interest paid is the interest paid by the Government on its borrowing, less interest received on its lending.

Subsidies less current surplus of Government enterprises consists of two elements: (1) subsidy payments for resident businesses (including farms); and (2) the current surplus (or deficit) of "Government enterprises", such as the Postal Service, which are business-type operations of Government that usually appear in the budget as public enterprise revolving funds. NIPA subsidies do not include the imputed credit subsidies estimated as part of credit reform in the budget. Rather, they are categorized as financial transactions and are excluded from the NIPAs.

Wage disbursements less accruals is an adjustment that is necessary when wages are earned in a different period than they are paid.

Differences in the Estimates.

Since the introduction of the unified budget in January 1968, NIPA receipts have exceeded budget receipts in each year, due principally to the imputed employer contributions for employee retirement. NIPA expenditures have usually been higher than budget outlays for the same reason. However there are two components of budget outlays that are sometimes sufficiently large to overwhelm the grossing adjustments. These are financial transactions and payments to U.S. territories. Budget outlays were greater in 1980, 1989, and 1990. With the enactment of credit reform, effective in 1992, lending activity with the public as recorded in the budget will be treated in a way that is closer to the NIPA treatment. Disbursement and repayment of loans will occur outside the budget as in the NIPAs, and only imputed credit subsidies will remain as budget outlays. However, this narrowing of differences in lending activity is likely to be overwhelmed by large increases in other financial transactions, principally outlays for the resolution of failed financial institutions.

Since 1968, the consolidated on-budget plus off-budget surplus or deficit has exceeded the Federal surplus or deficit as measured in the NIPAs in all but three years. In 1992, the consolidated budget deficit is estimated to be $280.9 billion, while the NIPA deficit is estimated to be $181.8 billion.

Table XVI–1 displays Federal transactions using NIPA concepts with actual data for the years 1981–1990 and estimates for 1991 and 1992 consistent with the Administration's budget proposals. Table

XVI–2 displays the reasons for differences between the data using budget concepts and NIPA concepts. Table XVI–3 displays quarterly data using NIPA concepts beginning in October 1989. Annual NIPA data from 1947–1992 are published in Part Seven, tables 14.1 and 14.2. Additional details will be published in the February 1991 issue of the Department of Commerce publication, *Survey of Current Business.*

Note.—Because of the methods normally used to seasonally adjust NIPA data, the average of seasonally adjusted data for the 4 quarters of a fiscal year may not be equal to the unadjusted fiscal year total.

XVII. TRUST FUNDS AND FEDERAL FUNDS PRESENTATION

XVII. TRUST FUNDS AND FEDERAL FUNDS PRESENTATION

The budget consists of two major groups of funds: Federal funds and trust funds.

The Federal funds group, which comprises the larger part of the budget, includes all transactions not classified by law as being in trust funds. The main component of the Federal funds group is the general fund, which is used for the general purposes of the Government instead of being restricted by law to a specific program. It consists of all receipts not earmarked by law to finance other funds, including virtually all income taxes, and all outlays financed by these receipts and by general Treasury borrowing.

The Federal funds group also includes special funds and revolving funds. Special funds are financed by earmarked receipts. Where the law requires that Federal fund receipts from a specified source be earmarked to finance a particular program, such as the license fees deposited into the land and water conservation fund, the receipts and associated outlays are recorded in special receipt and expenditure accounts. Revolving funds, such as the Postal Service fund, conduct continuing cycles of business-type activity. They charge for the sale of products or services and use the proceeds to finance their spending. The proceeds are credited to the fund that makes the expenditure.

Trust funds are accounts that are financed by taxes and other receipts earmarked by law for specific purposes and that are designated by law as "trust funds." The predominant trust fund activity is social insurance, such as social security, medicare, and unemployment compensation. Other major trust funds are for Federal employee retirement, highway construction, and airport and airway development. These programs are not trust funds in the private sector meaning of assets held in a fiduciary capacity for someone else. The Federal Government owns the assets and, by enacting a law, can change the future receipts and the terms under which the fund's resources are spent. Trust funds are like special funds (or, in a few cases, like revolving funds) except that they are designated a "trust fund" by law.

Table XVII–1 shows the receipts, outlays, and surplus or deficit by fund group and whether the transactions are on-budget or off-budget. The total on-budget receipts and outlays are the sum of the on-budget Federal fund and trust fund receipts and outlays, respectively, minus a deduction for the interfund transactions between the two groups. Interfund transactions are outlays of a fund in one group and receipts of a fund in another group, such as the payment of interest by the general fund to the hospital insurance trust fund on its holdings of Treasury debt. Since the receipts from interfund transactions are not receipts from the public and the outlays are not outlays to the public, these transactions must be subtracted when Federal fund and trust fund amounts are added so that the budget totals for receipts and outlays will record only transactions with the public.

The off-budget Federal entities, discussed in the previous section, consist of the social security trust funds and the Postal Service fund (which is a Federal fund). Total off-budget receipts and outlays are added together in the same way as on-budget receipts and outlays. The on-budget and off-budget totals may themselves be added together, as shown in table XVII–1, to arrive at the total receipts, outlays, and surplus or deficit of the Federal Government. The latter totals generally represent the net fiscal transactions of the Federal Government with the public.

The on-budget and off-budget amounts are added without any adjustment for interfund transactions. This is because the interfund transactions between on-budget and off-budget are treated in a special way so that the on-budget and off-budget amounts can be added into a consolidated total without any further adjustment. Interfund payments from on-budget to off-budget, such as the interest paid to social security on its holdings of Treasury debt, are not included in off-budget receipts; instead they are subtracted in deriving off-budget outlays. Interfund payments from off-budget to on-budget are treated symmetrically.

This treatment is displayed in the bottom panel of table XVII–2. The first line shows the cash income and outgo of the social security trust funds. The next line shows the interfund receipts from on-budget: interest, a transfer from the general fund equal to the income tax collected on social security benefits, the employer share of the social security contribution for Federal employees, and a small amount from other sources. The final line shows receipts and outlays, both net of these interfund transactions. These are the off-budget trust fund receipts and outlays in table XVII–1. Social Security outlays are considerably less than cash outgo: an estimated $35.8 billion in 1992. More detail and more years are shown in Part Seven, "Historical Tables," table 13.1, where the estimated difference is shown to grow to $61.2 billion in 1996.

Table XVII–2, besides its detail on social security, displays the receipts, outlays, and balances of the major trust funds or groups of closely related trust funds. The trust fund balances are primarily invested in Treasury securities.

XVIII. PHYSICAL CAPITAL PRESENTATION

XVIII. PHYSICAL CAPITAL PRESENTATION

FEDERAL PHYSICAL CAPITAL AND OTHER CAPITAL OUTLAYS

e importance and role of Federal and private in-
ment for the future of the Nation are discussed
lly in Chapter IV, “Investing in the Future.” In
ast this section classifies Federal outlays into sev-
more technically defined categories of physical and
capital. As noted in the introduction to Part Six,
presentation is an alternative way of dividing up
nified budget totals, as opposed to a replacement
e existing structure. This presentation has been
t of the budget for a number of years.

e major categories for physical and other capital
major public physical capital, conduct of research
development, conduct of education and training,
cial capital outlays, and other capital. The tech-
presentation in this section provides continuity
previously published analyses, is consistent with
ical capital and research and development data
nding back to the 1940s that appear in Part Seven,
torical Tables,” presents detailed data by program,
estimates nondefense physical capital net of depre-
on.

e section that follows this one, “Supplemental
sical Capital Information,” is provided in accordance
the requirements of the Federal Capital Invest-
t Program Information Act of 1984. It uses defini-
s specified in the Act, which are different from
e in this section or elsewhere in the budget.

apital outlays are outlays that yield long-term bene-
They take several forms and are made for many
poses. They are in the form of grants to State and
l governments and direct Federal outlays. They can
or physical capital, which yields a stream of services
a period of years; and for research, development,
cation, and training, which is less tangible but also
vides long-term benefits. They can also be for loans,
ch yield monetary returns, although the loans usu-
provide subsidies to the borrowers as well and
refore the face amount of the loans overstates the
e of these assets.

herent in the classification of these data are two
blems, one involving grants to others, and one in-
ving spending that could be shown in more than
category.

- For some grants to State and local governments, the recipient jurisdiction, not the Federal Government, ultimately determines whether the money is used to finance capital or current programs. This analysis classifies all of the outlays in the category where the recipient jurisdictions are expected to spend most of the money. Hence, shared revenues are classified as current spending, although some may be spent by recipient jurisdictions on physical capital. Community development block grants are classified as physical capital, although some may be spent for current purposes.
- Some spending could be classified into more than one category. For example, grants for construction of education facilities finance the acquisition of physical assets, but they also contribute to the provision of education and training. To avoid double counting, the outlays are classified in the category that is most commonly recognized as capital. Consequently the conduct of education and training does not include the cost of education facilities, because these facilities are included in the category of construction and rehabilitation of physical assets. Similarly, the purchase of equipment for research and development is included as acquisition of equipment, not conduct of research and development.

This section is organized in three parts:

- the composition of Federal capital outlays;
- nondefense physical capital outlays net of depreciation; and
- detailed tables.

Composition of Federal Capital Outlays

The composition of Federal capital outlays consistent with the Administration's 1992 budget is shown in Table XVIII–1. These outlays are estimated to be $241.1 billion in 1992, $1.4 billion or 0.6 percent more than the 1991 estimate. This section initially discusses physical capital, such as construction, rehabilitation, and the acquisition of major equipment, and discusses the more marginal categories (in terms of classification) at the end, such as purchases of agricultural commodities and international development activities.

Outlays for major public physical capital (hereafter referred to as physical capital in the text) are estimated to be $129.6 billion in 1992, $0.8 billion less than the 1991 estimate of $130.4 billion. This capital includes primarily outlays for construction, rehabilitation, and major equipment. Direct physical capital outlays by the Federal Government are estimated to be $102.4 billion in 1992, and grants to State and local governments for physical capital are estimated to be $27.2 billion.

Direct physical capital outlays by the Federal Government are primarily for national defense, estimated to be $82.3 billion in 1992. Almost all of this, or an estimated $75.2 billion, is for the procurement of weapons and other military equipment, and the remainder, $7.1 billion, is primarily for construction of military bases and family housing for military personnel.

Outlays for direct physical capital for nondefense purposes are estimated to be $20.1 billion in 1992, $2.5 billion more than the 1991 estimate. The 1992 outlays

MEMORANDUM			
National defense	129.5	125.5	124.3
Nondefense	102.1	114.2	116.8

include $12.9 billion for construction and rehabilitation. These outlays are largely for water, power, and natural resources projects of the Corps of Engineers, the Department of Interior, the Tennessee Valley Authority and the power administrations in the Department of Energy, and the construction and rehabilitation of veterans hospitals and Postal Service facilities. Outlays for the acquisition of major equipment are estimated to be $7.2 billion in 1992. The largest items are for the space program, the air traffic control system, and the Postal Service.

Grants to State and local governments for physical capital are estimated to be $27.2 billion in 1992, $0.3 billion more than the 1991 estimate. More than half of these outlays, or $14.8 billion in 1992, are grants to assist with construction of the Interstate Highway System and other major highways. Other major grants for physical capital are for sewage treatment plants, community development, airports, and mass transit. Information on total grants to State and local governments, both for capital and for other purposes, is available in this volume in Chapter VI.C, "Providing Federal Aid to State and Local Governments."

Outlays for other physical capital (nondefense, direct) are estimated to be $8.1 billion in 1992. This category includes conservation programs for the improvement of land, the purchase and sale of assets, and other activities.

Outlays for the conduct of research and development are estimated to be $68.6 billion in 1992, $4.8 billion more than the 1991 estimate. These outlays are devoted to increasing our basic scientific knowledge and promoting related research and development activities. They increase our national security, improve the marginal productivity of capital and labor for both public and private purposes, and enhance the quality of life. More than three-fifths of the outlays for the conduct of research and development, an estimated $41.6 billion in 1992, are for national defense.

Physical capital for research and development is included in the physical capital category.

Nondefense outlays for the conduct of research and development are estimated to be $27.0 billion in 1992, $2.4 billion or 10 percent more than the 1991 estimate. This is almost entirely direct spending by the Federal Government, and is largely for the space programs, the National Science Foundation, health research, and research for nuclear and non-nuclear energy facilities. These programs as well as others are discussed in Chapter IV.C., "Enhancing Research and Development and Expanding the Human Frontier."

Outlays for the conduct of education and training are estimated to be $35.1 billion in 1992, $3.7 billion more than the 1991 estimate. These outlays add to the stock of human capital by developing a more skilled and productive labor force. Grants to State and local governments for this category are estimated to be $17.9 billion in 1992, more than half of the total. They are primarily for the disadvantaged and the handicapped, and for vocational and adult education. Direct education and training outlays by the Federal Government are estimated to be $17.2 billion in 1992, $2.4 billion more than the 1991 estimate. Programs in this category are primarily aid for higher education through student fi-cial assistance, guaranteed student loan subsidies, veterans GI bill, and health training programs. This category does not include outlays for education and training of Federal civilian and military employees. Physical capital for education and training is included in the physical capital category.

Loans[1] and other financial capital include direct loan disbursements for new loans, repayments of previous loans, the sale of loan assets, and related activities. Because of new credit reform legislation, loan data in this category include activity only for loans obligated in 1991 or earlier. Repayments, sales, and other adjustments are expected to exceed disbursements by $5.9 billion in 1992. The major loan activities are for the sale of military equipment to foreign countries, promotion of exports and housing, and assistance to farmers and college students. The Federal Credit Reform Act of 1990 has changed the treatment of loans obligated or guarantees committed in 1992 or later. For these direct and guaranteed loans, only the estimated subsidy value of the assistance is included as budget outlays. The subsidies are not classified in this loan category but are classified according to their program purpose, such as for construction, education and training or non-capital outlays. The unsubsidized cash flows are not included in the budget. More information on the new credit reform concepts is available in Chapter VIII.A, "Recognizing and Reducing Federal Underwriting Risks".

Sales of commodity inventories are estimated to exceed purchases by $0.6 billion in 1992. These are entirely for direct Federal nondefense purposes. Almost all outlays in this category are for the purchase or sale of agricultural products pursuant to farm price support programs. Net sales of these commodities in 1992 are estimated to be $0.7 billion. Other outlays in the category are for purchases of oil for the strategic petroleum reserve.

Other capital outlays are for the collection of information, such as by the Bureau of the Census, and for foreign economic assistance grants for general economic development or humanitarian needs. These outlays are estimated to be $6.3 billion in 1992.

Nondefense Physical Capital Outlays Net of Depreciation

This section presents data on physical capital assets and estimates of the depreciation on these assets, which is the reduction in value due to wear and tear, obsolescence, and other factors. The difference between total (or gross) capital formation and depreciation is net capital formation. These data are presented in constant fiscal year 1982 dollars. Estimates have not been made of net defense capital formation.

For many years, current and constant-dollar data on the value of most forms of both public and private physical capital—e.g., roads, factories, and housing—have been estimated by the Department of Commerce and published in the *Survey of Current Business*. (See pp. 31–32 of the October 1990 issue and the references therein.) These data include estimates of depreciation of defense capital. However, the Commerce data are not directly linked to the Federal budget and do not include estimates for the years covered by the budget. For budgetary purposes, OMB had to prepare separate estimates.

The estimates were developed first of all from the OMB historical data base for Federal nondefense physical capital outlays and grants to State and local governments for physical capital. These are the same nondefense physical capital outlays presented in the previous section. This data base extends back to 1940 and was supplemented by rough estimates of such spending during 1915–1939.

The resulting series of physical capital outlays in current dollars was adjusted to constant fiscal year 1982 dollars using price deflators for Federal nondefense capital purchases. The resulting constant dollar series is shown as gross capital formation in Table XVIII–2. These constant dollar historical data were then depreciated on a straight-line basis over the following assumed useful lives: 40 years for capital financed by grants (primarily highways); 46 years for water and power projects; 30 years for other nondefense construction and rehabilitation; and 16 years for major equipment. The difference between gross capital formation and depreciation is shown as net capital formation.

These data should be viewed as rough approximations. They have substantial margins of estimating error and provide only a basis for broad generalization. The sources of error include:

- *The extended historical outlay series.*—The historical data series was extended back from 1940 to 1915 using data from selected sources. There are no consistent outlay data on nondefense physical capital for this period, and the estimates are approximations.
- *Price adjustments.*—The replacement cost of the Federal stock of nondefense physical capital has increased through time, but the rate of increase is not known exactly. An estimate of replacement costs in fiscal year 1982 prices was made through the application of the National Income and Product Accounts deflator series for Federal, State, and local purchases of durables and structures indexed to fiscal year 1982 prices. There are no specific price indices for public purchases of durables and structures for 1915 through 1939, and estimates were made on the basis of Census Bureau historical statistics on constant price public capital formation.
- *Depreciation estimates.*—The useful lives of nondefense physical capital are very uncertain. This is compounded by using estimated lives for broad classes of assets, which do not apply uniformly to all the components of each group. The depreciation rate is also very uncertain, and straight-line depreciation may not be the most accurate method.

---

[1] Includes effects for writeoffs of defaulted loans, which do not directly affect outlays. In such cases, there is an offsetting adjustment in the category that is not for capital outlays.

The data in Table XVIII–2 show that net physical capital outlays, measured in constant dollars, generally increased between 1960 and 1970. It also generally increased during the 1970s, when depreciation was largely based on the relatively low physical capital spending of the 1940s and 1950s, so gross capital outlays primarily added to the capital stock rather than replaced capital. However, with the passage of time, the capital stock became larger, and consequently depreciation grew. More and more gross physical capital outlays were required just to maintain the size of the capital stock. Since the early 1980s, gross physical capital outlays have remained relatively constant. Depreciation continued to rise because of capital outlays in earlier years. As a result, net capital outlays declined in the 1980s.

The composition of nondefense public physical capital outlays—on both a gross and a net basis—has changed substantially. Before the mid-1950s, direct nondefense physical capital outlays exceeded grants for physical capital outlays, on both a gross and a net basis. However, by the end of the 1950s, after construction o the Interstate Highway System had begun, grants fo physical capital substantially exceeded direct physica capital outlays. This relationship has continued on gross basis, but the trend on a net basis has changed With increasingly higher depreciation relative to gros physical capital outlays for assets financed by grants net physical capital outlays for grants are estimated to be less than net direct physical capital outlays i 1992.

Detailed Tables

Tables XVIII–3 and XVIII–4 provide detail on the composition of physical and other capital outlays. They provide two basic displays. Table XVIII–3 shows data on national defense and nondefense capital outlays, and Table XVIII–4 shows data on capital grants for State and local governments and for direct Federal capital outlays.

SUPPLEMENTAL PHYSICAL CAPITAL INFORMATION

Introduction

The Federal Capital Investment Program Information Act of 1984 (Title II of Public Law 98–501; hereafter referred to as the Act) requires that the budget include projections of Federal physical capital spending and information regarding recent assessments of public civilian physical capital needs. This section is submitted to fulfill that requirement.

Data on historical trends going back to 1940 for Federal public physical capital spending, using the definitions in the previous section, "Federal Physical Capital and Other Capital Outlays," can be found in the Historical Tables in Part Seven of this volume.

This section is organized in two major parts. The first part projects Federal outlays for public physical capital and the second part presents information regarding public civilian physical capital needs.

Projections of Federal Outlays For Public Physical Capital

Summary of projections.—Federal public physical capital spending as defined for this report was $61.3 billion in 1990 and, for current services estimates,[2] is projected to increase to $77.0 billion by 1996. The largest components are for roads and bridges and for federally assisted housing, which together account for about two-fifths of Federal public physical capital spending.

On a Presidential policy basis, the 1992 budget is proposing $68.7 billion for physical capital spending for 1992, $0.9 billion less than the current services level of $69.6 billion.

Definitions.—Federal public physical capital spending is defined in this report as specified in the Act. It covers spending for construction and rehabilitation, acquisition of major equipment, and spending for all other physical assets, such as the purchase and improvement of land and structures. The data for physical capital spending are generally the same as those used for the previous section "Federal Physical Capital and Other Capital Outlays", with two major exceptions required by the Act. They concern housing and military physical capital spending. In the case of the Department of Defense, this report includes only military construction and family housing, and excludes other capital spending, such as for military weapons, aircraft, and ships. Second, this report includes considerable amounts of spending for federally assisted housing that is at least indirectly associated with housing construction. Most of this is considered current spending (i.e., not for capital) in deriving the data for the previous section "Federal Physical Capital and Other Capital Outlays," because it is to pay off loans for public housing rather than to finance the housing construction directly.

This report excludes financial capital, such as loans and outlays for human capital, such as the conduc of education, training, and research. The data in thi report generally exclude offsetting collections that finance the spending, such as collections from the sal of energy.

Projections.—Table XVIII–5 shows projected curren services outlays for Federal physical capital by the major categories specified in the Act. Total Federal outlays for transportation-related physical capital were $20.2 billion in 1990, and current services outlays are estimated to increase to $28.7 billion by 2000. Outlays for nondefense housing and buildings were $13.5 billion in 1990 and are estimated to increase to $22.8 billion by 2000. Physical capital outlays for other nondefense categories were $22.9 billion in 1990 and are projected to be $32.6 billion by 2000. For national defense, this spending was $4.8 billion in 1990 and is estimated to increase to $5.9 billion in 2000.

Table XVIII–6 shows current services projections adjusted for inflation on a constant dollar basis to 1996, using fiscal year 1982 as the base year.

Table XVIII–7 compares the current services and Presidential policy projections from 1990 to 1996 in current and constant dollars.

For outlay details for most programs, see the items included in major public physical capital in "Federal Physical Capital and Other Capital Outlays," especially tables XVIII–3 and XVIII–4. For major programs that are formula grants to States, information on the estimated distributions by State for 1990–1992, consistent with Presidential policy estimates, can be found in a separate publication entitled Budget Information for States, prepared by the Office of Management and Budget.

Public Civilian Capital Needs Assessments

The Act requires information regarding the state of major Federal infrastructure programs, including highways and bridges, airports and airway facilities, mass transit, railroads, federally assisted housing, hospitals, water resources projects, and space and communications investments. Funding levels, long term projections, policy issues, needs assessments, and critiques are required for each category.

Much of the needs assessment material formerly presented in the Supplement to Special Analysis D has been incorporated in the discussions of individual programs in other parts of the budget. Indeed, this budget focuses far more on the need to maintain our capital stock and improve national productivity than has been the case in past years, obviating the need for separate discussion.

Capital needs assessments change little from year to year, in part due to the long term nature of the facilities themselves, and in part due to the consistency of the analytical techniques used to develop the assessments and the comparatively steady but slow changes

---

[2] In this chapter, current services estimates are consistent with the caps enacted as part of the Budget Enforcement Act of 1990. For a discussion of current services estimates, see Chapter XV, "Current Services Estimates."

in underlying demographics. As a result, the practice has arisen in previous Supplements to refer to earlier discussions, where the relevant information had been carefully presented and changes had been minimal.

In order to present this budget as a focused statement of current Administration policy, the needs assessment material in Supplements of earlier years is incorporated this year largely by reference to earlier editions of the Supplement and by reference to other needs assessments. The needs analyses, their ma components, and their critical evaluations have be fully covered in past Supplements, such as the 19 *Supplement to Special Analysis D*. Supporting table are presented below, and the reader is referred bri to the individual program summaries in Part Two the budget for policy matters and to previous repor for methodological discussions.

Significant Factors Affecting Infrastructure Needs Assessments

Significant Factors	*Amount*
Highways	
1. Projected annual growth in travel to the year 2005	2–3 percent
2. Annual cost to maintain overall 1985 highway conditions on the Federal-aid systems	$19.6 billion to $23.5 billion (1989 dollars)
3. Annual cost of eliminating all existing and future bridge deficiencies to the year 2005 for Federal-aid system	$4.1 billion (1989 dollars)
Airports and Airway Facilities	
1. Airports in the National Plan of Integrated Airport Systems with scheduled passenger traffic	568
2. Air traffic control towers	400
3. Airport development eligible under airport improvement program for period 1986–1995	$40.5 billion ($28.2 billion for capacity) (1989 dollars)

Significant Factors Affecting Infrastructure Needs Assessments—Continued

Significant Factors	*Amount*
Mass Transportation Systems	
Yearly cost to restore existing rail facilities over a period of [illegible] years	$1.5 billion–$2.2 billion (1989 dollars)
Yearly cost to replace and maintain the urban, rural, and special services bus fleet	$1,505 million (1989 dollars)
Wastewater Treatment	
Total needs of sewage treatment facilities	$83.5 billion (1989 dollars)
Total expenditures since 1972 under the Clean Water Act of 1972	$54 billion
Percent of population served by centralized treatment facilities that benefits from at least secondary sewage treatment systems	95%
States and territories served by State Revolving Funds	51
Housing	
Total unsubsidized very low income renter families:	
A. In severely substandard units	0.4 million
B. With a rent burden greater than 50%	3.4 million
Indian Health (IHS) Care Facilities	
IHS hospital occupancy rates (1988)	50%
Average length of stay, IHS hospitals (days) (1988)	4.5
Hospital admissions (1988)	105,000
Outpatient visits (1988)	4,990,000
Population (1988)	1,040,000
Department of Veterans Affairs (VA) Hospitals	
Hospitals	172
Outpatient clinics	369
Domiciliaries	35
Outreach centers	195
VA owned nursing home beds	14,349
VA owned nursing home beds needed in 2000	17,042
VA owned nursing home beds needed in 2005	17,664

Significant Factors Affecting Infrastructure Needs Assessments—Continued

Significant Factors	*Amount*
Water Resources	
1. Navigation (deepwater ports & inland waterway) 2. Flood control and Storm Damage Protection. 3. Irrigation. 4. Hydropower. 5. Municipal and Industrial Water Supply. 6. Recreation. 7. Fish and Wildlife mitigation and enhancement. 8. Soil conservation.	Needs data are not regularly collected by th Federal Government. Most recent estimates the need for navigation, flood control an shoreline storm damage protection, and munic ipal and industrial (M&I) water are found i the *National Council on Public Works Improve ment, 1987*. Meeting M&I needs as well as certain other water resource needs estimated i this report (e.g., urban storm water management and dam safety) is primarily a non-Federal responsibility. Program reforms have emphasized non-Federal cost sharing which encourages reexamination of needs.

XIX. GENERAL ACCOUNTING OFFICE PREFERRED PRESENTATION

XIX. GENERAL ACCOUNTING OFFICE PREFERRED PRESENTATION

e Comptroller General has in recent years become singly concerned that the unified budget's almost sive focus on obligation controls and cash trans- ns prejudices investments and understates liabil- The General Accounting Office stated in its Octo- 1989 Report (entitled "Managing the Cost of Gov- ent: Proposals for Reforming Federal Budgeting tices") that consolidation into a single unified budg- trust and non-trust receipts and outlays, and of ccounting for operating and capital needs, has per- d financing other parts of the budget through trust receipts (especially from Social Security); pre- d appropriate budgetary treatment of the special s of the Government's business-type entities (e.g., U.S. Postal Service and the Tennessee Valley Au- ty); biased decisionmaking against capital invest- by requiring the recording of the entire cost of sset in the year of acquisition; and failed to distin- operating *deficits* from capital *financing require-* s.

address its concerns with the unified budget, GAO proposed to divide the budget into three separate groups: Federal funds (less enterprise funds), trust s, and enterprise funds. The fund groups would selves be aggregated separately in an operating et and a capital budget. The data in Table XIX–1 an approximation of the 1992 budget totals on is consistent with GAO recommendations.

compared with the unified budget, which focuses arily on aggregate totals (although it provides de- by fund group and separately identifies trust funds revolving funds), the GAO proposal focuses sepa- y on operating and capital needs; disaggregated ral, trust and enterprise funds; and aggregate to-

pital and Operating Budgets.—GAO's proposed al budget separates disbursements for physical al and credit flows (i.e., credit financing excluding t subsidies) from the operating budget. The cost wly acquired assets would be recorded in the cap- budget and as assets on the balance sheet, with forms of capital subjected to depreciation charges ded as operating budget outlays (with concomitant ction in the value of capital assets on the balance t). Aggregate totals of the capital and operating ets would be provided (as in the unified budget), the distinctions between the two uses of funds d be set out in all summary presentations.

e GAO proposal includes only physical and loan tal in its capital budget. The failure to treat R&D human capital on a par with physical and loan tal has been criticized in Congress and elsewhere, GAO is studying the issue. In Table XIX–1, expenditures for R&D and human capital—education, for example—is retained in the operating budget.

The GAO proposal would also include in the capital budget the value (or cost) of State and local physical facilities financed by Federal grants. These would be recorded on Federal balance sheets as Federal assets financed but not owned by the Federal Government. The GAO proposal, like the unified budget, would record Federal highway and airport and airway trust fund collections as receipts, but the GAO proposal would include them as receipts to finance the capital budget. A problem with the GAO proposal is that its allocation of depreciation cannot be charged to the trust funds which finance these investments through earmarked taxes. Recording both earmarked receipts and depreciation would require double counting with respect to assets acquired after the GAO proposal went into effect.

The GAO proposal would tend to reduce the impediments to Government investment and, as a result, could encourage the Government to make those cost-effective purchases required to meet longer term needs. The portion of the Federal budget attributable to investment in physical capital has declined in recent years as a percentage of GNP—from 4.4 percent in 1960 to 2.2 percent in 1992. While most of this decline is attributable to Defense and NASA, there is a question of whether infrastructure needs have been adequately attended to.

On the other hand, GAO's proposal could also reduce the impediments to "pork barrel" spending in that charges to the operating budget would switch from the point at which they can be controlled—the time of acquisition—to the later time at which they cannot be controlled when depreciation charges would be recorded. Additionally, GAO's attempt to reduce the disincentives to physical capital expenditures would favor physical over human capital.

Treatment of Sovereign and Business-Type Income.—The GAO proposal would abolish the distinction between sovereign and business-type income from the public. Most collections from the public would be recorded as Federal fund, trust fund, or public enterprise fund operating budget receipts and outlays, and outlays would be recorded gross rather than net of offsetting collections. The issue here is the degree to which the budget aggregates should focus on receipts arising from the exercise of Government's sovereign power as opposed to total Government revenues and spending (including business-type activities). GAO would focus on the total of Government activity; current budget concepts treat as receipts only those which the Federal Government collects in its role as a government.

Allocations by Function.—Table XIX–1 shows most of the GAO adjustments by function. Line 14 (Additional Operating Costs Not Currently Allocated by Function), however, includes estimates of two items for which a distribution by function is unavailable. Specifically:

- Line 14(a) records a lump sum estimate of $20.3 billion as a non-defense "asset consumption charge" (depreciation) and a corresponding reduction of $20.3 billion in the capital budget net investment. Defense depreciation of $53.8 billio also offset in the capital budget, is included i the amounts on line B(1).
- Line 14(b) records a lump sum $28.7 billion i puted payment from the general fund to amorti unfunded pension liabilities.

Comparison with Other Alternatives.—The GA proposal is compared with the alternatives discusse in Chapters XX and XXI, and with the unified budge at the end of Chapter XXI.

XX. STATE-TYPE PRESENTATION

XX. STATE-TYPE PRESENTATION

California offers a fairly typical example of a State get presentation. The California budget (Table -1) differs significantly from the other alternatives this Part. It focuses on separate general, special, capital funds, although it also provides aggregate ls (albeit inflated through double counting) of these ds. The separate State GAAP (Generally Accepted ounting Principles) presentation includes propri- y and fiduciary funds excluded from the California get (i.e., public enterprise and working capital re- ing funds, self-financing bond funds, employee re- ment funds, and certain funds deemed to be held trust).

hen the California approach combines fund groups, eaves the inter-fund collections in receipts, thereby rstating total collections from, and payments to, the lic. Additionally, when capital expenditures are fi- ced by bond funds, they are double counted, because bond spending and debt amortization are both in- led in combined total spending. The bottom line is the California and State GAAP presentations are least consolidated and most disaggregated of the rnatives discussed in this part of the budget docu- t. In California, the individual funds matter most.

The standard California budget presentation has a -way distribution of income and a three-way dis- ution of spending. Receipts go to the general and cial funds, whereas outlays/expenses and invest- nts are spent from these funds plus the capital fund. norm for California's special funds is that they uld have cash in hand before they spend (similar the norm for Federal trust funds). At the same time, h the California general and special funds can spend e in a year than they take in by reducing carry r balances; this is not deemed to create a deficit.

Balanced Budget Requirement.—California's con- utional requirement of balanced budgets, combined h constitutional limitations on taxes and spending, ult in procedures different from Federal procedures. ese include appropriated allowances for contin- cies, with payments charged back to the activity which the payment is made, and "encumbrances" milar to obligations in the Federal budget) for which spending is charged to the year in which the en- mbrance occurs.

The California budget document has information ta- s on total State indebtedness (akin to the Federal play of total Federal debt). In contrast to the Federal vernment, however, California's ability to borrow is bject to several restrictions: borrowing can normally cur only for capital projects (whether general or self- uidating); and debt normally cannot be issued unless pproved by both the legislature and the voters.

Capital Projects Fund.—The Capital Projects Fund is displayed only on the spending side, since bond fund spending is financed by borrowing, which is not income. The California capital fund only includes bonds that are to be amortized by the general fund. "Self-liquidating" bonds (such as for toll bridges, the California water plan, and college dormitories) are excluded from the regular budget altogether, but are displayed in the budget documents for information purposes (similar to the way the Federal budget displays GSEs but leaves them out of the totals).

The estimate of the Capital Projects Fund in Table XX–1 (and the associated amortization) was based on several imputations. First, Federal fund (i.e., non-trust) capital outlays (other than those made by the public enterprise funds and other than for grants) are identified as equivalent to the investment that California finances through its Capital Projects Fund. Second, an estimate of amortization of prior debt was made and allocated as expenditures of the general fund. There is currently no solid basis for amortizing total debt, much less for amortizing debt by function. However, Table XX–1 assumes an amortization by function equal to new debt-financed capital investment. It does not provide for a distribution of interest back to the functions charged with the borrowing.

Sovereign Versus Business-Type Operations and Employee Retirement.—The California budget excludes both business operations and employee retirement and related funds from the budget. So, in the reconstruction of the Federal budget in the form of the California budget, most of the public enterprise funds—plus the civil service, military, and foreign service retirement funds—were excluded from the budget totals (although payments to these funds were left in the budget figures). Thus, the general fund coverage in Table XX–1 is less comprehensive than the Federal fund group in the unified budget, and the special fund coverage is less comprehensive than the trust fund coverage in the unified budget.

While the California procedure excludes business operations from the budget, any incidental non-tax income to the State (such as rents, royalties, and interest) is included in budget receipts.

State GAAP Basis.—Table XX–1 also includes a presentation that approaches a State GAAP presentation. While the State is moving toward GAAP, this will take years to accomplish. The GAAP presentation in the California budget is an auxiliary display of spending only. Table XX–1, on the other hand, reconstructs the total budget on a State GAAP equivalent basis. The GAAP display adds "proprietary funds" (i.e., business operations) and "fiduciary funds" (which include the pension funds and the funds the State collects and spends from Federal grants) to the normal California presentation.

Comparison with Other Alternatives.—The California budget is compared with the alternatives discussed in Chapters XIX and XXI, and with the unified budget, at the end of Chapter XXI.

XXI. OPERATING, RETIREMENT, AND DEBT AND INTEREST PRESENTATION

XI. OPERATING, RETIREMENT, AND DEBT AND INTEREST PRESENTATION

1990, Senator Sanford introduced a bill, the "Bal-ed Budget and Debt Reduction Act of 1990" (S. 101), ch proposed another budget presentation. As shown able XXI–1, the unified budget would be subdivided three budgets—the operating budget, the retire-t funds budget, and the debt and interest budget.

he President's budget would present the unified get totals, as well as totals for the three separate gets. The social security trust funds and the Postal vice would be included in the unified budget totals the appropriate component totals. However, the entation would focus on the deficit or surplus for y the operating budget; this and other requirements quite different from the unified budget concept.

The operating budget would include the receipts and enditures not included in the other two budgets. e operating budget would have to be balanced in the President's budget; legislation that would cause an operating budget deficit would be subject to a point of order in the Congress. (In Table XXI–1, which presents 1992 President's budget numbers, the operating budget is not balanced.) If, in spite of these requirements, the deficit exceeded the maximum deficit amount (defined in the Congressional Budget Act of 1974, as amended by the Budget Enforcement Act of 1990, Public Law 101–508), the next year's operating budget would include an expenditure equal to the previous year's deficit excess. This would result in budgeting for an excess of receipts over current expenditures in the operating budget if the previous year's deficit target is not met.

The retirement funds budget would include the receipts and expenditures of the social security and medicare trust funds, the civilian and military retirement

trust funds, the railroad retirement trust funds, and such other funds or accounts that OMB, in cooperation with GAO and the Congress, agree upon. The estimates in Table XXI–1 also include the black lung disability trust fund in the retirement funds budget.

The debt and interest budget includes "receipts and expenditures" for reductions or increases in the public debt, and interest on the public debt. During time of declared war or declared recession, Treasury borrowing would be permitted in the debt and interest budget. Borrowed funds would then be transferred to the operating budget as receipts to maintain the operating budget in balance. This definition of "receipts and expenditures" would treat the proceeds of borrowing as receipts and the repayment of borrowing as outlays.

Under current budget concepts, borrowing is treated as a means of financing a deficit, not as a part of the calculation of the deficit; the repayment of borrowing is treated as the use of a surplus. Apart from other, relatively small means of financing the deficit, the treatment of borrowing and repayment of borrowing as receipts and outlays in the alternative proposal would balance the sum of the operating and debt and interest budgets by definition. If transfers to the operating budget are treated as expenditures of the debt and interest budget, it follows that they are to be treated as receipts of the operating budget. The operating budget would also, therefore, be balanced during time of war or a recession, by definition.

In the Sanford proposal, the budget deficit would be redefined to mean the amount by which the combined outlays of the operating and debt and interest budgets exceed their receipts. The retirement funds budget would be completely excluded. The President's budget and budget legislation would have to stay within the maximum deficit amounts, as well as balancing the operating budget. With the operating and debt and interest budgets in balance by definition, the unified budget would have the same surplus or deficit as the retirement funds budget.

The debt and interest budget would also include a new "trust fund for the reduction of the deficit and the public debt." A special tax could be established for this fund.

SOME DIFFERENCES AMONG THE ALTERNATIVE PRESENTATIONS

A comparison of the GAO, California, and Sanford presentations with each other, and with the unified budget, is presented below.

- The GAO and California budget presentations reflect, primarily, the concerns of financial accounting. The Sanford budget proposal is primarily designed to protect the retirement trust funds and to direct attention to controlling the newly defined operating budget.
- Employee retirement funds are included by GAO as part of its trust fund grouping, and by Sanford as part of his retirement funds budget. The California approach moves these funds into the fiduciary funds category outside the normal budget presentation (but inside the GAAP presentation). The unified budget includes these funds in the consolidated budget totals.
- Enterprise funds are included as part of the operating budget in the Sanford proposal. GAO carries the enterprise funds as one of three separate groupings, together with the general funds and trust funds. The California budget excludes enterprise funds from the normal budget displays but includes them in the GAAP presentation. The unified budget includes these funds in the consolidated budget totals.
- GAO, the Sanford proposal, and the unified budget handle interfund transfers as adjustments on the outlay side; they cancel out in deriving the consolidated totals. The California approach adds them to the receipts of each fund group, and does not net them out in combined totals.
- GAO has a capital budget that includes all capital expenditures for physical and loan assets, no matter how financed. It does not have a bond fund. In the main, the GAO capital budget is financed by depreciation charges and earmarked receipts (mainly highway and airport and airway excise taxes). The California approach has a capital fund but includes only those capital expenditures financed by borrowing to be repaid from the general fund on an amortization basis. The Sanford proposal and the unified budget do not distinguish capital expenditures in the budget aggregates. The President's budget, however, does have an auxiliary tabulation of outlays for both physical and intangible capital (see Chapter XVIII).
- GAO includes grants to State and local governments for physical capital investment in its capital budget. The Sanford proposal and the unified budget do not distinguish these grants in the budget aggregates, but the President's budget does include grants for capital investment in its auxiliary tabulation of Federal capital expenditures (see Chapter XVIII). The California budget does not include grants to localities for capital projects in its capital fund.

HISTORICAL TABLES

INTRODUCTION

istorical *Tables* is designed to provide budget users h a wide range of data on Federal Government fies. In many cases, the data cover all years from 0 to the estimates for 1996. Additionally, Section provides data on receipts, outlays, and surpluses and cits for 1934–1939 and for earlier multi-year peris.

Structure

This document is composed of 15 sections, each of ich has one or more tables. Each section covers a mon theme. Section 1, for example, provides an rview on the budget and off-budget totals, Section provides tables on receipts by source, and Section shows outlays by function. The purpose of this set tables is to present a broad range of historical budgry data in one convenient reference source and to ide relevant comparisons most likely to be of assiste. The most common comparisons are in terms of portions (e.g., each major receipt category as pertages of total receipts and of the gross national prodt.

Section notes explain the nature of the activities coved by the tables in that section. The first time any w budget concept is introduced, the covering notes vide a nontechnical definition of the concept. Wheneer it appears that some additional descriptive infortion would be useful, this information is also inded. Explanations are generally not repeated, but re are occasional cross-references to related mateals. When a section contains several tables, the genal rule is to start with tables showing the broadest rview data and then work down to more detailed bles.

Because of the numerous changes in the way budget ta have been presented over time, there are inevible difficulties in trying to produce comparable data cover so many years. The general rule underlying l of these tables is to provide data in as meaningful d comparable a fashion as possible. To the extent ssible, the data are presented on a basis consistent th current budget concepts. When a structural change s made, insofar as possible the data are adjusted for l years. No major structural changes were made in e 1991 or 1990 budgets. However, an example of the pplication of this rule comes from the 1989 budget. Prior to the 1989 budget one major function was entiled "general purpose fiscal assistance." The principal mponent of that function—indeed, the reason that nction was of sufficient importance to be a separate ajor function—was the general revenue sharing program. General revenue sharing started in 1963 and s last significant outlays were in 1986. With the abolition of general revenue sharing, in the 1989 budget the general purpose fiscal assistance function was converted from being a separate major function to being a subfunction in the general government function. The data base incorporates the general purpose fiscal activities as a subfunction of the general government function for all years—not just since the abolition of general revenue sharing.

In November 1990, the President signed the Omnibus Budget Reconciliation Act of 1990. Part of this legislation was the Budget Enforcement Act, which not only provided new enforcement mechanisms, but also included significant changes in budget concepts. The major conceptual change is in the measurement of Federal credit activity in the budget. Under the new law, only the subsidy cost (the cost to the Government, including the cost associated with loan defaults) of direct loans or loan guarantees is to be recorded as budget authority and outlays. The remaining financial transactions are to be recorded as means of financing items. The new law will be effective for direct loan obligations and loan guarantee commitments made in 1992 and beyond. Unfortunately, the historical data could not be converted to this new measurement basis. Thus, data prior to 1992 are on a cash flow or pre-credit reform basis. Data for 1992 and beyond are on a cash flow basis for obligations and commitments made in earlier years, but reflect the subsidy cost or post-credit reform concepts for the forty or so budget program accounts providing direct loans or loan guarantees.

Coverage

The Federal Government has used the unified budget concept as the foundation for its budgetary analysis and presentation since the 1969 budget. The basic guidelines for the unified budget were presented in the *Report of the President's Commission on Budget Concepts* (October 1967). The Commission recommended that the budget include all Federal fiscal activities unless there are exceptionally persuasive reasons for exclusion. Nevertheless, from the very beginning some programs were perceived as warranting special treatment. Indeed, the Commission itself recommended a bifurcated presentation: a "unified budget" composed of an "expenditure account" and a "loan account." The distinction between the expenditure account and the loan account proved to be confusing and caused considerable complication in the budget for little benefit. As a result, this distinction was eliminated starting with the 1974 budget. However, even prior to the 1974 budget, the Export-Import Bank had been excluded by law from the budget totals, and other exclusions followed. The structure of the budget was gradually revised to show the off-budget transactions in many locations along with the on-budget transactions, and the off-budget amounts were added to the on-budget amounts in order to show total Federal spending.

The Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99–177) repealed the off-budget status of all then existing off-budget entities, but it included a provision immediately moving the Federal old-age, survivors, and disability insurance funds (collectively known as social security) off-budget. To conform with the rule that the historical data provide a consistent time series, the budget historical data show social security off-budget for all years since its inception, and show all formerly off-budget entities on-budget for all years. Subsequent law removed the Postal Service fund off-budget, starting in fiscal year 1989. Prior to that year, the Postal Service fund is shown on-budget.

Though social security and the Postal Service are now off-budget they continue to be Federal programs. Indeed, social security currently accounts for around one-third of all Federal receipts and one-quarter of all Federal spending. Hence, the budget documents include these funds, and focus on the Federal totals that combine the on-budget and off-budget amounts. Various budget tables and charts show total Federal receipts, outlays, and surpluses and deficits, and divide these totals between the portions that are off-budget (the two social security trust funds and the Postal Service fund) and the remainder of Federal transactions, all of which are on-budget.

1989 Outlays and Deficit

The outlay and deficit totals for 1989 published in the 1991 budget have been increased from $1,142.6 billion and $152.0 billion to $1,144.1 billion and $153.4 billion, respectively. The 1989 data in the 1991 budget has been updated to reflect revised reporting of 1989 transactions to the Treasury by several agencies, mainly the Resolution Trust Corporation (RTC), the Federal Deposit Insurance Corporation's (FDIC) Bank Insurance Fund (BIF) and FSLIC Resolution Fund (FRF), and the National Archives and Records Administration (NARA). FRF outlays have been increased by $7 million in 1988 and $1,365 million in 1989. RTC outlays have been increased by $64 million in 1989 and BIF outlays have been increased by $63 million in 1989. NARA outlays for 1989 were reduced by $55 million. Correction of an error in the 1991 budget reporting of 1989 actuals reduces 1989 net outlays for the James Madison Memorial Fellowship Foundation in subfunction 502 by $10 million. Miscellaneous governmental receipts for that year are reduced by $10 million and other Federal fund excise tax receipts are increased by $10 million. Total governmental receipts are unchanged.

Note on the Fiscal Year

The Federal fiscal year begins on October 1 and ends on the subsequent September 30. It is designated by the year in which it ends; for example, fiscal year 1990 began on October 1, 1989, and ended on September 30, 1990. Prior to fiscal year 1977 the Federal fi years began on July 1 and ended on June 30. In c endar year 1976 the July-September period was a se rate accounting period (known as the transition quar or TQ) to bridge the period required to shift to t new fiscal year.

Notes on Section 1 (Overview of Federal Government Finances)

This section provides an overall perspective on tot on-budget, and off-budget receipts, outlays (spendin and surpluses or deficits. Tables 1.1 and 1.2 have id tical structures; 1.1 shows the data in millions of d lars, while 1.2 shows the same data as percentag of the gross national product (GNP). For all the histo cal tables fiscal year GNP is used to calculate percen ages of GNP. The fiscal year GNP data are show in Table 1.2.

Table 1.3 shows total Federal receipts, outlays, a surpluses or deficits in current dollars, constant dollar and as percentages of GNP. Table 6.1 provides disaggregation of the constant dollar outlays.

Concepts Relevant to Tables in this Section

Budget (or "on-budget") receipts constitute the inco side of the budget; they are composed almost entire of taxes or other compulsory payments to the Gover ment. Any income from business-type activities (e interest income or sale of electric power), and any i come by Government accounts arising from paymen by other Government accounts is offset in computin *budget outlays* (spending). This method of accountin permits users to easily identify the size and tren in Federal taxes and other compulsory income, and i Federal spending financed from taxes, other compulso income, or borrowing. *Budget surplus* refers to any e cess of budget receipts over budget outlays, while *bud et deficit* refers to any excess of budget outlays ove budget receipts.

The terms *off-budget receipts, off-budget outlays, of budget surpluses,* and *off-budget deficits* refer to simila categories for off-budget activities. The sum of the on budget and off-budget transactions constitute the con solidated or total Federal Government transactions.

Table 1.4 shows on-budget receipts, outlays, and sur pluses or deficits by fund group. The budget is com posed of two principal fund groups—*Federal funds* an *trust funds*. Normally, whenever data are shown b fund group, any payments from programs in one fu group into receipt accounts of the other are shown as outlays of the paying fund and receipts of the collecting fund. When the two fund groups are aggregated to ar- rive at budget totals these *interfund transactions* are deducted from both receipts and outlays in order to arrive at transactions with the public. Table 1.4 shows the application of this rule to the on-budget accounts.

This rule was modified with regard to payments from on-budget to off-budget accounts, and vice versa, and therefore, the off-budget amounts are not shown in table 1.4. so normal accounting can be followed. In other tables, if the normal accounting had been foled, the collections arising from payments from on- dget Federal funds to the off-budget funds and from f-budget funds to on-budget Federal funds would have n recorded as off- or on-budget receipts. A special duction would be needed to eliminate this double- nt when the on-budget and off-budget totals were mbined. To avoid this complication, collections by off- dget accounts from on-budget, and vice versa, are l offset (deducted) in computing the outlays of the eiving side, thereby allowing the addition of on- and f-budget receipts and on- and off-budget outlays with- t double counting and without any further adjust- nts.

The term *trust fund* as used in Federal budget ac- unting is frequently misunderstood. In private ac- unting, "trust" refers to funds of one party held by second party (the trustee) in a fiduciary capacity. the Federal budget, the term "trust fund" means ly that the law requires that funds must be ac- unted for separately and used only for specified pur- ses, and the account in which the funds are deposited designated by law as being a "trust fund." A change law may change the future receipts and the terms der which the fund's resources are spent. The deter- ining factor as to whether a particular fund is des- nated as a "Federal" fund or "trust" fund is the law verning the fund.

The largest trust funds are for retirement and social surance (e.g., civil service and military retirement, cial security, medicare, and unemployment benefits), nanced largely by social insurance taxes and con- butions and payments from the general fund (the ain component of Federal funds). However, there are so major trust funds for transportation (highway and rport and airways) and for deposit insurance (Federal eposit Insurance Corporation) programs that are fi- nced by *user charges*. The term user charge refers a charge for services rendered.

The budget documents do not separately show user arges, but frequently there is confusion between the ncept of user charges and the concept of offsetting llections. User charges are charges for services ren- ered. Such charges may take the form of taxes (budget ceipts), such as highway excise taxes used to finance he highway trust fund. They may also take the form f business-type charges, in which case they are off- tting collections—offset against budget outlays rather an being recorded as budget receipts. Examples of ch charges are the proceeds from the sale of electric ower by the Tennessee Valley Authority and voluntary edical insurance premiums paid to the supplementary edical insurance trust fund. User charges may go to e general fund of the Treasury or they may be "ear- arked". If the funds are earmarked it means the col- ections are separately identified and used for a speci- ed purpose—they are not commingled (in an account- g sense) with any other money. This does not mean e money is actually kept in a separate bank account ll money in the Treasury is merged for efficient cash anagement), but any earmarked funds are accounted r in such a way that the balances are always identifiable and available for the stipulated purposes. The Federal funds grouping includes all receipts and outlays not specified by law as being trust funds.

All Federal funds (except for the Postal Service fund starting with fiscal year 1989) are on-budget; while most trust funds are on-budget, as explained in the general notes above, the two social security trust funds are shown off-budget for all years.

Notes on Section 2 (Composition of Federal Government Receipts)

Section 2 provides historical information on budget and off-budget receipts. Table 2.1 shows total receipts divided into five major categories; it also shows the split between on-budget and off-budget receipts. Table 2.2 shows the receipts by major category as percentages of total receipts, while Table 2.3 shows the same categories of receipts as percentages of the gross national product (GNP). Table 2.4 disaggregates two of the major receipts categories: social insurance taxes and contributions and excise taxes, and Table 2.5 disaggregates the "other receipts" category. While the focus of the section is on total Federal receipts, auxiliary data show the amounts of trust fund money in each category, so it is possible to readily distinguish the Federal fund and trust fund portions.

Notes on Section 3 (Federal Government Outlays by Function)

Section 3 displays Federal Government outlays (on-budget and off-budget) according to their functional classification. The functional structure is divided into 18 broad areas (functions) that provide a coherent and comprehensive basis for analyzing the budget. Each function, in turn, is divided into basic groupings of programs entitled subfunctions. The structure has two additional categories—allowances and undistributed offsetting receipts—that are not functions but are required in order to cover the entire budget. At times a more summary presentation of functional data is needed; the data by "superfunction" is produced to satisfy this need. Table 3.1 provides outlays by superfunction and function while Table 3.2 shows outlays by function and subfunction.

No major changes were made in the functional structure for the 1992 budget. However, a new subfunction—deposit insurance (373)—was created to bring together the various accounts directly related to providing Federal insurance of deposits in financial institutions that were formerly in separate subfunctions (within the Commerce and Housing Credit function (370)). Other significant changes in functional classification for the 1992 budget include:

- A consolidation of the Department of Education's program administration amounts under subfunction 503, research and general education aids. Previously, these amounts were split into several subfunctions within Function 500, Education, Training and Employment, and Social Services;
- A reclassification of several small accounts within the Treasury Department's Customs Services from

the General Government (800) function to the Administration of Justice (750) function, consistent with the law enforcement activities these funds support; and

- A reclassification of payments to the Resolution Trust Corporation and to the Farm Credit System Financial Assistance Corporation for payment of interest on debt to subfunction 908 (other interest) from subfunctions 371 and 351, respectively.

In arraying data on a functional basis, budget authority and outlays are classified according to the primary purpose of the activity. To the extent feasible, this classification is made without regard to agency or organizational distinctions. Classifying each activity solely in the function that defines its most important purpose—even though many activities serve more than one purpose—permits adding the budget authority and outlays of each function to obtain the budget totals. For example, Federal spending for medicaid constitutes a health care program, but it also constitutes a form of income security benefits. However, the spending cannot be counted in both functions; since the main purpose of medicaid is to finance the health care of the beneficiaries, this program is classified in the "health" function. Section 3 provides data on budget outlays by function, while Section 5 provides comparable data on budget authority.

Notes on Section 4 (Federal Government Outlays by Agency)

Section 4 displays Federal Government outlays (on- and off-budget) by agency. Table 4.1 shows the dollar amounts of such outlays, and Table 4.2 shows the percentage distribution. The outlays by agency are based upon the agency structure currently in effect. For example, the Department of Education was established by legislation enacted in 1979. However, these data show the Department of Education spending for all years, including education spending that was in other agencies in earlier years.

Notes on Section 5 (Budget Authority—On- and Off-Budget)

Section 5 provides data on budget authority (BA). BA is the authority provided by law for agencies to obligate the Government to spend. Because of its heterogeneity, BA does not always constitute a stream of resources closely related to an associated stream of spending (budget or off-budget outlays). Table 5.1 shows BA by function and subfunction, starting with 1976. Table 5.2 provides the same information by agency, and Table 5.3 provides a percentage distribution of BA by agency.

The data in these tables were compiled using the same methods used for the budget historical tables for receipts and outlays (i.e., to the extent feasible, changes in classification are reflected retroactively so the data show the same stream of transactions in the same location for all years). However, BA is heterogeneous in nature, varying significantly from one program to another. As a result, it is not additive—either across programs or agencies for a year or, in many cases, f an agency or program across a series of years—in t same sense that budget receipts and budget outla are additive. The following are examples of differe kinds of BA and the manner in which there are lar divergences between the creation and use of BA.

- BA and outlays for each year may be exactly t same (e.g., interest on the public debt).
- All income to a fund (e.g., the social security tru funds) may be permanently appropriated as B as long as the fund has adequate resources, the is no further relationship between the BA a outlays.
- For each year the Congress may appropriate large quantity of BA that will be spent over subsequent period of years (e.g., many defen procurement contracts and major construction pr grams).
- Some BA (e.g., the salaries and expenses of a operating agency) is made available only for year and any portion not obligated during th year lapses (i.e., it ceases to be available to b obligated).
- Revolving funds may operate spending program indefinitely with no new infusion of BA, othe than the permanent BA to spend offsetting colle tions.
- BA may be enacted with the expectation it is un likely ever to be used (e.g., standby borrowing au thority).
- In the past, the Federal Financing Bank (FFB was conducted as a revolving fund, making direc loans to the public or purchasing loan assets from other funds or accounts. Each new loan by the FFB required new BA. In many cases, if the same loan were made by the account being serviced by the FFB, the loan could be financed from offsetting collections and no new BA would be recorded. Under terms of the 1985 legislation moving the FFB on-budget, the FFB ceased to make direct loans to the public. Instead, it makes loans to the accounts it services, and these accounts, in turn, make the loans to the public. Such loans could be made from new BA or other obligational authority available to the parent account. These tables have not been reconstructed to shift BA previously scored in the FFB to the parent accounts, because there is no technical way to reconfigure the data.
- BA in four trust funds (the Federal hospital insurance trust fund (HI), the supplementary medical insurance trust fund (SMI), the unemployment trust fund (UI), and the railroad retirement account) is to be measured on a basis different from other trust funds. For most trust funds, budget authority is the total income to the fund. However, for these four, budget authority is an estimate of the obligations to be incurred during the fiscal year for benefit payments, administration, and other expenses of the fund.

- Although major changes in the way BA is measured for credit programs (beginning in 1992) result from the Budget Enforcement Act, these tables could not be reconstructed to show revised BA figures for 1991 and prior years on the new basis.

As a result of the diverse nature of BA, it is difficult to conceptualize what the BA total means for a single year, or to determine the significance of a change in total BA from one year to the next. Sometimes it is meaningful to compare the BA for one function or subfunction with that for another function or subfunction, but often it is not. It is also generally not meaningful to compare BA for a particular function or subfunction with total BA. Additionally, since some BA lapses without being used and some BA is standby and never used, it is impossible to add the BA for a period of years in a meaningful manner in the same sense that receipts or outlays can be added over a period of years.

Despite these qualifications and drawbacks, there is a desire for historical data on BA, and this section has been developed to meet that desire.

Notes on Section 6 (Composition of Federal Government Outlays)

The "composition" categories in this section divide total outlays (including social security) into national defense and nondefense components, and then disaggregate the nondefense spending into several parts:

- *Payments for individuals:* These are Federal Government spending programs designed to transfer income (in cash or in kind) to individuals or families. To the extent feasible, this category does not include reimbursements for current service rendered (e.g., salaries and interest). The payments may be in the form of cash or may take the form of the provision of services or the payment of bills for activities largely financed from personal income. They include outlays for the provision of medical care (in veterans hospitals, for example) and for the payment of medical bills (e.g., medicare). They also include subsidies to reduce the cost of housing below market rates, and food and nutrition assistance (such as food stamps). The data base, while not precise, provides a reasonable perspective of the size and composition of income support transfers within any particular year and trends over time. Section 11 disaggregates the components of this category. The data in Section 6 show a significant amount of payments for individuals takes the form of grants to State and local governments to finance benefits for the ultimate recipients. These grants include medicaid, some food and nutrition assistance, and a significant portion of the housing assistance payments. Sections 11 and 12 provide a more detailed disaggregation of this spending.
- *All other grants to State and local governments:* This category is composed of the Federal nondefense grants to State and local governments other than grants defined as payments for individuals. Section 12 disaggregates this spending.
- *Net interest:* This category is composed of all spending (including offsetting receipts) included in the functional category "net interest." Most spending for net interest is paid to the public as interest on the Federal debt. As shown in Table 3.2, net interest includes, as an offset, significant amounts of interest income.
- *All other:* This category is composed of all remaining Federal spending (and offsetting receipts) except for the offsetting receipts included in the category "undistributed offsetting receipts." It includes all Federal loan activities and most Federal spending for foreign assistance, farm price supports, medical and other scientific research, and, in general, Federal direct program operations.
- *Undistributed offsetting receipts:* This is function 950 as shown in the functional tables. Additional details on its composition can be found at the end of Table 3.2.

Table 6.1 shows these outlays in current dollars, in constant dollars, the percentage distribution of current dollar outlays, and the current dollar outlays as percentages of GNP. The term "constant dollars" means the amounts of money that would have had to be spent in each year if, on average, the unit cost of everything purchased within that category each year (including purchases financed by income transfers, interest, etc.) were the same as in the base year (1982). The adjustments to constant dollars are made by applying a series of price deflators to the current dollar data base. The composite deflator is used to produce estimates of constant dollar receipts, and is published in Table 1.3. The separate deflators used for these calculations are not published, but are available upon request. Requests should be sent to Historical Tables, Office of Management and Budget, Room 6025, NEOB, Washington, DC 20503.

Notes on Section 7 (Federal Debt)

This section provides information about Federal debt. Table 7.1 contains data on gross Federal debt and its major components in terms of both the amount of debt outstanding at the end of each year and that amount as a percentage of fiscal year GNP. Gross Federal debt is the broadest measure of Federal debt commonly used. It is composed both of Federal debt held (owned) by the public and Federal debt held by Federal Government accounts. The largest Federal Government accounts that hold Federal debt securities are the civil service and military retirement, unemployment, social security, and medicare trust funds. However, significant amounts are also held by some other Government accounts, such as the Bank Insurance Fund and the highway trust fund.

Federal debt held by the public is gross Federal debt less that portion held by Federal Government accounts. "The public" includes any person or institution other than Federal Government accounts—for example, individuals, private banks and insurance companies, the

Federal Reserve Banks, and foreign central banks. Table 7.1 divides debt held by the public between that amount held by the Federal Reserve Banks and the remainder. The Federal Reserve Banks, while not part of the Government, are the central banking system for the Nation. Their holdings of Federal debt arise from their role as the country's central bank, and the size of these holdings has a major impact on the Nation's money supply. Since the Federal budget does not forecast Federal Reserve monetary policy, it does not project future changes in the amounts of Federal debt that will be held by the Federal Reserve Banks. Hence, the split of debt held by the public into that portion held by the Federal Reserve Banks and the remainder is provided only for past years. Table 2.5 shows deposits of earnings by the Federal Reserve System. Most interest paid by Treasury on debt held by the Federal Reserve Banks is returned to the Treasury as deposits of earnings, which are counted as budget receipts.

As a result of a conceptual revision in the quantification of Federal debt, the data on debt held by the public and gross Federal debt—but only a small part of debt held by Government accounts—were revised back to 1956 in the 1990 budget. The total revision was relatively small—a change of under one percent of the recorded value of the debt—but the revised basis is more consistent with the quantification of interest outlays, and provides a more meaningful measure of Federal debt. The change converted most debt held by the public from par value to accrual value (sales price plus amortized discount).

Table 7.2 shows the end-of-year amounts of Federal debt subject to the general statutory limitation. It is recorded at par value (except for savings bonds) through 1988, but by law the basis was changed, in part, to accrual value for later years. Before World War I, each debt issue by the Government required specific authorization by the Congress. Starting in 1917, the nature of this limitation was modified in several steps until it developed into a limit on the total amount of Federal debt outstanding. The Treasury is free to borrow whatever amounts are needed up to the debt limit, which is changed from time to time to meet new requirements. Table 7.3 shows the ceiling at each point in time since 1940. It provides the specific legal citation, a short description of the change, and the amount of the limit specified by each Act. Most of gross Federal debt is subject to the statutory limit. However, there are some differences, and Chapter VIII.C. of the *Budget* discusses them in greater detail and shows a table bridging from gross Federal debt to debt subject to the general statutory limitation.

Notes on Section 8 (Outlays by Budget Enforcement Act Categories)

Section 8 is composed of three tables providing budget outlays by categories used under the Budget Enforcement Act and under previous budget agreements between Congress and the current and previous Administration. Table 8.1 shows Federal outlays within each of the categories and subcategories. The principal categories are outlays for mandatory and related progra and outlays for discretionary programs. Mandatory a related programs include direct spending and offsett receipts, whose budget authority is provided by la other than appropriations Acts. Also included in th category are appropriated entitlements and the fo stamp program. Table 8.2 provides additional detail b function and/or subfunction for mandatory and rela programs.

Discretionary programs are those whose budgeta resources (other than entitlement authority) are pr vided in appropriations Acts. The Budget Enforceme Act defines three categories of discretionary program Defense (Function 050), International (Function 15 and Domestic (all other discretionary programs). Ta 8.3 provides additional detail by function and subfunction on outlays for discretionary programs.

Notes on Section 9 (Federal Government Outlays for Major Physical Capital)

The tables in this section provide a broad perspecti on Federal Government outlays for public physical cap ital. They are based on the data classifications di cussed in Chapter XVIII of the *Budget*, which contai a discussion of this spending. These data measure to Federal spending for major public physical assets, bu they exclude major commodity inventories. In som cases it was necessary to use supplementary dat sources in order to develop the historical comparisons primarily the special analyses on public works. Whe ever changes from the originally published data we made or whenever data from supplementary da sources were used, these adjustments were made t provide a consistent data series. In some instances, i was necessary to estimate the comparable historica spending.

Notes on Section 10 (Federal Government Ou lays for the Conduct of Research and Deve opment)

Chapter XVIII of the *Budget* provides data showing Federal Government outlays for the conduct of research and development (R&D). These data exclude outlays for construction and major equipment for R&D, because such spending is included in outlays for physical capital (Section 9). Table 10.1 provides an overall perspective on Federal Government outlays for the conduct of R&D. It shows total spending and the split between national defense and nondefense spending in four forms: in current dollars, in constant dollars, as percentages of total outlays, and as percentages of GNP. Table 10.2 shows the outlays in current dollars by major function and program. Chapter IV.C. of the *Budget* discusses Federal research and development activities.

Notes on Section 11 (Federal Government Payments for Individuals)

This section provides detail on outlays for Federal Government payments for individuals, which are al described in the notes on Section 6. The basic purpose of the payments for individuals aggregation is to pr

best copy available

a broad perspective on Federal spending in cash n-kind for which no current service is rendered yet ch constitute income transfers to individuals and ies. Table 11.1 provides an overview display of e data in four different forms. All four of these ays show the total payments for individuals, and e split of this total between grants to State and local ernments for payments for individuals (such as icaid and grants for housing assistance) and all er ("direct") payments for individuals.

Table 11.2 shows the functional composition of paynts for individuals (see notes on Section 3 for a deption of the functional classification), and includes e same grants versus nongrants ("direct") split proed in Table 11.1. The off-budget social security prom finances a significant portion of the Federal paynts for individuals. These tables do not distinguish ween the on-budget and off-budget payments for individuals. However, all payments for individuals shown Table 11.2 in function 650 (social security) are offget outlays, and all other payments for individuals e on-budget. Table 11.3 displays the payments for ividuals by major program category.

otes on Section 12 (Federal Grants To State and Local Governments)

r several decades the Federal budget documents e provided data on Federal grants to State and local ernments. The purpose of these data is to identify eral Government outlays that constitute income to te and local Governments to help finance their servs and their income transfers (payments for individs) to the public. Grants generally exclude Federal ernment payments for services rendered directly to e Federal Government; for example, they exclude st Federal Government payments for research and elopment, and they exclude payments to State social rvice agencies for screening disability insurance beneiaries for the Federal disability insurance trust fund.

Table 12.1 provides an overall perspective on grants; s structure is similar to the structure of Table 11.1.

Table 12.2 displays Federal grants by function (see tes on Section 3 for a description of the functional sification). The bulk of Federal grants are included n the Federal funds group; however, since the creation f the highway trust fund in 1957, significant amounts f grants have been financed from trust funds (see es to Section 1 for a description of the difference tween "Federal funds" and "trust funds"). All Federal nts are on-budget. Wherever trust fund outlays are luded in those data, Table 12.2 not only identifies e total grants by function but also shows the split ween Federal funds and trust funds.

Table 12.3 provides data on grants at the account r program level, with an identification of the function, ency, and fund group of the payment.

Chapter VI.C. of the *Budget* discusses Federal aid State and local governments.

Notes on Section 13 (Social Security and Medicare)

Over the past several decades the social security programs (the Federal old-age and survivors insurance (OASI) and the Federal disability insurance (DI) trust funds) and the medicare programs (the Federal hospital insurance (HI) and the Federal supplementary medical insurance (SMI) trust funds) have grown to be among the largest components of the Federal budget. Because of the size, the rates of growth, and the specialized financing of these programs, policy analysts frequently need to identify these activities separately from all other Federal taxes and spending. As discussed in the introductory notes, the two social security funds are off-budget, while the medicare funds are on-budget. As Table 13.1 shows, the first of these funds (OASI) began in 1937. The table traces the annual transactions of that fund and of the other funds beginning with their points of origin.

The table provides detailed information about social security and medicare by fund. It shows total cash income (including offsetting receipts) by fund, separately identifying social insurance taxes and contributions, intragovernmental income, and proprietary receipts from the public. Virtually all of the proprietary receipts from the public, especially those for the supplementary medical insurance trust fund, are medicare insurance premiums. The table shows the income, outgo, and surplus or deficit of each fund for each year, and also shows the balances of the funds available for future requirements. Most of these fund balances are invested in public debt securities and constitute a significant portion of the debt held by Government accounts (see Table 7.1).

The SMI fund, which was established in 1967, is financed primarily by payments from Federal funds and secondarily by voluntary medical insurance premiums (proprietary receipts from the public). The other three trust funds are financed primarily by social insurance taxes. The law establishing the rate and base of these taxes allocates the tax receipts among the three funds.

The table shows significant transfers by OASI and DI to the railroad retirement social security equivalent account. These transfers are equal to the additional amounts of money social security would have had to pay, less additional receipts it would have collected, if the rail labor force had been included directly under social security since the inception of the social security program. In 1983, when the OASI fund ran short of money, Congress passed legislation that (a) provided for a one-time acceleration of military service credit payments to these trust funds, (b) provided for a Federal fund payment to OASDI for the estimated value of checks issued in prior years and charged to the trust funds but never cashed, (c) required the Treasury make payments to OASDHI on the first day of the month for the estimated amounts of their social insurance taxes to be collected over the course of each month (thereby increasing each affected trust fund's balances at the beginning of the month), and (d) subjected some social security benefits to Federal income or other taxes

pages tightly bound

and provided for payments by Federal funds to social security of amounts equal to these additional taxes. Additionally, in 1983 the OASI fund borrowed from the DI and HI funds (the tables show the amounts of such borrowing and repayments of borrowing). The large intragovernmental collections by OASDHI in 1983 are a result of the transactions described under (a) and (b) above. Also starting in 1983, OASI began paying interest to DI and HI to reimburse them for the balances OASI borrowed from them; OASDI paid interest to Treasury to compensate it for the balances transferred to these funds on the first day of each month. This practice was repealed for OASDI in the Omnibus Budget Reconciliation Act of 1990. It had been repealed previously for HI.

Notes on Section 14 (Federal Transactions in the National Income and Product Accounts)

The principal system used in the United States for measuring total economic activity is the system of national income and product accounts (NIPA), which provide calculations of the GNP and related data series. These data are produced by the Bureau of Economic Analysis (BEA) of the Department of Commerce. As part of this work the BEA staff analyze the budget data base and estimate budgetary transactions consistent with this measurement system. These data are displayed and discussed in Chapter XVI of the *Budget*. The NIPA data are normally produced for calendar years and quarters. However, Section 14 provides these data on a fiscal year basis from 1947 through the estimates for 1992, so users may have the historical data series comparable with the data displayed in Chapter XVI of the *Budget*.

Notes on Section 15 (Total (Federal and State and Local) Government Finances)

Section 15 provides a perspective on the size and composition of total Government (Federal, State, and local) receipts and spending on an accounting basis roughly comparable to that used for the budget. Both the Census Bureau and the Bureau of Economic Analysis (in the national income and product accounts (NIPA) data) in the Commerce Department provide information on income and spending for all levels of government in the United States. However, these data sources differ significantly from the Federal budget and from ea other in the ways they record transactions.

Chapter XVI of the *Budget* provides a table and di cussion showing the differences between measureme of Federal receipts and outlays in the budget and the NIPA data series. The table shows, for examp that the NIPA receipts include the proceeds from pa ments by the Federal Government for employer co tributions to its employee retirement systems (to ma the treatment of payments of Federal social insura taxes by private employers), whereas the budget tre the collection of these payments as offsetting collecti (because they are payments from the Government itself). There are various other transactions the bud treats as offsetting collections but the NIPA count nontax or social insurance receipts. Because of the and other conceptual differences, users of the budg documents who need measures of State and local tran actions on a basis comparable to the budget cann directly relate the State and local NIPA data with th Federal budget data.

Similarly, the Census data differ from the budg data. For example, the budget records the sale of post stamps as an offset to the cost of operating the Post Service, whereas the Census includes the proceeds fro the sale of stamps in the income side in its measurement of Government receipts.

Section 15 provides data for budget users who wis to see the size, composition, and trends of the finance of total Government activity in the United States o a basis roughly comparable to the budget measurement system. This is done by first taking the NIPA data (shown in the tables as "NIPA Basis") for State and local receipts and spending and adjusting these data to be reasonably comparable to the way the budge records similar Federal transactions. Next the State and local government "nontax receipts" are converted to offsetting collections (i.e., deducting them from spending rather than counting them as receipts). The tables then include these adjusted State and local transactions with the Federal budget (deducting the amount of overlap due to Federal grants to State and local governments) to measure total Government on a basis roughly comparable to the Federal budget measurement.

Table 1.1—SUMMARY OF RECEIPTS, OUTLAYS, AND SURPLUSES OR DEFICITS(–): 1789–1996

Table 1.2—**SUMMARY OF RECEIPTS, OUTLAYS, AND SURPLUSES OR DEFICITS(–) AS PERCENTAGES OF GNP: 1934–1996—Continued**

Year	GNP	Total			Budget			Off-Budget		
	(in billions of dollars)	Receipts	Outlays	Surplus or Deficit(–)	Receipts	Outlays	Surplus or Deficit(–)	Receipts	Outlays	Surplus or Deficit(–)
1995 estimate	7,334.5	20.0	20.0	–*	14.7	16.1	–1.4	5.3	3.9	1.4
1996 estimate	7,808.8	20.0	19.7	0.3	14.6	16.0	–1.3	5.3	3.8	1.5

* 0.05 percent or less.

Note: Fiscal year GNP data for years 1947 to current are those produced by the Bureau of Economic Analysis, Department of Commerce from seasonally unadjusted quarterly data. For years pr to 1947 the Department produces calendar year estimates but not fiscal year or quarterly estimates. For fiscal years prior to 1947 these GNP estimates are the average of the data for the calendar years; for 1947, they use two quarters of quarterly data and one half of calendar year data.

Table 1.3—SUMMARY OF RECEIPTS, OUTLAYS, AND SURPLUSES OR DEFICITS(–) IN CURRENT DOLLARS, CONSTANT (FY 1982) DOLLARS, AND AS PERCENTAGES OF GNP: 1940–1996

Table 1.4—ON-BUDGET RECEIPTS, OUTLAYS, AND SURPLUSES OR DEFICITS(–) BY FUND GROUP: 1934–1996—Continued

(in millions of dollars)

Fiscal Year	Receipts				Outlays				Surplus or Deficit(–)		
	Total	Federal Funds	Trust Funds	Interfund Transactions	Total	Federal Funds	Trust Funds	Interfund Transactions	Total	Federal Funds	Trust Funds
94 estimate	999,783	838,802	339,867	–178,886	1,150,218	1,058,467	270,637	–178,886	–150,435	–219,665	69,230
95 estimate	1,077,499	906,601	365,843	–194,946	1,183,811	1,087,895	290,861	–194,946	–106,312	–181,294	74,982
96 estimate	1,143,535	967,987	387,001	–211,453	1,246,124	1,139,127	318,450	–211,453	–102,589	–171,140	68,551

These are budget totals; they exclude receipts and outlays that are off-budget (social security and, starting with 1989, the Postal Service). This table differs from other displays of transactions fund group, because the interfund receipts from the off-budget accounts are included in receipts instead of being subtracted from outlays. The separate fund amounts therefore, cannot be added to budget amounts by fund type to derive consolidated totals without further adjustment.

Table 7.3—**STATUTORY LIMITS ON FEDERAL DEBT: 1940–CURRENT**

Date and Act	History of Legislation	Amount of Limit
June 25, 1940 54 Stat. 526	Amended sec. 21, adding new authority for issuance of $4 billion National Defense Series obligations outstanding	49,000,000
February 19, 1941 55 Stat. 7	Amended sec. 21, eliminating authority for $4 billion of National Defense Series obligations and increasing limitation to	65,000,000
March 28, 1942 56 Stat. 189	Amended sec. 21, increasing limitation to	125,000,000
April 11, 1943 57 Stat. 63	Amended sec. 21, increasing limitation to	210,000,000
June 9, 1944 58 Stat. 272	Amended sec. 21, increasing limitation to	260,000,000
April 3, 1945 59 Stat. 47	Amended sec. 21, including obligations guaranteed as to principal and interest by the United States and increasing limitation to	300,000,000
June 26, 1946 60 Stat. 316	Amended sec. 21, defining face amount of savings bonds to be current redemption value and decreasing limitation to	275,000,000
August 28, 1954 68 Stat. 895	Increasing sec. 21 limitation by $6 billion during period beginning August 28, 1954, and ending June 30, 1955	281,000,000
June 30, 1955 69 Stat. 241	Amended act of August 28,1954, extending increase in limitation until June 30, 1956	281,000,000
July 9, 1956 70 Stat. 519	Increased sec. 21 limitation by $3 billion during period beginning July 1, 1956, and ending June 30, 1957 Temporary increase terminated July 1, 1957, and limitation reverted to	278,000,000,0 275,000,000,0
February 26, 1958 72 Stat. 27	Increased sec. 21 limitation by $5 billion during period beginning February 26, 1958, and ending June 30, 1959	280,000,000,0
September 2, 1958 72 Stat. 1758	Amended sec. 21, increasing limitation to $283 billion, which with temporary increase of February 26, 1958 made limitation	288,000,000,0
June 30, 1959 73 Stat. 156	Amended sec. 21, increasing limitation to $285 billion and increased sec. 21 limitation by $10 billion during period beginning July 1, 1959, and ending June 30, 1960	295,000,000,0
June 30, 1960 74 Stat. 290	Increased sec. 21 limitation by $8 billion during period beginning July 1, 1960, and ending June 30, 1961	293,000,000,0
June 30, 1961 75 Stat. 148	Increased sec. 21 limitation by $13 billion during period beginning July 1, 1961, and ending June 30, 1962	298,000,000,0
March 13, 1962 76 Stat. 23	Increased sec. 21 limitation by $2 billion (in addition to temporary increase of $13 billion in act of June 30, 1961) during period beginning March 13, 1962, and ending June 30, 1962	300,000,000,0
July 1, 1962 76 Stat. 124	Increased sec. 21 limitation during the periods: (1) beginning July 1, 1962, and ending March 31, 1963, to (2) beginning April 1, 1963, and ending June 24, 1963, to (3) beginning June 25, 1963, and ending June 30, 1963, to	 308,000,000,0 305,000,000,0 300,000,000,0
May 29, 1963 77 Stat. 90	Increased sec. 21 limitation during the periods: (1) beginning May 29, 1963, and ending June 30, 1963, to (2) beginning July 1, 1963, and ending August 31, 1963, to	 307,000,000,0 309,000,000,0
August 27, 1963 77 Stat. 131	Increased sec. 21 limitation during the period beginning September 1, 1963, and ending November 30, 1963, to	309,000,000,0

Table 7.3—STATUTORY LIMITS ON FEDERAL DEBT: 1940–CURRENT—Continued

Date and Act	History of Legislation	Amount of Limit
ember 26, 1963 Stat. 342	Increased sec. 21 limitation during the periods:	
	(1) beginning December 1, 1963, and ending June 29, 1964, to	315,000,000,000
	(2) ending June 30, 1964, to	309,000,000,000
June 29, 1964 Stat. 225	Increased sec. 21 limitation during the period beginning June 29, 1964, and ending June 30, 1965, to	324,000,000,000
June 24, 1965 Stat. 172	Increased sec. 21 limitation during the period beginning July 1, 1965, and ending June 30, 1966, to	328,000,000,000
June 24, 1966 Stat. 221	Increased sec. 21 limitation during the period beginning July 1, 1966, and ending June 30, 1967, to	330,000,000,000
March 2, 1967 Stat. 4	Increased sec. 21 limitation during the period beginning March 2, 1967, and ending June 30, 1967, to	336,000,000,000
June 30, 1967 Stat. 99	Sec. 21 amended to increase limitation on aggregate outstanding at any time to	358,000,000,000
	Sec. 21 amended also to increase the limitation temporarily, beginning July 1, 1968, and each July 1 thereafter for the period beginning July 1 and ending June 29 of each succeeding calendar year by $7 billion, providing an operating limitation of	365,000,000,000
April 7, 1969 Stat. 7	Amended sec. 21, increasing limitation to $365 billion, and increased sec. 21 limitation by $12 billion during period beginning April 7, 1969, and ending June 30, 1970	377,000,000,000
June 30, 1970 Stat. 368	Amended sec. 21, increasing limitation to $380 billion, and increased sec. 21 limitation by $15 billion during period beginning July 1, 1970, and ending June 30, 1971	395,000,000,000
March 17, 1971 Stat. 5	Amended sec. 21, increasing limitation to $400 billion, and increased sec. 21 limitation by $30 billion during period beginning March 17, 1971, and ending June 30, 1972	430,000,000,000
March 15, 1972 Stat. 63	Amended sec. 21, to further increase the limitation temporarily by $20 billion during period beginning March 15, 1972, and ending June 30, 1972	450,000,000,000
July 1, 1972 Stat. 406	Amended act of March 15, 1972, striking out June 30, 1972, and inserting in lieu thereof October 31, 1972	450,000,000,000
October 27, 1972 Stat. 1324	Increased sec. 21 limitation during the period beginning November 1, 1972, and ending June 30, 1973	465,000,000,000
July 1, 1973 Stat. 1324	Amended act of October 27, 1972, striking out June 30, 1973, and inserting in lieu thereof November 30, 1973	465,000,000,000
December 3, 1973 Stat. 691	Increased sec. 21 limitation during the period beginning December 3, 1973, and ending June 30, 1974	475,700,000,000
June 30, 1974 Stat. 285	Increased sec. 21 limitation during the period beginning June 30, 1974, and ending March 31, 1975	495,000,000,000
February 19, 1975 Stat. 5	Increased sec. 21 limitation during the period beginning February 19, 1975, and ending June 30, 1975	577,000,000,000
June 30, 1975 Stat. 246	Increased sec. 21 limitation during the period beginning June 30, 1975, and ending November 15, 1975	577,000,000,000
November 14, 1975 Stat. 693	Increased sec. 21 limitation during the period beginning November 14, 1975, and ending March 15, 1976	595,000,000,000
March 15, 1976 Stat. 217	Increased sec. 21 limitation during the period beginning March 15, 1976, and ending June 30, 1976	627,000,000,000

Table 7.3—STATUTORY LIMITS ON FEDERAL DEBT: 1940–CURRENT—Continued

Date and Act	History of Legislation	Amount of Limit
June 30, 1976 90 Stat. 793	Increased sec. 21 limitation during the periods:	
	(1) beginning July 1, 1976, and ending September 30, 1976, to	636,000,000
	(2) beginning October 1, 1976, and ending March 31, 1977, to	682,000,000
	(3) beginning April 1, 1977, and ending September 30, 1977, to	700,000,000
	Temporary increase terminated October 1, 1977, and limitation reverted to	400,000,000
October 4, 1977 91 Stat. 1090	Increased sec. 21 limitation by $352 billion during the period beginning October 4, 1977, and ending March 31, 1978	752,000,000
March 27, 1978 92 Stat. 185	Amended act of October 4, 1977, striking out March 31, 1978, and inserting in lieu thereof July 31, 1978	752,000,000
	Temporary increase terminated August 1, 1978, and limitation reverted to	400,000,000
August 3, 1978 92 Stat. 419	Increased sec. 21 limitation by $398 billion during the period beginning August 3, 1978, and ending March 31, 1979	798,000,000
	Temporary increase terminated April 1, 1979, and limitation reverted to	400,000,000
April 2, 1979 93 Stat. 8	Increased sec. 21 limitation by $430 billion during the period beginning April 2, 1979, and ending September 30, 1979	830,000,000
September 29, 1979 93 Stat. 589	Increased sec. 21 limitation by $479 billion during the period beginning September 29, 1979, and ending May 31, 1980	879,000,000
May 30, 1980 94 Stat. 421	Amended act of September 29, 1979, striking out May 31, 1980, and inserting in lieu thereof June 5, 1980	879,000,000
June 6, 1980 94 Stat. 439	Amended act of September 29, 1979, striking out June 5, 1980, and inserting in lieu thereof June 30, 1980	879,000,000
June 28, 1980 94 Stat. 598	Increased sec. 21 limitation by $525 billion during the period beginning June 28, 1980, and ending February 28, 1981	925,000,000
December 19, 1980 94 Stat. 3261	Increased the total debt limit to $935.1 billion (composed of $400.0 billion of permanent ceiling, $535.1 billion of temporary ceiling)	935,100,000
February 7, 1981 95 Stat. 4	Increased the temporary portion of the debt limit to $585.0 billion (to a total debt ceiling of $985.0 billion) through September 30, 1980	985,000,000
September 30, 1981 95 Stat. 955	Increased the temporary portion of the debt limit to $599.8 billion for one day -September 30, 1981	999,800,000
September 30, 1981 95 Stat. 956	Increased the temporary portion of the debt limit to $679.8 billion through September 30, 1982	1,079,800,000
June 28, 1982 96 Stat. 130	Increased the temporary portion of the debt limit to $743.1 billion through September 30, 1982	1,143,100,000
September 30, 1982 96 Stat. 1156	Increased the temporary portion of the debt limit to $890.2 billion through September 30, 1983	1,290,200,000
May 26, 1983 97 Stat. 196	Eliminated the distinction between permanent and temporary limit with the enactment of a single permanent limit. Raised the debt limit to $1,389.0 billion	1,389,000,000
November 21, 1983 97 Stat. 1012	Increased the debt limit to $1,490.0 billion	1,490,000,000
May 25, 1984 98 Stat. 211	Increased the debt limit to $1,520.0 billion	1,520,000,000
July 6, 1984 98 Stat. 313	Increased the debt limit to $1,573.0 billion	1,573,000,000
October 13, 1984 98 Stat. 475	Increased the debt limit to $1,823.8 billion	1,823,800,000

Table 7.3—STATUTORY LIMITS ON FEDERAL DEBT: 1940–CURRENT—Continued

ate and Act	History of Legislation	Amount of Limit
ber 14, 1985 at. 814	Increased the debt limit temporarily to $1,903.8 billion throughDecember 6, 1985	1,903,800,000,000
ber 12, 1985 t. 1037	Increased the debt limit to $2,078.7 billion	2,078,700,000,000
gust 21, 1986 Stat. 818	Increased the debt limit to $2,111.0 billion	2,111,000,000,000
tober 21, 1986 Stat. 1874	Increased the debt limit temporarily to $2,300.0 billion through May 15, 1987	2,300,000,000,000
ay 15, 1987 Stat. 308	Increased the debt limit temporarily to $2,320.0 billion through July 17, 1987	2,320,000,000,000
uly 30, 1987 Stat. 542	Increased the debt limit temporarily to $2,320.0 billion through August 6, 1987	2,320,000,000,000
ugust 10, 1987 Stat. 550	Increased the debt limit temporarily to $2,352.0 billion through September 23, 1987	2,352,000,000,000
ember 29, 1987 Stat. 754	Increased the debt limit to $2,800.0 billion	2,800,000,000,000
August 7, 1989 Stat. 182	Increased the debt limit temporarily to $2,870.0 billion through October 31, 1989	2,870,000,000,000
vember 8, 1989 Stat. 830	Increased the debt limit to $3,122.7 billion	3,122,700,000,000
August 9, 1990 Stat. 403	Increased the debt limit temporarily to $3,195.0 billion through October 2, 1990	3,195,000,000,000
October 2, 1990 Stat. 878	Increased the debt limit temporarily to $3,195.0 billion through October 6, 1990	3,195,000,000,000
October 9, 1990 Stat. 894	Increased the debt limit temporarily to $3,195.0 billion through October 19, 1990	3,195,000,000,000
October 19, 1990 Stat. 1030	Increased the debt limit temporarily to $3,195.0 billion through October 24, 1990	3,195,000,000,000
October 25, 1990 Stat. 1075	Increased the debt limit temporarily to $3,195.0 billion through October 27, 1990	3,195,000,000,000
October 28, 1990 Stat. 1086	Increased the debt limit temporarily to $3,230.0 billion through November 5, 1990	3,230,000,000,000
ovember 5, 1990 Stat. 1388	Increased the debt limit to $4,145.0 billion	4,145,000,000,000

$500 thousand or less.

NOTE: The medicare amounts in this table combine the transactions of the recently repealed catastrophic insurance trust funds with the supplementary medical insurance trust fund. The two medical trust fund balances also reflect the proposed transfer of catastrophic balances from the SMI trust fund to the HI trust fund in 1992.

In 1983, includes $329.3 million loss on sale of securities.

Starting in 1983, includes amounts from Postal Service.

For years after 1992, includes outlays for vocational rehabilitation.

For years after 1992, outlays for peer review organizations are included in the benefit payments line.

For 1989 and 1990, includes transactions and balances of the HI and SMI Catastrophic Insurance trust funds, which began in 1989 and were abolished in 1990.

For years after 1986, receipts for kidney dialysis.

GLOSSARY OF BUDGET TERMS

GLOSSARY OF BUDGET TERMS[1]

ALANCES OF BUDGET AUTHORITY—These are amounts of budget authority provided in previous years that have not been outlayed. Obligated balances are amounts that have been obligated but not yet outlayed. Unobligated balances are amounts that have not been obligated and that remain available for obligation under law.

REACH—A breach is the amount by which new budget authority or outlays within a category of discretionary appropriations for a fiscal year is above the cap on new budget authority or outlays for that category for that year.

UDGET—The Budget of the United States Government (this document) sets forth the President's comprehensive financial plan and indicates the President's priorities for the Federal Government.

UDGET AUTHORITY (BA)—Budget authority is the authority provided by Federal law to incur financial obligations that will result in outlays. Specific forms of budget authority include:

- provisions of law that make funds available for obligation and expenditure (other than borrowing authority), including the authority to obligate and expend offsetting receipts and collections;
- borrowing authority, which is authority granted to a Federal entity to borrow (e.g., through the issuance of promissory notes or monetary credits) and to obligate and expend the borrowed funds;
- contract authority, which is the making of funds available for obligation but not for expenditure; and
- offsetting receipts and collections as negative budget authority.

UDGETARY RESOURCES—Budgetary resources comprise new budget authority, unobligated balances of budget authority, direct spending authority, and obligation limitations.

UDGET TOTALS—The budget includes totals for budget authority, outlays, and receipts. Some presentations in the budget distinguish on-budget totals from off-budget totals. On-budget totals reflect the transactions of all Federal Government entities except those excluded from the budget totals by law. Off-budget totals reflect the transactions of Government entities that are excluded from the on-budget totals by law. Currently excluded are the social security trust funds (Federal Old-Age and Survivors Insurance and Federal Disability Insurance Trust Funds) and the Postal Service. The on- and off-budget totals are combined to derive a total for Federal activity.

AP—This is the term commonly used to refer to legal limits on the budget authority and outlays for each fiscal year for each of the discretionary appropriations categories. A sequester is required if an appropriation for a category causes a breach in the cap.

---

[1] These basic terms and other budget terms, concepts, and procedures are described more fully in *The Budget System and Concepts he United States Government*, a pamphlet available from the Government Printing Office. References to requirements in law generally r to the Balanced Budget and Emergency Deficit Control Act of 1985 (also known as the Gramm-Rudman-Hollings Act), as amended. Act was most recently amended by the Budget Enforcement Act of 1990 (Title XIII of Public Law 101–508). These requirements discussed in various parts of the *Budget*.

CATEGORIES OF DISCRETIONARY APPROPRIATIONS—For 1991, 1992, and 1993, discretionary appropriations are categorized as defense, international, or domestic. Separate spending limits (caps) are applied to each category. The appropriations in each of the categories are determined by lists of existing appropriations in a 1990 congressional report[2] or, in the case of new appropriations, in consultation among the Office of Management and Budget and the congressional Committees on Appropriations and the Budget. For 1994 and 1995, all discretionary appropriations constitute a single category.

COST—The term cost, when used in connection with Federal credit programs, means the estimated long-term cost to the Government of a direct loan or loan guarantee, calculated on a net present value basis. The term excludes administrative costs and any incidental effects on governmental receipts or outlays.

CREDIT PROGRAM ACCOUNT—A credit program account receives an appropriation for the cost of a direct loan or loan guarantee program, from which such cost is disbursed to a financing account for the program.

DEFICIT—A deficit is the amount by which outlays exceed Governmental receipts.

DIRECT LOAN—A direct loan is a disbursement of funds by the Government to a non-Federal borrower under a contract that requires the repayment of such funds with or without interest. The term includes the purchase of, or participation in, a loan made by another lender. The term does not include the acquisition of a federally guaranteed loan in satisfaction of default claims or the price support loans of the Commodity Credit Corporation. (*Cf.* LOAN GUARANTEE.)

DIRECT SPENDING—Direct spending is a category of outlays from budget authority provided in law other than appropriations acts, entitlement authority, and the budget authority for the food stamp program. (*Cf.* DISCRETIONARY APPROPRIATIONS.)

DISCRETIONARY APPROPRIATIONS—Discretionary appropriations is a category of budget authority that comprises budgetary resources (except those provided to fund direct-spending programs) provided in appropriations acts. (*Cf.* DIRECT SPENDING.)

EMERGENCY APPROPRIATION—An emergency appropriation is an appropriation in a discretionary category that the President and the Congress have designated as an emergency requirement. Such appropriations result in an adjustment to the cap for the category.

FEDERAL FUNDS—Federal funds are the moneys collected and spent by the Government other than those designated as trust funds. Federal funds include general, special, public enterprise, and intragovernmental funds. (*Cf.* TRUST FUNDS.)

FINANCING ACCOUNT—A financing account receives the cost payments from a credit program account and includes other cash flows to and from the Government resulting from direct loan obligations or loan guarantee commitments made on or after October 1, 1991. At least one financing account is associated with each credit program account. For programs with direct and guaranteed loans, there are separate financing accounts for direct loans and guaranteed loans. The transactions of the financing accounts are not included in the budget totals. (*Cf.* LIQUIDATING ACCOUNT)

FISCAL YEAR—The fiscal year is the Government's accounting period. It begins on October 1st and ends on September 30th, and is designated by the calendar year in which it ends.

GENERAL FUND—The general fund consists of accounts for receipts not earmarked by law for a specific purpose, the proceeds of general borrowing, and the expenditure of these moneys.

LIQUIDATING ACCOUNT—A liquidating account includes all cash flows to and from the Government resulting from direct loan obligations and loan guarantee commitments prior to October 1, 1991. (*Cf.* FINANCING ACCOUNT.)

LOAN GUARANTEE—A loan guarantee is any guarantee, insurance, or other pledge with respect to the payment of all or a part of the principal or interest on any debt obligation of a non-Federal borrower to a non-Federal lender. The term does not include the insurance of deposits, shares, or other withdrawable accounts in financial institutions. (*Cf.* DIRECT LOAN.)

---

[2] The joint statement of the managers accompanying the conference report on the Omnibus Budget Reconciliation Act of 1990 (Public Law 101–508).

AXIMUM DEFICIT AMOUNTS—These are amounts specified in and subject to certain adjustments under law. If the deficit for the year in question is estimated to exceed the adjusted maximum deficit amount for that year by more than a specified margin, a sequester of the excess deficit is required.

NTRAGOVERNMENTAL FUNDS—Intragovernmental funds are accounts for business-type or market-oriented activities conducted primarily within and between Government agencies and financed by offsetting collections that are credited directly to the fund.

BLIGATIONS—Obligations are binding agreements that will result in outlays, immediately or in the future. Budgetary resources must be available before obligations can be incurred legally.

FF-BUDGET—See BUDGET TOTALS.

FFSETTING COLLECTIONS—Offsetting collections are collections from the public that result from business-type or market-oriented activities and collections from other Government accounts. These collections are deducted from gross disbursements in calculating outlays, rather than counted in Governmental receipt totals. Some are credited directly to appropriation or fund accounts; others, called offsetting receipts, are credited to receipt accounts. The authority to spend offsetting collections is a form of budget authority. (*Cf.* RECEIPTS, GOVERNMENTAL.)

N-BUDGET—See BUDGET TOTALS.

UTLAYS—Outlays are the measure of Government spending. They are payments to liquidate obligations (other than the repayment of debt), net of refunds and offsetting collections. Outlays generally are recorded on a cash basis, but also include many cash-equivalent transactions, the subsidy cost of direct loans and loan guarantees, and interest accrued on public issues of the public debt.

AY-AS-YOU-GO—This term refers to requirements in law that result in a sequester if the estimated combined result of legislation affecting direct spending or receipts is an increase in the deficit for a fiscal year.

UBLIC ENTERPRISE FUNDS—Public enterprise funds are accounts for business or market-oriented activities conducted primarily with the public and financed by offsetting collections that are credited directly to the fund.

ECEIPTS, GOVERNMENTAL—Governmental receipts are collections that result primarily from the Government's exercise of its sovereign power to tax or otherwise compel payment. They are compared to outlays in calculating a surplus or deficit. (*Cf.* OFFSETTING COLLECTIONS.)

QUESTER—A sequester is the cancellation of budgetary resources provided by discretionary appropriations or direct spending legislation, following various procedures prescribed in law. A sequester may occur in response to a discretionary appropriation that causes a breach, in response to increases in the deficit resulting from the combined result of legislation affecting direct spending or receipts (referred to as a "pay-as-you-go" sequester), or in response to a deficit estimated to be in excess of the maximum deficit amounts.

ECIAL FUNDS—Special funds are Federal fund accounts for receipts earmarked for specific purposes and the associated expenditure of those receipts. (*Cf.* TRUST FUNDS.)

BSIDY—This term means the same as cost when it is used in connection with Federal credit programs.

RPLUS—A surplus is the amount by which receipts exceed outlays.

PPLEMENTAL APPROPRIATION—A supplemental appropriation is one enacted subsequent to a regular annual appropriations act when the need for funds is too urgent to be postponed until the next regular annual appropriations act.

UST FUNDS—Trust funds are accounts, designated by law as trust funds, for receipts earmarked for specific purposes and the associated expenditure of those receipts. (*Cf.* SPECIAL FUNDS.)

Part One. Introduction

pter I. The Budget Message of the President

The Federal Government Dollar Fiscal Year 1992 Estimate 2

pter II. Director's Introduction and Overview Tables

Deficits as a Percent of GNP 8
"Mandatory" Programs are Taking Over the Budget 12
Domestic Discretionary, Defense, and Mandatory Spending 12
Mandatory Spending by Income 13
Core Government, Long-Term Investments, and Short-Term Benefits (Total Domestic Discretionary and Mandatory Outlays as a Percent of GNP) 18
Core Government, Long-Term Investments, and Short-Term Benefits (As a Percent of Total Domestic Discretionary Outlays) 19

Part Two. Themes and Priorities

pter IV. Investing in the Future

A. Investing in Human Capital and Reforming American Education

Education Spending Rises but Achievement Stays Level 5
Revitalizing Math, Science and Engineering Education Requires Greater Investment in the Early Stages of the "Education Pipeline" 13
The 1992 Budget Establishes a Strategic Framework for Programs to Improve Math, Science, and Engineering Education 14

B. Focusing on Prevention and the Next Generation

Federal Spending to Benefit Children Has Grown Less Quickly Than Spending on Adults 23
Changes in Behavior, Early Detection and Intervention Could Prevent: 23
The Percentage of Adult Americans Who Smoke Continues to Decline 24
WIC Participation Has Soared Since FY86 28

C. Enhancing Research and Development and Expanding the Human Frontier

The 1992 Budget Will Increase the Ratio of Federal Civilian Research and Development Outlays to GNP 40
The Budget Will Increase Investment in Civilian Research and Development as a Percentage of Domestic Discretionary Spending 40
The 1992 Budget Proposes Expanded Support for Basic Research 42
The 1992 Budget Proposes Increased Funding for Civilian Applied Research and Development ... 48
Research Investments in Selected Diseases 56
Industry Support for Research and Development Has Leveled Off in Recent Years 60
Federal Support for University Infrastructure Through Indirect Cost Payments Has Grown Sharply 61
Making Biotechnology Research Discoveries Available for Product Development 75

D. Improving the Transportation Infrastructure

Growth of Transportation Services and Real GNP 78
Funding the "National Highway System" Program, 1992–96 80

LIST OF CHARTS—Continued

Page

Funding the Urban/Rural Highway Program, 1992–96 81
Funding for Bridges, 1992–96 82
Total Receipts for Highways by Governmental Unit 83

E. Preserving America's Heritage and Protecting the Environment in a Growing Economy

America's Parks, Forests, and Other Public Lands Will be Expanded (Federal Land Acquisition) 89
Superfund Budget Authority 96
Speeding the Cleanup of Federal Facilities 100
U. S. Global Change Research Program 101

Chapter V. Increasing Choice and Opportunity

A. Increasing Choice, Expanding Opportunity, and Providing Hope to Distressed Communities

Funding for Choice-Based Programs Will Increase Dramatically 109
Parents Will Have a Wider Range of Choices in Caring for Their Children 112
Choice in Elementary and Secondary Education: Federal Resources Will Grow 113
More Tenant Choice in Assisted Housing Units 115
Funding for HOPE Grants Initiative Increases Sharply 117

B. Ending the Scourge of Drugs and Crime

Cocaine Use Has Started to Fall 126
After Climbing Steadily, Cocaine-Related Emergencies Have Begun to Fall 127
Use of Marijuana by High School Students is Declining; Disapproval of Marijuana is Increasing . 128

C. Distributing Federal Benefits More Fairly

Increases in Cash Transfers Have Gone Princiapally to the Non-Poor 135
The Percentage of Benefits Received by the Poor Has Been Declining, Whether Measured on a Post-Transfer or Pre-Transfer Basis 136
Subsidies Would be Reduced for Medicare Part B Beneficiaries with Incomes Over $125,000 138

Chapter VI. Advancing States as Laboratories

C. Providing Federal Aid to State and Local Governments

Federal Grants to State and Local Governments 163
State and Local Surpluses and Deficits as a Percent of GNP 169

Chapter VIII. Addressing Inherited Claims, Hidden Liabilities, and Debt

A. Recognizing and Reducing Federal Underwriting Risks

Ratio of Net Charge-Offs to Loans at Commercial Banks: 1960–1990 211
Two Perspectives on Federal Credit: 1992 221
Housing Debt Outstanding 228
Farm Debt Outstanding 238

Part Four. Federal Programs by Function, Agency, and Account

Chapter XII. Summary

D. Relationship of Budget Authority to Outlays

Relationship of Budget Authority to Outlays—1992 206
